The Multinational Enterprise and Legal Control Cynthia Day Wallace, 2002-04-02 This long awaited new book from Cynthia Day Wallace picks up the thread of her best selling Legal Control of the Multinational Enterprise National Regulatory Techniques and the Prospects for International Controls In the present work she applies herself to legal and pragmatic aspects of control surrounding MNE operations The primary focus is on legal and administrative techniques and measures practised by host states to control transparently or less so foreign MNE activity within their territories or even extraterritorially when effects

are felt within national boundaries. The primary geographic focus is the six most investment intensive industrialized states namely Canada, France, Germany, Japan, the United States, and the United Kingdom. At the same time, an important message of the present study is precisely the implication for the developing countries as well as for the emerging market economies of central and eastern Europe and even Asian nations besides Japan because it is the sharing of this very experience of years that can best serve to facilitate a fuller participation on the part of the up and coming economies in the same global market place.

Making Sustainability Work Marc J. Epstein, Adriana Rejc Buhovac, 2014-04-02. Most companies today have some

commitment to corporate social responsibility but implementing these initiatives can be particularly challenging. While a lot has been written on ethical and strategic factors, there is still a dearth of information on the practical nuts and bolts. And whereas with most other organizational initiatives the sole objective is improved financial performance, sustainability broadens the focus to include social and environmental performance, which is much more difficult to measure. Now updated throughout with new examples and new research, this is a complete guide to implementing and measuring the effectiveness of sustainability initiatives. It draws on Marc Epstein's and new coauthor Adriana Rejc Buhovac's solid academic foundation and extensive consulting work and includes best practices from dozens of companies in Europe, Asia, North America, South America, Australia, and Africa. This is the ultimate how-to guide for corporate leaders, strategists, academics, sustainability consultants, and anyone else with an interest in actually putting sustainability ideas into practice and making sure they accomplish their goals.
