Conflictology

Francis Onditi, 2020-05-28 Over the past three decades scholars students and policy makers

studying and engaged in conflict resolution have veered between conflict management and resolution However the changing nature of conflict which is taking the form of radicalization and extremism are deeply rooted in individual's ideology personalities and genes hence rendering the conventional macro level power balance analytics obsolete The psychology and human genetics are at the center of this evolution This shift in conflict trends and methods of warfare in Africa and the world over demands that we search for alternative approaches mechanisms and innovative response It is against this background that this new book initiates a fundamental debate on how interdisciplinary adventure could increase the understanding of man kind and the socio biological systems surrounding man hence the emphasis on the discipline of Conflictology to embody scientific approaches methods and prescription to conflict resolution For instance does individual's gene influence human behaviours such as hate If so can this be corrected through gene transposition If human relations should be anchored on peace what are these genetic and behavioural factors that create hate and violence How then should such a gene or neurobiological system be altered in order to prevent extremism and radicalization

Gender and Civilian Victimization in War Jessica L. Peet, Laura Sjoberg, 2019-11-25 This book explores the role of gender in influencing war fighting actors strategies toward the attack or protection of civilians Traditional narratives suggest that killing civilians intentionally in wars happens infrequently and that the perpetration of civilian targeting is limited to aberrant actors Recently scholars have shown that both state and non state actors target civilians even while explicitly deferring to the civilian immunity principle This book fills a gap in the accounts of how civilian targeting happens and shows that these actors are in large part targeting women rather than some gender neutral understanding of civilians It presents a history of civilian victimization in wars and conflicts and then lays out a feminist theoretical approach to understanding civilian victimization It explores the British Blockade of Germany in World War I the Soviet Rape of Berlin in World War II the Rwandan genocide and the contemporary conflict in northeast Nigeria Across these case studies the authors lay out that gender is key to how war fighting actors understand both themselves and their opponents and therefore plays a role in shaping strategic and tactical choices It makes the argument that seeing women in nationalist and war narratives is crucial to understanding when and how civilians come

to be targeted in wars and how that targeting can be reduced This book will be of much interest to students of critical security gender studies war studies and International Relations in general **The Cambridge Medieval History** ,1924

Democratic Peace Cage Banseka,2005 This text marks a little milestone in the understanding of the democratic peace theory in transitional states It brings in a much needed perspective on the achievements and limitations of democracy in Sub Saharan Africa and the role it plays or could play in the search for solutions to conflicts in the sub region The author provides a differentiated view of the traditional Western notions of democracy and its role in the search for political stability and nation building A series of fragile democratic developments in contemporary politics in the continent have set in processes of change in governance patterns and understandings about the idea of a nation state However these processes have been unable to stem the tide of conflicts that continue to raise their bloody heads in the continent The author takes a critical look at the reasons for this limitation while probing into the necessity for alternative ways of thinking about the causes and solutions to the conflicts This text offers students and researchers a quick glance at the sources of conflicts in Sub Saharan Africa and an assessment of the implications of attempting to use democracy alone as a solution

Religious Rights Lorenzo Zucca,2017-05-15 The central focus of this collection of essays is the role and place of freedom of religion in the protection and promotion of world order The volume offers competing models of world order from a global perspective and highlights the lack of consensus and considerable variety of practice and belief around the globe as to the definition of religious freedom and where and whether freedom of religion is regarded as the first freedom in the world The leading theories of freedom of religion are discussed and provide an understanding of freedom of religion beyond the nation state The liberal view at the global level is also examined and observations are included regarding the need to rethink secularism in the light of present circumstances and within the global context *Stone & Webster Public Service Journal* ,1926
