Managers Managing The Workings Of An Administrative System:

Managers Managing Jane Hannaway, 1989-03-23 Managers face a complex and seemingly overwhelming set of decisions in their work lives Investigating exactly what managers do on the job this study presents a wealth of new evidence to analyze why managers act in the ways they do what influences their focus of attention and which issues and other actors in an organization they tend to find attractive and which they tend to avoid In short it describes how managers in the real world make decisions

The Work of Managers Stefan Tengblad, 2012-02-16 Managers are significant actors in contemporary organizations and yet there is very little deep level analysis of what managers do and how they understand their managerial selves and social situations Instead of evaluating management techniques according to their internal logic and systematic qualities this book advances the practice perspective using behaviour and activities of successful experienced and skilled managers as the primary data for theorizing good management In this book academics review classic literature on managerial work discuss methodological and theoretical approaches and present empirical studies on various kinds of managers at different levels of organizations in different roles and different sectors from construction site managers and CEOs of large companies to university vice chancellors and front line health care managers It makes the case for studies of managerial work that look beyond the rational and ordered world to the challenges presented by inter alia work and information overload complexity performance pressures unintended consequences and irreconcilable expectations

Managerial Work Rosemary Stewart, 2019-06-04 First published in 1998 readers of this volume will get a good overview of research into managerial work They will learn about what the researchers have studied what methods have been used and the criticisms of the limitations of individual methods the different concepts that have been developed what has been learnt about managerial work and behaviour from these studies over the years how this field of study has developed the main criticisms made of the research suggestions for future research and future developments Studies of managerial work have a long history the first major work was by Sune Carlson in Sweden in 1951 and studies have continued to the present day mainly in the USA and the UK The early studies sought to find out what managers actually did as distinct from the generalized theories of the nature of managerial work They were part of the new interest of social scientists in finding out what actually happened in organizations in opposition to the general theories that prevailed then Articles cannot give a complete picture of the field studies that have been such a notable feature of this branch of research because Carlson's study like many of the later ones was published only as a book However they provide all the information that students and researchers need to understand the aim methods and approaches used by researchers so far and a good guide to the varied possibilities for developing this area of study

Working through Surveillance and Technical Communication Sarah Young,2023-04-01 What is surveillance and why should we care Why are those who use technology susceptible to being both agents and targets of contemporary surveillance practices Working Through Surveillance and Technical Communication addresses these questions discussing what it means to engage in surveillance examining why this participation may be problematic and offering entry points into assessing one s ethical and socially just involvement with surveillance Further the book suggests ways to resist both individually and collectively and it offers pedagogical entry points for those looking to talk about surveillance with others Led by the central questions How are technical communicators also surveillance workers and Why does this matter for technical communication and surveillance scholarship the text uses the example of Edward Snowden to illustrate how technical communicators and surveillance workers exist on an often overlapping range Sarah Young highlights the potentially discriminatory nature of surveillance and argues that recognizing and evaluating surveillance in is increasingly

important in a data driven world Open Access funded by Erasmus University Rotterdam Library in support of open science initiatives It can be found in the SUNY Open Access Repository at a href <https://soar.suny.edu/handle/20500/126488546> Leadership Expectations Gene Early,2008-09-01 Leadership Expectations is an in depth study of expectations and how one leader creates and uses them to shape a university its culture and its success This research operates on the underlying assumption that the organization is an expression of the leader and the people he or she attracts As the personal interpersonal and organizational agendas a leader carries in their mind and enacts in their behavior are understood the organization can be understood Concurrently at least one major means of organizational transformation emerges executive development The result their personal development and or lack of it drives organizational performance The cost their self sacrifices energize the values they most deeply hold for themselves others and the university they lead The reward truth revealed about themselves others and their organization lives touched and transformed including their own and organizational capacity for good increased *Quality in Higher Education* Brent D. Ruben,2018-04-24 The concept of quality in higher education is by no means a new one By one set of definitions or another colleges and universities throughout the world have always held the pursuit of excellence as their primary goal Why then has the quality approach developed and popularized in industry and how increasingly applied in health care and government receiving so much attention in higher education at this moment What does this perspective add to the approaches to excellence with which they have long embraced These are the two primary questions that this book seeks to address Chapters and contributors include The New Productivity by Peter F Drucker World War n and the Quality Movement by J M Juran The Quality Approach to Higher Education Context of Concepts for Change by Brent Ruben The Big Questions in Higher Education Today by L Edwin Coate An American Approach to Quality by Marilyn R Zuckerman and Lewis J Hatala Quality in Higher Education Critical Issues in Definition and Assessment by Brent Ruben and Ten Areas for Future Research in Total Quality Management by A Blanton Godfrey The volume is graced with an opening essay by Francis L Lawrence president of Rutgers University Higher education is in the public spotlight today due to the many challenges it now faces rising tuition costs frustration about a tight job market for graduates calls for increased faculty productivity concerns about political correctness and criticisms regarding the use of grant and research funds among others *Quality in Higher Education* is a particularly timely book that will greatly benefit educators university administrators students and sociologists and all those who are interested in higher education today **Evidence and Public Good in Educational Policy, Research and Practice** Mustafa Yunus Eryaman,Barbara Schneider,2017-06-22 This volume draws together interdisciplinary approaches from political philosophy social work medicine and sociology to analyze the theoretical foundations and practical examples of evidence based and evidence informed education for the public good It presents a range of conceptions of the evidence based and evidence informed education and a justification for why the particular examples or issues chosen fit within that conception for the sake of public

good It explores the current literature on evidence based and evidence informed educational policy research and practice and introduces a new term evidence free meaning actions of some policymakers who disregard or misuse evidence for their own agenda The demands about the quality and relevance of educational research to inform the policy and practice have been growing over the past decade in response to the Evidence Based Education movement However the literature is yet to tackle the question of the interrelationships between evidence research policy and practice in education for the public good in an international context This book fills that gap *Intellectual Teamwork* Jolene Galegher, Robert E. Kraut, Carmen Egidio, 2014-01-14 This book seeks to establish an interdisciplinary applied social scientific model for researchers and students that advocates a cooperative effort between machines and people After showing that basic research on social processes offers much needed guidance for those creating technology and designing tools for group work its papers demonstrate the mutual relevance of social science and information system design and encourage better integration of these disciplines This comprehensive collection closely examines the variety of electronic tools being deployed to solve traditional problems in communication and coordination Unfortunately research shows that these tools have not been as successful as their designers had envisioned partially because they were not always produced with the needs and goals of their human users in mind The editors goal is to entice more social scientists to orient their research around questions of practical interest to information system designers and to convince designers to search for the knowledge about social and organizational behavior that would make their tools more useful
