Managers Guide To Expert Systems Using Guru:

Manager's Guide to Expert Systems Using Guru C. W. Holsapple, Andrew B. Whinston, 1986 Discusses the potential business applications of expert systems and describes the Guru Artificial Intelligence environment program **Guide for the Management of Expert Systems Development** Rand Corporation, 1989 This report was prepared to assist managers in the risk managed application of expert systems ES technology Two problems that have frustrated managers and technicians who might otherwise be interested in exploring ES solutions are the seeming lack of a software engineering discipline for creating and maintaining expert systems and the fact that the software development risks associated with expert systems have not been clearly addressed This guide focuses on ES development as a software engineering endeavor and emphasizes that as such it should be subject to much the same discipline as conventional automated information system software The guide is meant to be used in conjunction with accepted software development methods and standards such as Department of Defense DOD Standards 2167A and 7935 1 DOD Directive 7920 1 DOD Instruction 7920 2 and the OSD Major Automated System Review Council MAISRC Guidelines for Program Managers This document presents a step by step guideline that addresses the managerial and technical risks of each phase in the software development life cycle of systems that contain ES components *Expert Systems and Related Topics* Marlene A. Palmer, 1990-01-01 This comprehensive reference to all areas of expert systems and applications plus advanced related topics lets you spend your time reading expert systems literature rather than searching for it It gives you a source of historical perspectives and outlooks on the future of the field Whether you are a manager a developer or an end user or researcher *Expert Systems and Related Topics Selected Bibliography Guide to Information Sources* puts all the sources of expert systems literature at your fingertips

Organization and Decision Theory Ira Horowitz, 2012-12-06 Ira Horowitz Depending upon one's perspective the need to choose among alternatives can be an unwelcome but unavoidable responsibility an exciting and challenging opportunity a run of the mill activity that one performs seemingly without thinking very much about it or perhaps something in between Your most recent selections from a restaurant menu from a set of jobs or job candidates or from a rent or buy or sell or lease option are cases in point Oftentimes we are involved in group decision processes such as the choice of a president wherein one group member's unwelcome responsibility is another's exciting opportunity Many of us that voted in the presidential elections of both 1956 and 1984 irrespective of political affiliation experienced both emotions others just pulled the lever or punched the card without thinking very much about it Arriving at either an individual or a group decision can sometimes be a time consuming torturous and traumatic process that results in a long regretted choice that could have been reached right off the bat On other occasions the just let's get it over with and get out of here solution to a long festering problem can yield rewards that are reaped for many 1 ORGANIZATION AND DECISION THEORY 2 years to come One way or another however individuals and organizations somehow manage to get the decision making job done even if they don't quite understand and

often question just how this was accomplished *Expert Systems in Reference Services* Christine Roysdon, Howard D. White, 2019-12-06 This book first published in 1989 introduces readers to expert systems applications in many areas of library and information science and presents design and implementation issues encountered by librarians who have developed early systems to address the library reference function Systems for ready reference online database access and enhancement of subject searching in online catalogues are all explored Theoretical issues related to expert systems are balanced with descriptions of actual systems currently operating or under development Reference librarians interested in computing and automation library managers and administrators as well as teachers and students in library schools will be fascinated by this account of how expert systems are helping to make the expertise of the reference librarian available in a more consistent and timely fashion and reduce the burden of repetitive predictable questions for the professional
