Myres Smith McDougal Appreciations Of An Extraordinary Man:

Myres Smith McDougal ,1999 **Human Flourishing: The End of Law** W. Michael Reisman,Roza Pati,2023-10-09

This rich volume is an homage to the significant impact Professor Siegfried Wiessner has had on scholarship and practice in many areas of international and domestic law. Reflecting the depth and breadth of his writings it is a collection of thought provoking original essays exploring topics as diverse as theory about law human rights the rights of indigenous peoples the rule of law constitutional law the rights of migrants international investment law and arbitration space law the use of force and many more all integrated by the problem and policy oriented framework of what has come to be known as the New Haven School. Its title *Human Flourishing: The End of Law* reflects the conviction that the purpose of law ought to be to allow humans to achieve their full potential to thrive and develop both materially and spiritually under the law. The volume contributes to a vision of the law as a public order in which the common interest is clarified and implemented peacefully and offers a source of inspiration for scholars and practitioners working towards such an order of human dignity.

The New Haven School Ríán Derrig,2025-01-02 The New Haven School was a school of legal theory and practice that was developed and taught at Yale Law School and named for its place of origin. At its centre stood a policy oriented jurisprudence so called for its emphasis on using law to pursue acknowledged policy aims. It was developed by Harold Lasswell and Myres McDougal in the 1940s. The New Haven School provides a comprehensive history of the School and a thorough examination of its impact on American International law in the past and today. Beginning with a review of Laswell and McDougal s biographies using previously unexploited archival materials drawn from multiple sites in New Haven New York and Chicago this book explores the contexts that shaped this body of legal theory. From rural Mississippi to interwar Europe to the American East Coast at mid century the book is a story of ideas and the people that used them. It narrates the moments places and contexts that shaped the approach that later became associated with the New Haven School exploring progressive political movements of the early twentieth century United States and Europe avant garde interwar European psychoanalytic social theory and the American tradition of philosophical pragmatism. The book contextualizes the New Haven School within the larger context of twentieth century human and social sciences. It shows how the School s style of argument a specific anti formalism and a collection of methods characterized the American practice of international law in the middle of the twentieth century and still does today. In doing so The New Haven School contributes new insights to current conversations among scholars as well as in wider public discourse about the history and future of America s approach to internationalism democracy and foreign policy.
