*Economic Policy-Making by Local Authorities in Britain and Western Germany* Nevil Johnson, Allan Cochrane, 2017-06-14 Originally published in 1981 but now with a new preface this volume provided the first detailed comparative analysis of how local authorities in the UK and W Germany faced up to the challenge of trying to help local industry and improve employment prospects Based on the results of case studies the book considers the powers and resources available to local authorities and examines how the authorities are organized for this type of economic activity The authors analysis of the interplay of political and administrative factors will be particularly important for student and professionals in comparative public policy and public finance The study shows how economic policy making in local government is constrained both by the higher levels of government in both countries and by the conditions in the economy operating both locally and nationally

*The Reorganisation of British Local Government* John Dearlove, 1979-09-20 This volume was first published in 1979 just a few years after the Local Government Act of 1972 redrew the map of British local government Local authorities were also encouraged to change their organization and methods of work anxiety was expressed about finance councillor calibre and the credibility of the whole system itself and neighbourhood councils and public participation in planning were introduced John Dearlove s aim is to make sense of these changes and the discussion they generated He does this by showing that both the official case for reorganization and the academic discussion of it have hindered their own understanding by uncritically accepting superficial traditional wisdoms which fail to reveal the concealed ideological positions behind reorganization Thus he aims to develop a truly political perspective on reorganisation which is rounded out and given greater depth by the insertion at appropriate points of comparative material drawn from American experience and studies
