Management Learning Integrating Perspectives In Theory And Practice:

Management Learning John Burgoyne, Michael Reynolds, 1997-10-28 Management Learning introduces the context and history of management learning and offers a critical framework within which the key debates can be understood. The book also provides an incisive discussion of the values and purpose inherent in the practice and theory of management learning and charts the diverse external factors influencing and directing the processes of learning. The volume concludes with a look forward towards the future reconstruction of the field.

Essential Readings in Management Learning Christopher Grey, Elena P. Antonacopoulou, 2004-10-18 This collection provides readings grouped under six key headings: organizational learning and learning organizations; individual learning; learning and new technology; critical approaches to management education; pedagogical practice; and globalization and management learning.

The Wiley Blackwell Handbook of the Psychology of Training, Development, and Performance Improvement Kurt Kraiger, Jonathan Passmore, Nuno Rebelo dos Santos, Sigmar Malvezzi, 2020-06-02 This Handbook is sure to become a key resource for any researcher or professional looking for the latest and most innovative thinking from around the world on the full range of topics related to training, development, and performance management. Bradford S. Bell, PhD, Cornell University, USA, Editor, Personnel Psychology. I wish I could have accessed this book many years ago. Comprehensive and scholarly, the four sections—training, e-learning, personal and professional development, and performance management—fit well together and address a gap in the literature that has been apparent for some time. The psychological perspective speaks to growing interest in the micro foundations of strategic success, and the blending together of both formal and informal perspectives on learning in organizations ensures a holistic rather than piecemeal approach to the question of how to build individual knowledge, skills, and competences in organizations. I believe that this book will make a significant impact on its target audience in this critical area.

Helen Shipton, Professor of International Human Resource Management, Nottingham Trent University, UK. *The Wiley Blackwell Handbook of the Psychology of Training, Development, and Performance Improvement* provides up-to-date contemporary information for researchers and professionals by reviewing the latest literature and research in the interconnected fields of training, development, and performance appraisal. It brings a psychological perspective to bear on a multidisciplinary field that links to management, human resources, and education. Unique to reference works in this area, it maintains a truly global focus on the field with top international contributors looking at research and practice from around the world, including South America, Europe, Canada, and Australia, as well as the United States and the United Kingdom. The chapters cover a diverse range of important contemporary topics such as needs analysis, job design, active learning, self-regulation, simulation, approaches to 360-degree feedback, and virtual learning environments. Together, they offer researchers and professionals essential information for building a talented organization, a critical and challenging task for organizational success in the twenty-first century.

The SAGE Handbook of Management Learning, Education and Development Steven J. Armstrong, Cynthia V.

Rethinking Strategic Learning Russ Vince, 2004-04-22 Russ Vince examines learning as both a social and a strategic

process invariably linked to emotions and politics that are mobilized by attempts at learning and organizing. He makes a substantial contribution to theories of organizational learning and develops new ideas about critical reflection and collective leadership. The author outlines a critical perspective on HRD, arguing that staff responsible for learning and change in organizations have put too much effort into the development of individuals and not enough into understanding and engaging with organizational dynamics that limit and shape individuals' opportunities and abilities to learn and change. HRD is explained as an intervention within a political system and practice of management and leadership with all the difficulties and contradictions that attempting to manage and to lead are likely to contain and reveal. This means that the focus of HRD is on action on developing the capacity to act on generating credibility through action and on influencing and working with others in situations loaded with emotion and politics.

Postcolonial Theory and Organizational Analysis: A Critical Engagement A. Prasad, 2003-05-01. This book takes up a question that has rarely been raised in the field of management: Could modern Western colonialism have important implications for the practices and theories that inform management and organizations? Employing the frameworks of postcolonial theory, an international group of scholars addresses this question and offer remarkable insights about the implications of the colonial encounter for management. Wide ranging in scope, the book covers major topics like cross cultural management, control and resistance, corporate culture, the discourse of exoticization in museums and tourism, and stakeholder issues, and sheds new light on the troubling legacy of colonialism. Scholars and practitioners searching for a new idiom of management will find this book's critique of contemporary management invaluable.

Business Driven Action Learning Y. Boshyk, 2016-01-13. Many global companies have been focused upon strategic executive development within a competitive environment. Often this has resulted in complex theoretical models which have had little or no practical application or impact. Leading edge companies worldwide have established best practice in this area. This book shows how action learning can result in the effective and successful implementation of strategic executive development.
