Peasant Power In China The Era Of Rural Reform 1979 1989:

Peasant Power in China Daniel Roy Kelliher, 1992 From 1979 1989 rural life in China was transformed communes were dismantled and government domination eased From field work in Hubei and south central China Kelliher traces the origins of reform in family farming marketing and private entrepreneurship and shows how peasants instigated reform

Peasant Power in China Daniel Kelliher, 1992-11-25 Between 1979 and 1989 rural life in China was transformed the communes were dismantled tiny family farms were created government domination of commerce and enterprise was eased and many entrepreneurial ventures were brought to life China's rural reform was arguably the most massive single act of privatization in history Although Deng Xiaoping's government claimed credit for the dramatic innovations Daniel Kelliher shows that it was the peasants themselves with no organization or legal political voice of their own who instigated the most radical changes of the reform era Drawing on his fieldwork in Hubei Province and neighboring provinces in south central China Kelliher traces the origins of reform in three areas family farming marketing and private entrepreneurship and details the local conspiracies deceptions and illegal experiments that peasants used to push state policy in new directions He also addresses the larger issue of how disenfranchised peasants could affect politics at all under a strong state like that of China Analyzing the evolution of state socialism in China Kelliher explains how state ambitions for modernization in the post Mao era made the state socialist system vulnerable to rising peasant power He also shows why the state seized upon economic privatization as a way of securing its political base among the peasantry The book not only offers a wide ranging portrait of rural politics in contemporary China but also uses the Chinese case to illuminate state peasant relations reform in state socialism and privatization in other third world nations

Paradoxes of Post-Mao Rural Reform Frederick C. Teiwes, Warren Sun, 2015-12-22 The decollectivization of Chinese agriculture in the early post Mao period is widely recognized as a critical part of the overall reform program But the political process leading to this outcome is poorly understood A number of approaches have dominated the existing literature 1 a power policy struggle between Hua Guofeng's alleged neo Maoists and Deng Xiaoping's reform coalition 2 the power of the peasants and 3 the leading role of provincial reformers The first has no validity while second and third must be viewed through more complex lenses This study provides a new interpretation challenging conventional wisdom Its key finding is that a game changer emerged in spring 1980 at the time Deng replaced Hua as CCP leader but the significant change in policy was not a product of any clash between these two leaders Instead Deng endorsed Zhao Ziyang's policy initiative that shifted emphasis away from Hua's pro peasant policy of increased resources to the countryside to a pro state policy that reduced the rural burden on national coffers To replace the financial resources policy measures including household farming were implemented with considerable provincial variations The major unexpected production increases in 1982 confirmed the arrival of decollectivization as the template on the ground The dynamics of this policy change has never been adequately explained *Paradoxes of Post Mao Rural Reform* offers a deep

empirical study of critical developments involving politics from the highest levels in Beijing to China's villages and in the process challenges many broader accepted interpretations of the politics of reform. It is essential reading for students and scholars of contemporary Chinese political history.

Political Culture and Participation in Rural China Yang Zhong, 2013-06-17. Despite China's rapid urbanisation and industrialisation, most Chinese still live in the vast countryside or have rural household registration. Although there was significant economic improvement in rural areas in the 1980s, the rural economy has been stagnating or deteriorating since then, and the book argues that the rural-urban income gap is giving rise to the potential for political instability throughout China. This book, based on extensive original research including interview fieldwork in rural areas, examines the nature of political culture and participation in rural China, discussing issues such as the support or lack of it for democratic values, levels of political interest, the ways in which Chinese peasants interact with village and local officials, subjective factors that motivate them to vote or not to vote in village elections, and rural people's views on market-oriented economic reforms, local and national government, and the Communist Party. The book argues that although hitherto peasants' riots, sit-ins, and demonstrations have been localised and uncoordinated, they are frequent and have the potential to cause serious political crises for China's rulers. It concludes by considering the future political development of China's vast countryside.

Moral Politics in a South Chinese Village Hok-Bun Ku, 2003. Exploring sensitive issues often hidden to outsiders, this engaging study traces the transformation and economic development of a south China village during the first tumultuous decade of reform. Drawing on a wealth of intimate detail, Ku explores the new sense of risk and mood of insecurity experienced in the post-reform era in Ku Village, a typical hamlet beyond the margins of richer suburban areas or fertile farmland. Villagers' dissatisfaction revolves around three key issues: the rising cost of living, mounting agricultural expenses, and the forcible implementation of birth control quotas. Faced with these daunting problems, villagers have developed an array of strategies. Their weapons include resisting policies they consider unreasonable by disregarding fees, evading taxes, and ignoring strict family planning regulations, challenging the rationale of official policies, and the legitimacy of the local government and its officials, and reestablishing clan associations to supersede local Party authority. Using lively everyday narratives and compelling personal stories, Ku argues that rural people are not in fact powerless and passive; instead, they have their own moral system that informs their everyday family lives, work, and political activities. Their code embodies concepts of fairness and justice, a concrete definition of the relationship between the state and its citizens, an understanding of the boundaries and responsibilities of each party, and a clear notion of what constitutes good and bad government and officials. On the basis of these principles, they may challenge existing policies and deny the authority of officials, and the government thereby legitimizing their acts of self-defense. Through his richly realized ethnography, Ku shows the reader a world of memorable, fully realized individuals striving to control their fate in an often arbitrary world.

