The compiled essays offer various themes and ways of approaching historiography Each chapter probes the state of contemporary theorization of architecture histories working toward the theme of critically re writing history Essential to each author s contribution are specific traditions created by the mole of history burrowing through the past This book concerns the historian s conjectures towards capturing the past and present zeitgeist Temporality is the theme running through the narrative of this volume It raises the question of whether the ever growing body of work on architectural history should be considered as history More specifically what is the intersection between history and architectural history Furthermore can every text focused on architecture s past be considered categorically historiographic In what capacity does architectural history index history beyond contingencies and without reducing the text to empirical realities and the historian s interest in a specific subject including those collected through archival research itself an emblem of textuality This book upholds the conviction that the past should be recalled accurately and that there is no history but historical criticism the scope of which exceeds the historicity of Humanism Dialectically the timeline experienced across contemporary techno economic and cultural domains aesthetics offers an opportunity to explore architecture produced outside the Euro American continents Valences of Historiography offers a fresh take on architectural history that is useful for academics researchers and architecture students The Bulldozer in the Countryside Adam Rome, 2001-04-23 The concern today about suburban sprawl is not new In the decades after World War II the spread of tract house construction changed the nature of millions of acres of land and a variety of Americans began to protest against the environmental costs of suburban development By the mid 1960s indeed many of the critics were attempting to institutionalize an urban land ethic The Bulldozer in the Countryside was the first scholarly work to analyze the successes and failures of the varied efforts to address the environmental consequences of suburban growth from 1945 to 1970 For scholars and students of American history the book offers a compelling insight into two of the great stories of modern times the mass migration to the suburbs and the rise of the environmental movement The book also offers a valuable historical perspective for participants in contemporary debates about the alternatives to sprawl **From Sea to Shining Sea** United States. President's Council on Recreation and Natural Beauty, 1968 **Sorting Out the New South City** Tom Hanchett, 2017-10-06 One of the largest and fastest growing cities

in the South Charlotte North Carolina came of age in the New South decades of the late nineteenth and early twentieth centuries transforming itself from a rural courthouse village to the trading and financial hub of America's premier textile manufacturing region In this book Thomas Hanchett traces the city's spatial evolution over the course of a century exploring the interplay of national trends and local forces that shaped Charlotte and by extension other New South urban centers Hanchett argues that racial and economic segregation are not age old givens but products of a decades long process Well after the Civil War Charlotte's whites and blacks workers and business owners all lived intermingled in a salt and pepper pattern The rise of large manufacturing enterprises in the 1880s and 1890s brought social and political upheaval however and the city began to sort out into a checkerboard of distinct neighborhoods segregated by both race and class When urban renewal and other federal funds became available in the mid twentieth century local leaders used the money to complete the sorting out process creating a sector pattern in which wealthy whites increasingly lived on one side of town and blacks on the other

Landscape Modernism Renounced David Jacques, Jan Woudstra, 2012-09-10 Before the Second World War landscape architect Christopher Tunnard was the first author on Modernism in Landscape in the English language but later became alarmed by the destructive forces of Post war reconstruction Between the 1950s and the 1970s he was in the forefront of the movement to save the city becoming an acclaimed author sympathetic to preservation Ironically it was the Modernist ethos that he had so fervently advocated before the war that was the justification for the dismemberment of great cities by officials engineers and planners This was not the first time that Tunnard had to re evaluate his principles as he had done so in the 1930s in rejecting Arts and Crafts in favour of Modernism This book tracks his changing ideology by reference to his writings his colleagues and his work Christopher Tunnard is one of the most influential figures in Landscape Architecture and his journey is one that still resonates in the discipline today His leading role in first embracing the tenets of Modernism and then moving away from to embrace a more conservationist approach can be seen in the success and impact on the profession of those with whom he worked and taught

Organization Space Keller Easterling, 2001-08-24 Bridging the gap between architecture and infrastructure Easterling views architecture as part of an ecology of interrelationships and linkages and she treats the expression of organizational character as part of the architectural endeavor The dominant

architectures in our culture of development consist of generic protocols for building offices airports houses and highways For Keller Easterling these organizational formats are not merely the context of design efforts they are the design Bridging the gap between architecture and infrastructure Easterling views architecture as part of an ecology of interrelationships and linkages and she treats the expression of organizational character as part of the architectural endeavor Easterling also makes the case that these organizational formats are improvisational and responsive to circumstantial change to mistakes anomalies and seemingly illogical market forces By treating these irregularities opportunistically she offers architects working within the customary development protocols new sites for making and altering space By showing the reciprocal relations between systems of thinking and modes of designing Easterling establishes unexpected congruencies between natural and built environments virtual and physical systems highway and communication networks and corporate and spatial organizations She frames her unconventional notion of site not in terms of singular entities but in terms of relationships between multiple sites that are both individually and collectively adjustable

Bibliography on Housing, Building and Planning for the Use of Overseas Missions of the United States Agency for International Development United States. Housing and

Home Finance Agency,1964 The Last Landscape William H. Whyte,2012-10-23 The remaining corner of an old farm unclaimed by developers The brook squeezed between housing plans Abandoned railroad lines The stand of woods along an expanded highway These are the outposts of what was once a larger pattern of forests and farms the last landscape According to William H Whyte the place to work out the problems of our metropolitan areas is within those areas not outside them The age of unchecked expansion without consequence is over but where there is waste and neglect there is opportunity Our cities and suburbs are not jammed they just look that way There are in fact plenty of ways to use this existing space to the benefit of the community and The Last Landscape provides a practical and timeless framework for making informed decisions about its use Called the best study available on the problems of open space by the New York Times when it first appeared in 1968 The Last Landscape introduced many cornerstone ideas for land conservation urging all of us to make better use of the land that has survived amid suburban sprawl Whyte s pioneering work on easements led to the passage of major open space statutes in many states and his argument for using and linking green spaces however small the areas may be is a recommendation that has more currency today than ever before

Urban Policy in Twentieth-century America Arnold Richard Hirsch,Raymond A. Mohl,1993 The recent riots in Los Angeles brought the urban crisis back to the center of public policy debates in Washington D C and in urban areas throughout the United States The contributors to this volume examine the major policy issues race housing transportation poverty the changing environment the effects of the global economy confronting contemporary American cities Raymond A Mohl begins with an extended discussion of the origins evolution and current state of Federal involvement in urban centers Michael B Katz follows with an insightful look at poverty in turn of the century New York and the attempts to ameliorate the desperate plight of the poor during this period of rapid

economic growth Arnold R Hirsch Mohl and David R Goldfield then pursue different facets of the racial dilemma confronting American cities Hirsch discusses historical dimensions of residential segregation and public policy while Mohl uses Overtown Miami as a case study of the social impact of the construction of interstate highways in urban communities David Goldfield explores the political ramifications and incongruities of contemporary urban race relations Finally Carl Abbott and Sam Bass Warner Jr examine the impact of global economic developments and the environmental implications of past policy choices Collectively the authors show us where we have been some of the needs that must be addressed and the urban policy alternatives we face *Visual Impact Assessment for Highway Projects* ,1981
