PayPal's founders and earliest employees are considered the technology industry's most powerful network. Since leaving PayPal, they have formed, funded, and advised the leading companies of our era, including Tesla, Facebook, YouTube, SpaceX, Yelp, Palantir, and LinkedIn, among many others. As a group, they have driven twenty-first-century innovation and entrepreneurship. Their names stir passions; they're as controversial as they are admired. Yet for all their influence, the story of where they first started has gone largely untold. Before igniting the commercial space race or jumpstarting social media's rise, they were the unknown creators of a scrappy online payments start-up called PayPal. In building what became one of the world's foremost companies, they faced bruising competition, internal strife, the emergence of widespread online fraud, and the devastating dot-com bust of the 2000s. Their success was anything but certain. In *The Founders: The Story of PayPal and the Entrepreneurs Who Shaped Silicon Valley*, award-winning author and biographer Jimmy Soni explores PayPal's turbulent early days. With hundreds of interviews and unprecedented access to thousands of pages of internal material, he shows how the seeds of so much of what shapes our world today—fast scaling, digital start-ups, cashless currency, concepts, mobile money transfer—were planted two decades ago. He also reveals the stories of countless individuals who were left out of the front-page features and banner headlines but who were central to PayPal's success. Described as an intensely magnetic chronicle, *The New York Times* and engrossing *Business Insider*, *The Founders* is a story of iteration and inventiveness, the products of which have cast a long and powerful shadow over modern life. This narrative illustrates how this rare assemblage of talent came to work together and how their collaboration changed our world forever.

Sims, 2014-01-01 *Share Don't Take the Lead* is a book that offers an alternative perspective on leadership The philosophy of shared leadership is straightforward Leadership does not derive solely from position authority or hierarchy Instead leadership is something that can be executed by anyone who has the best knowledge or skill to undertake the leadership necessary in any given situation Shared leadership is especially relevant for example in empowered teams where shared leadership can be initiated from any team member at any time depending on the needs of the moment and the capabilities of the individuals But the notion of shared leadership is also appropriate in a larger context For example an individual lower in the hierarchy can provide leadership if that person is best qualified to exercise it Shared leadership also shows how hierarchical leaders with formal authority can use empowerment to develop leadership in others This book tells the tales of how multiple trail blazing organizations used shared leadership to build high performance The notion of shared leadership seems to contradict many of the bedrock ideas of efficient management and effective organizations A typical first reaction is It ll never work here Yet the organizations that get it and implement this new powerful approach tend to be more innovative and to out perform their nay sayer competitors In fact shared leadership is one of the most important ideas to hit business in recent years our recent feature article about shared leadership in the Wall Street Journal is testimony to that Shared leadership can provide a way for companies to increase productivity quality and flexibility while meeting the competitiveness challenge *Share the Lead* provides new insights and information about how to push the organizational envelope to new frontiers **Detecting and Preventing Classroom Cheating** Gregory J.
