

An archaeological excavation site in an urban environment. In the foreground, there are several tiers of rough-hewn stone walls. To the right, two men are working: one in a blue patterned shirt stands looking towards the excavation, while another in a grey shirt is kneeling and using a yellow surveying instrument. In the background, a wooden safety fence separates the site from a modern brick building with large windows. Several people are visible behind the fence, observing the work. The ground is dirt and sand, with some green hoses and construction materials scattered around.

This book presents a survey by specialists from the US Canada and several European countries on how this is done what the principles are and also the priorities It will be useful for anyone interested in archaeological resource management
