Man The Tool Maker British Museum:

Man the Tool-maker British Museum (Natural History). Dept. of Geology, Kenneth Page Oakley, 1949 *Man the Tool-maker* Kenneth Page Oakley, 1961 *Man the Toolmaker* Kenneth Page Oakley, 1949 Man, the Tool-maker Kenneth Page Oakley, 1972 Man the Tool-maker 1960 Kenneth P. Oakley, 1949 **The Invention of Prehistory** Stefanos Geroulanos, 2024-04-02

A incisive and captivating reassessment of prehistory. In lucid prose Geroulanos unspools an enthralling and detailed history of the development of modern natural science. It's a must read. Publishers Weekly starred review. An astute, powerfully rendered history of humanity. Kirkus Reviews starred review. An eminent historian tells the story of how we came to obsess over the origins of humanity and how for three centuries ideas of prehistory have been used to justify devastating violence against others. Books about the origins of humanity dominate bestseller lists while national newspapers present breathless accounts of new archaeological findings and speculate about what those findings tell us about our earliest ancestors. We are obsessed with prehistory and in this respect our current era is no different from any other in the last three hundred years. In this coruscating work acclaimed historian Stefanos Geroulanos demonstrates how claims about the earliest humans not only shaped Western intellectual culture but gave rise to our modern world. The very idea that there was a human past before recorded history only emerged with the Enlightenment when European thinkers began to reject faith-based notions of humanity and history in favor of supposedly more empirical ideas about the world. From the state of nature and Romantic notions of virtuous German barbarians to theories about Neanderthals, killer apes, and a matriarchal paradise where women ruled, Geroulanos captures the sheer variety and strangeness of the ideas that animated many of the major thinkers of the eighteenth and nineteenth centuries, including Jean-Jacques Rousseau, Charles Darwin, and Karl Marx. Yet as Geroulanos shows, such ideas became for the most part the ideological foundations of repressive regimes and globe-spanning empires. Deeming other peoples savages allowed for guilt-free violence against them; notions of killer apes who were our evolutionary predecessors made war seem natural. The emergence of modern science only accelerated the West's imperialism. The Nazi obsession with race was rooted in archaeological claims about prehistoric Indo-Germans; the idea that colonized peoples could be bombed back to the Stone Age was made possible by the technology of flight and the anthropological idea that civilization advanced in stages. As Geroulanos argues, accounts of prehistory tell us more about the moment when they are proposed than about the deep past, and if we hope to start improving our future, we would be better off setting aside the search for how it all started. A necessary, timely, indelible account of how the quest for understanding the origins of humanity became the handmaiden of war and empire. *The Invention of Prehistory* will forever change how we think about the deep past.

Limiting Outer Space Alexander C.T. Geppert, 2018-04-18 Limiting Outer Space propels the historicization of outer space by focusing on the Post Apollo period After the moon landings disillusionment set in Outer space no longer considered the inevitable destination of human expansion lost much of its popular appeal cultural significance and political urgency With the rapid waning of the worldwide Apollo frenzy the optimism of the Space Age gave way to an era of space fatigue and planetized limits Bringing together the history of European astroculture and American Soviet spaceflight with scholarship on the 1970s this cutting edge volume examines the reconfiguration of space imaginaries from a multiplicity of disciplinary perspectives Rather than invoking oft repeated narratives of Cold War rivalry and an escalating Space Race Limiting Outer Space breaks new ground by exploring a hitherto underrated and understudied decade the Post Apollo period

Evolution and Social Life Tim Ingold, 2016-07-07 Evolution is among the most central and most contested of ideas in the history of anthropology This book charts the fortunes of the idea from the mid nineteenth century to recent times By comparing biological historical and anthropological approaches to the study of human culture and social life it lays the foundation for their effective synthesis Far ahead of its time when first published the book anticipates debates at the forefront of contemporary thinking Revisiting the work after almost thirty years Tim Ingold offers a substantial new preface that describes how the book came to be written how it was received and its bearing on later developments Unique in
