Architecture and Mathematics from Antiquity to the Future Kim Williams, Michael J. Ostwald, 2015-02-11 Every age and every culture has relied on the incorporation of mathematics in their works of architecture to imbue the built environment with meaning and order Mathematics is also central to the production of architecture to its methods of measurement fabrication and analysis This two volume edited collection presents a detailed portrait of the ways in which two seemingly different disciplines are interconnected Over almost 100 chapters it illustrates and examines the relationship between architecture and mathematics Contributors of these chapters come from a wide range of disciplines and backgrounds architects mathematicians historians theoreticians scientists and educators Through this work architecture may be seen and understood in a new light by professionals as well as non professionals Volume II covers architecture from the Late Renaissance era through Baroque Ottoman Enlightenment Modern and contemporary styles and approaches Key figures covered in this volume include Palladio Michelangelo Borromini Sir Christopher Wren Wright Le Corbusier Breuer Niemeyer and Kahn Mathematical themes which are considered include linear algebra tiling and fractals and the geographic span of the volume's content includes works in the United States of America and Australia in addition to those in Europe and Asia Louis I. Kahn's Jewish Architecture Susan G. Solomon, 2015-05-01 In 1961 famed architect Louis I Kahn 1901-1974 received a commission to design a new synagogue His client was one of the oldest Sephardic Orthodox congregations in the United States Philadelphia's Mikveh Israel Due to the loss of financial backing Kahn's plans were never realized Nevertheless the

haunting and imaginative schemes for Mikveh Israel remain among Kahn's most revered designs Susan G Solomon uses Kahn's designs for Mikveh Israel as a lens through which to examine the transformation of the American synagogue from 1955 to 1970 She shows how Kahn wrestled with issues that challenged postwar Jewish institutions and evaluates his creative attempts to bridge modernism and Judaism She argues that Kahn provided a fresh paradigm for synagogues one that offered innovations in planning decoration and the incorporation of light and nature into building design **Louis I. Kahn** David Bruce Brownlee,1995 **Utopias and Architecture** Nathaniel Coleman,2007-05-07 Utopian thought though commonly characterized as projecting a future without a past depends on golden models for re-invention of what is Through a detailed and innovative re-assessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers Coleman offers the reader a unique perspective of idealism in architectural design With unparalleled depth and focus of vision on the work of Le Corbusier Louis I Kahn and Aldo van Eyck this book persuasively challenges predominant assumptions in current architectural discourse forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hyper-modern stance and orthodox modernist architecture Trajectories in Architecture Michael Jasper,2023-04-21 Trajectories in Architecture Plan Sensation Temporality presents a compelling examination of underlying issues in late twentieth century architecture Three formal preoccupations and conceptual orientations are used as guiding threads or trajectories These three trajectories the plan as conceptual device a logic of sensation and temporalities serve to organise individual chapters in the central sections of the book and provide a new lens to the study of period work revealing architectural conditions and consequent spatial effects little explored to date Trajectories in Architecture adds to scholarship and expands our understanding of the role of conceptual and formal criteria in the analysis and creation of works of architecture The book provides potentially transformative new interpretations of influential architects and key projects from the last half of the twentieth century to reveal new alignments and potentialities in architecture's recent past as a contribution to identifying future possibilities In so doing the book argues for the still latent potential in modern architecture's traditions and design principles and their future expression Trajectories in Architecture includes analysis of significant projects of Le Corbusier Peter Eisenman Zaha Hadid John Hejduk Louis I Kahn and I M Pei **Encyclopedia of Twentieth Century Architecture** R. Stephen Sennott,2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries The Grove Encyclopedia of American Art Joan M. Marter,2011 Arranged in

alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries
