Information Technology and Organizations : Strategies, Networks, and Integration Brian P. Bloomfield, Rod

Coombs, David Knights, Dale Littler, 1997-03-27 This book is concerned with the ways in which organizations design build and use information technology systems In particular it looks at the interaction between these IT centred activities and the broader management processes within organizations The authors adopt a critical social science perspective on these issues and are primarily concerned with advancing theoretical debates on how best to understand the related processes of technological and organizational change To this end the book examines and deploys recent work on power knowledge actor network theory and critical organization theory The result is an account of the nature and significance of information systems in organizations which is an alternative perspective to pragmatic and recipe based approaches to this topic which dominate much contemporary management literature on IT *Creative Technological Change* Ian Mccloughlin, 2002-03-11 Creative

Technological Change draws upon a wide range of thinking from organisational theory innovation studies and the sociology of technology It explores the different ways in which these questions have been framed and answered especially in relation to new virtual technologies The idea of metaphor is used to capture the differences between and strengths and weaknesses of various ways of conceptualising the technology organisation relationship This approach offers the possibility of developing new ways of thinking about viewing and ultimately responding creatively to the organisational challenges posed by technological change Developments in Global Optimization Immanuel Bomze, Tibor Csendes, R. Horst, Panos M.

Pardalos, 1997-01-31 In recent years global optimization has found applications in many interesting areas of science and technology including molecular biology chemical equilibrium problems medical imaging and networks The collection of papers in this book indicates the diverse applicability of global optimization Furthermore various algorithmic theoretical developments and computational studies are presented Audience All researchers and students working in mathematical programming **Culture and Economy After the Cultural Turn** Larry Ray, Andrew Sayer, 1999-10-28 Traditionally social

science treated culture as a peripheral issue but the last twenty years have witnessed a cultural turn throughout the social sciences Culture is now at the core of debate Culture and Economy After the Cultural Turn examines the impact of the cultural turn for the social sciences in relation to the decline of interest in economic aspects of society It presents a number of responses to the changing relationship between culture and economy and to the way in which the cultural turn has sought to understand it Contributors from a wide range of disciplines present differing views on these matters in relation to issues of political sensibilities and movements equality and recognition cultural manageme **Women, Work and**

Computerization A. Frances Grundy, 1997-05-20 This volume considers the submissions to the 6th International IFIP TC 9 WG 9.1 Conference on Women Work and Computerization WWC 97. The conference provides an interdisciplinary forum for researchers, practitioners and users in the field of information technology. In this book the authors discuss how different areas of society are being transformed by computer technology but with particular emphasis on changes in women's work and life and how these have come about. Such transformations include the transitions from women's traditional work to work based on modern technology from communicating within personal communities to communicating within virtual communities from traditional job gendering to new perspectives on who does what. *Social Thinking--software Practice* Yvonne Dittrich, Christiane Floyd, Ralf Klischewski, 2002 A collection of essays on the interrelationship of social science and software practice. Software practice which includes software development design and use needs to go beyond the traditional engineering framework. Drawing on a variety of social theory approaches this book focuses on interdisciplinary cooperation in software practice. The topics discussed include the facilitation of collaborative software development communication between developers and users and the embedding of software systems in organizations. **Outsourcing Global Services I.** Oshri, J. Kotlarsky, L. Willcocks, 2008-07-03 This book provides in depth insights into the practices that lead to success in outsourcing global services. Written by internationally acclaimed academics it covers best practices on IT outsourcing, business process outsourcing and netsourcing. This book is a must read for any practitioner, academic or student concerned with global sourcing. **Enacting Research Methods in Information Systems: Volume 1** Leslie P. Willcocks, Chris Sauer, Mary C. Lacity, 2016-05-30 This edited three volume edition brings together significant papers previously published in the Journal of Information Technology (JIT) over its 30 year publication history. The three volumes of *Enacting Research Methods in Information Systems* celebrate the methodological pluralism used to advance our understanding of information technology's role in the world today. In addition to quantitative methods from the positivist tradition, JIT also values methodological articles from critical research perspectives, interpretive traditions, historical perspectives, grounded theory and action research and design science approaches. Volume 1 covers Critical Research, Grounded Theory and Historical Approaches. Volume 2 deals with Interpretive Approaches and also explores Action Research. Volume 3 focuses on Design Science Approaches and discusses Alternative Approaches including Semiotics, Research Complexity, Theory and Gender in IS Research. The Journal of Information Technology (JIT) was started in 1986 by Professors Frank Land and Igor Aleksander with the aim of bringing technology and management together and bridging the great divide between the two disciplines. The Journal was created with the vision of making the impact of complex interactions and developments in technology more accessible to a wider audience. Retaining this initial focus, the JIT has gone on to extend into new and innovative areas of research such as the launch of JITTIC in 2010. A high impact journal, JIT shall continue to publish leading trends based on significant research in the field. Knowing Capitalism Nigel Thrift, 2005-01-26 This is an ambitious original and complex

treatment of key aspects of contemporary capitalism It makes a major contribution because it profoundly destabilizes the scholarship on globalization the so called new economy information technology distinct contemporary business cultures and practices Saskia Sassen author of *Globalization and its Discontents* Nigel Thrift offers us the sort of cultural analysis of global capitalism that has long been needed one that emphasizes the innovative energy of global capitalism The book avoids stale denouncements and offers instead a view of capitalism as a form of practice Karin Knorr Cetina Professor of Sociology University of Konstanz Germany Capitalism is well known for producing a form of existence where everything solid melts into air But what happens when capitalism develops theories about itself Are we moving into a condition in which capitalism can be said to possess a brain These questions are pursued in this sparkling and thought provoking book Thrift looks at what he calls the cultural circuit of capitalism the mechanism for generating new theories of capitalism The book traces the rise of this circuit back to the 1960s when a series of institutions locked together to interrogate capitalism to the present day when these institutions are moving out to the Pacific basin and beyond What have these theories produced How have they been implicated in the speculative bubbles that characterized the late twentieth century What part have they played in developing our understanding of human relations Building on an inter disciplinary approach which embraces the core social sciences Thrift outlines an exciting new theory for understanding capitalism His book is of interest to readers in geography social theory anthropology and cultural economics

Technological Change and Organizational Action Juha Laurila, David Preece, 2003-09-02 In recent decades an extensive array of changes and innovations have taken place in and across work organizations and networks of organizations and workers facilitated by new technologies and technological forms This has initiated an interest in technological change as one of the conditions for organizational action and researchers have begun to draw inspiration from a wider spectrum of conceptual issues perspectives and theoretical traditions This book is interested in the level of praxis and how this might be understood and theorized It brings together a comprehensive collection of empirically grounded and theoretically informed research projects from studies of organizational practice which explore a number of technological changes in a variety of contexts These are informed by contemporary debates within and across theoretical approaches including the sociology of technology work and organizations actor network theory technology as text and metaphor processual and political perspectives social and business network based approaches to the analysis of technology and innovation and the social construction and shaping of technology This book will be essential reading for researchers and advanced students within the field of technology work and organizations and also organization studies and management studies
