The Crisis of Connection Niobe Way, Alisha Ali, Carol Gilligan, Pedro Noguera, 2020-01-07 A collection of essays that examine the causes of and provide solutions to the widespread alienation and disconnection that beset modern society Since the beginning of the 21st century people have become increasingly disconnected from themselves each other and the world around them A crisis of connection stemming from growing alienation social isolation and fragmentation characterizes modern society The signs of this crisis of connection are everywhere from decreasing levels of empathy and trust to burgeoning cases of suicide depression and loneliness The astronomical rise in inequality around the world has contributed to the critical nature of this moment To delve into the heart of the crisis leading researchers and practitioners draw from the science of human connection to tell a five part story about its roots consequences and solutions In doing so they reveal how we in modern society have been captive to a false narrative that takes individualism as a universal truth The new story now emerging from across the human sciences underscores our social and emotional capacities and needs The science also reveals the ways in which the privileging of the self over relationships and of individual success over the common good as well as the perpetuation of dehumanizing stereotypes have led to a crisis of connection that is now widespread Finally the

practitioners in the volume present concrete solutions that show ways we can create a more just and humane world This profoundly important book suggests that our innate human determination to bridge differences and live in vulnerable loving relationships is the antidote to rising fear and anxiety Lyn Mikel Brown author of *Powered by Girl* *Positive Relationships* Sue Roffey,2011-11-11 Relationships are at the heart of our lives at home with our families with our friends in schools and colleges with colleagues at the workplace and in our diverse communities The quality of these relationships determines our individual well being how well we learn develop and function our sense of connectedness with others and the health so society This unique volume brings together authorities from across the world to write about how relationships might be enhanced in all these different areas of our lives It also explores how to address the challenges involved in establishing and maintaining positive relationships This evidence based book primarily grounded in the science of positive psychology is valuable for academics especially psychologists and professionals working in the field of well being **Proceedings of the**
