Thompson, John J. DiIulio, 1998-06-01 How much responsibility for providing health care to the poor should be devolved from the federal government to the states Any answer to this critical policy question requires a careful assessment of the Medicaid program Drawing on the insights of leading scholars and top state health care officials this volume analyzes the policy and management implications of various options for Medicaid devolution Proponents of devolution typically express confidence that states can meet the challenges it will pose for them But as this book shows the degree to which states have the capacity and commitment to use enhanced discretion to sustain or improve health care for the poor remains an open question Their failure to attend to issues of politics implementation and management could lead to disappointment Chapters focus on such topics as Medicaid financing benefits and beneficiaries long term care managed care safety net providers and the appropriate division of labor between the federal government and the states The contributors are Donald Boyd Center for the Study of the States Lawrence D Brown Columbia University James R Fossett Rockefeller College Richard P Nathan Nelson A Rockefeller Institute of Government State University of New York Albany Michael Sparer Columbia University James Tallon United Hospital Fund and Joshua M Weiner the Urban Institute **Health Care Financing Review** , 2005 Managed Care and Public Health Paul K. Changing Welfare Rachel A. Gordon, Herbert J. Walberg, 2012-12-06 Changing Welfare is concerned with the sweeping changes that took place in public assistance programs at the end of the 20th century and the way in which the original and reformed versions of these programs relate to the well being of children and their families The authors critically review the original conceptualizations and the new directions of programs offering cash assistance food assistance health insurance and child protection services to low income and disabled children and their families thus changes in the welfare programs themselves And throughout their concern is with whether and how these programs alter the opportunities for the development of the children targeted by these programs thus changes in the welfare of children and their families The objective of each chapter of the book is to rigorously highlight key theoretical and research issues including the identification of major empirical findings and unanswered questions Wherever relevant the chapters connect theory and research to policy and practice pointing to recommendations and challenges for the future including alternative approaches for research policy and practice

Changing Health Care Systems and Rheumatic Disease Institute of Medicine, Committee on Changing Health Care Systems and Rheumatic Disease, 1997-01-09 Market forces are driving a radical restructuring of health care delivery in the United States At the same time more and more people are living comparatively long lives with a variety of severe chronic health conditions Many such people are concerned about the trend toward the creation of managed care systems because their need for frequent often complex medical services conflicts with managed care s desires to contain costs The fear is that people with serious chronic disorders will be excluded from or underserved by the integrated health care delivery networks now emerging Responding to a request from the National Institute of Arthritis and Musculoskeletal and Skin Diseases this book reflects the results of a workshop that focused on the following questions Does the model of managed care or an integrated delivery system influence the types of interventions provided to patients with chronic conditions and the clinical

and health status outcomes resulting from those interventions If so are these effects quantitatively and clinically significant as compared to the effects that other variables e g income education ethnicity have on patient outcomes If the type of health care delivery system appears to be related to patient care and outcomes can specific organizational financial or other variables be identified that account for the relationships If not what type of research should be pursued to provide the information needed about the relationship between types of health care systems and the processes and outcomes of care provided to people with serious chronic conditions

*Managed Behavioral Health Care: Current Realities and Future Potential* David Mechanic, 1998-07-14 Discussions of managed care are dominated by emotion and rhetoric and failure to differentiate among the varying structures approaches and strategies that are called managed care These discussions rarely take account of the complexity of the arena or the failures of mental health systems prior to the introduction of managed care If we are to shape managed care constructively we first need clear understanding of how it is structured how it functions and when it performs well and poorly This should help identify how practices can best be monitored evaluated and if necessary regulated This book will help readers along this path This is the 78th issue of the quarterly journal New Directions for Mental Health Services For more information on the series please see the Journals and Periodicals section

**Healthy Voices, Unhealthy Silence** Colleen M. Grogan, 2007-09-11 Public silence in policymaking

can be deafening When advocates for a disadvantaged group decline to speak up not only are their concerns not recorded or acted upon but also the collective strength of the unspoken argument is lessened a situation that undermines the workings of deliberative democracy by reflecting only the concerns of more powerful interests But why do so many advocates remain silent on key issues they care about and how does that silence contribute to narrowly defined policies What can individuals and organizations do to amplify their privately expressed concerns for policy change In *Healthy Voices Unhealthy Silence* Colleen M Grogan and Michael K Gusmano address these questions through the lens of state level health care advocacy for the poor They examine how representatives for the poor participate in an advisory board process by tying together existing studies extensive interviews with key players and an in depth first hand look at the Connecticut Medicaid advisory board s deliberations during the managed care debate Drawing on the concepts of deliberative democracy agenda setting and nonprofit advocacy Grogan and Gusmano reveal the reasons behind advocates often unexpected silence on major issues assess how capable nonprofits are at affecting policy debates and provide prescriptive advice for creating a participatory process that adequately addresses the health care concerns of the poor and dispossessed Though exploring specifically state level health care advocacy for the poor the lessons Grogan and Gusmano offer here are transferable across issue areas and levels of government Public policy scholars advocacy organizations government workers and students of government administration will be well served by this significant study
