**Managers Not Owners** William B. Girao,1988      *An Investigation Into Christian Sme Owner-Managers'*

*Conceptualisations of Practice* Andrea Werner,2008 This study investigates how Christianity impacts on the way owner managers of small to medium sized enterprises SMEs conceptualise their worlds of business practice The context for the research is the more general issue of how civil society and its institutions influence economic activity and how they might provide a counterbalance to the potentially negative impacts of unrestrained self interested economic behaviour The study is based on qualitative interviews with SME owner managers in Germany and the U K who regard themselves as practising Christians Using a socio psychological approach the data analysis yielded a range of linguistic and conceptual resources that are peculiar to Christian discourse and that have the potential to influence business activity in rather distinctive ways This book outlines the effects that these Christian resources can have on these owner managers and how they may be linked to specific business practices Attention is drawn to the fact that Christian conceptual resources can be interpreted and exploited in different ways which leads to differences in how Christian owner managers apply their faith to their business Furthermore the study maps out the often interacting influence of other discursive contexts and resources The specific influence of the SME context will be discussed and some differences with regards to the two national contexts in which the research was conducted will be highlighted The book also addresses how the socio psychological approach that was chosen for this study may be used for investigations into the impact of other civil society contexts      Seize the Day with Yahweh Jim
