Abstract: This article expounds the theoretical core of Fromm's book *The Art of Love*, as well as the analysis of the characteristics of ethnic college students in the thoughts and behavior of love. This paper discusses the enlightenment of Fromm's theory to the emotional education of college students in ethnic colleges, guides and helps them to understand love, correctly understand the essence of love, and cultivate their practical ability of love. Expect to provide some reference and reference for readers.

Keywords: The theory of love, Student, Emotional education.

1. Introduction

With the development and change of The Times and the strong support of the Ministry of Education for the promotion of higher education system in ethnic minority areas, and a series of measures to strengthen the strategic position of education in border areas and support the accelerated development of education in border areas. These have improved the level of ethnic education to a greater extent. However, the problem of emotional education for students in ethnic minority areas is still relatively serious. Emotional problems are very important for college students, and they are also a very important educational proposition. If college students' emotional problems are not properly solved, they will affect their personal growth and their adaptability to the society. This problem also increases the difficulty to the education management of ethnic minority colleges. In the book *The Art of Love*, Fromm regards love as an art, explains the profound topic of love in concise language, analyzes the problems existing in contemporary capitalist society through psychoanalysis, and advocates people to use true love to get rid of loneliness, fear and alienation of their own occurrence. This has certain enlightenment significance for correctly guiding the students in local colleges to shape their personality and development in love.

2. An Overview of Fromm's Core Theory of Love in Art

Fromm believes that love is a skill that requires efforts to develop, one that requires engagement in the body and mind, but not just that. He believes that love is actually an art, a skill that needs to be constantly learned and practiced to master. If you do not try to develop all your personality and achieve a tendency to create, then every love will fail. If there is no ability to love others, if not truly, humbly, bravely, sincerely and disciplined, then people will never be satisfied in their own love life. True love is not a feeling, but an act, is the attention, respect and care of others. Just like for people who know nothing, they do not have any love, for those who can do nothing, they have no understanding. And those who know nothing, they have no value in the eyes of the world. This is because knowledge, skills and experience are the basis of a person's core values. Without these, it is just like a

fundamental building that cannot move forward steadily on the road of life. Therefore, we should actively learn and improve our knowledge and ability, so as to make ourselves more valuable and win more respect and love.

2.1. The theory of love

Fromm believes that love is the only sound and satisfactory answer to the question of human survival. In the modern society, with the development of technology and the diversification of social ways, more and more people feel lonely and helpless. They aspire to connect with others, share emotions, and gain support and comfort. However, in this world full of hypocrisy, profit-driven and competitive pressure, truly pure, deep and stable love is particularly precious.

In fact, any theory of love must start from the human race itself and take into account its survival needs. In evolution, animals continue race through reproduction; for highly intelligent and self-aware humans, it requires a more complex and deep exploration of ways to eliminate loneliness and engage with others. Therefore, before we look for a truly happy love, we need to understand ourselves and the impact of our environment on us. Only when we can clearly understand where we are and learn how to deal with internal conflicts can we be able to face external challenges. At the same time, when seeking love, you should constantly improve yourself and learn how to get along, communicate and tolerate each other's shortcomings. Only in this way can we maintain a long-term and stable relationship in a state that two people like each other or have come together but still have problems or friction or even differences.

In short, the theory of love tells us that love is not only an instinctive reaction, but also an art, which needs to be experienced, learned and practiced by heart. Only through continuous efforts to pursue perfection can we finally embrace the happiness that truly belongs to love.

2.2. The Practice of love

"The paper comes zhongjue shallow, must know this matter to practice" is a famous ancient Chinese poet Lu You a philosophical poem. Just as Fromm in this book first discussed the theory of love and then told us about the practice of love. We all know that theory needs to be combined with practice, because only in practice can we truly understand the