China's Long March to Freedom Kate Zhou, 2017-09-08. China is more than a socialist market economy led by ever more reform

minded leaders It is a country whose people seek liberty on a daily basis Their success has been phenomenal despite the fact that China continues to be governed by a single party Clear distinctions between the people and the government are emerging underlining the fact that true liberalization cannot be imposed from above Although a large percentage of the Chinese people have been part of China's long march to freedom farmers entrepreneurs migrants Chinese gays sex pleasure seekers and black marketers played a particularly important role in the beginning Lawyers scholars journalists and rights activists have jumped in more recently to ensure that liberalization continues Social dissatisfaction with the government is now published in the media addressed in public forums and deliberated in courtrooms Intellectuals devoted to improvement in human rights and continued liberalization are part of the process This grassroots social revolution has also resulted from the explosion of information available to ordinary people especially via the Internet and far reaching international influences All have fundamentally altered key elements of the moral and material content of China's party state regime and society at large This social revolution is moving China towards a more liberal society despite its government The Chinese government reacts rather than leads in this transformative process This book is a landmark a decade in the making *The Broken China Dream* Minxin Pei, 2025-12-02 A provocative book that demystifies China's great democratic leap backward under Xi Jinping revealing why the country's embrace of capitalism has given rise to hard authoritarianism mass surveillance and one man rule instead of democracy as many in the West had hoped When China embarked on its transformative journey of modernization in 1979 many believed the country's turn toward capitalism would put its totalitarian past to rest and mark the birth of a democratic open society Instead China reverted to a neo totalitarian state one backed by one of the fastest growing most formidable economies on earth The Broken China Dream pulls back the curtain on the regime of strongman Xi Jinping revealing why the reforms of the post Mao era have been reversed on nearly every front and why the world failed to see it coming Exposing the truth behind China's economic ascendancy after the Cultural Revolution Minxin Pei shows how following Mao's death in 1976 Deng Xiaoping strategically deployed the tools of capitalism to preserve the Chinese Communist Party Deng kept intact the institutional foundations of totalitarianism even as he unleashed private entrepreneurship and courted foreign investment giving China's one party state control of a vast repressive apparatus and the most critical sectors of the economy Only a fragile balance of power among dueling factions prevented the rise of a totalitarian leader in the two decades after the Tiananmen crackdown in 1989 but this temporary equilibrium collapsed Essential to understanding today's China this meticulously researched book is a sobering account of why the country's reformers and institutions could not stop a shrewd and ruthless politician like Xi from resurrecting dormant totalitarian practices that for the foreseeable future have spelled the end of the dream of a free and prosperous China Peasants without the Party Lucien Bianco, 2015-03-04 Exploring one of the most dynamic and contested regions of the world this series includes works on political economic cultural and social changes in modern and contemporary Asia and the Pacific The

leading specialist on China's twentieth century peasant resistance reexamines in bold and original ways the question Was the Chinese peasantry a revolutionary force Where most scholarly attention has focused on Communist led peasant movements Bianco's story is one of peasant thought and action largely unmediated by modern political parties This volume pays particular attention to the first half of the twentieth century when peasant based conflict ranging from tax and food protests to secret society conflicts opium struggles inter communal conflicts and tenant protests over rent was central to nationwide revolutionary processes

The India Handbook C. Steven LaRue, 1997 The first six volumes in our series Regional Handbooks of Economic Development examine key issues affecting the economic growth of developing regions in Asia and Europe The series is designed to help non specialist readers understand a variety of complex factors social and political as well as economic that will bear on a region's economic growth as it moves into the next century Each volume begins with an explanation of the region's economic conditions within an historical and political context Then follow approximately 20 chapter length essays each prepared by a recognized expert in the field analyzing such factors as a region's population natural resources foreign trade banking and financial structure as well as the role of multi national corporations the problems of labor and economic inequalities in the region etc

Central Control and Local Discretion in China Chae-ho Chŏng, 2000 This book analyses the decollectivization reform in China during the early 1980s in order to gauge the impact of post Mao decentralization on central control and provincial discretion The volume challenges the notion that the decision to decentralize administrative authority ipso facto produces local discretion properly keyed to local conditions In fact outcomes often differ from the intended goals While generally local interests and central local clientilistic networks determine the policy responses of the provinces bureaucratic careerism also plays a crucial role In the case of post Mao decollectivization national level analyses suggest that a majority of provinces adopted household farming neither too quickly nor too slowly since both pioneering and resisting entailed potentially enormous political risks Once Beijing's preference appeared firmly fixed however they all quickly bandwagoned by popularizing the policy as swiftly as possible Three detailed case studies of Anhui as a pioneer Shandong as a bandwagoner and Heilongjiang as a resister further highlight the evolutionary process in which provincial variations came to be replaced by uniform compliance imposed by Beijing Theoretically this study contends that the overall scope of local discretion is circumscribed by the dominant norms and incentive relations embedded in the implementation dynamics Methodologically the book employs a combination of aggregate analyses and comparative case studies Empirically on the basis of newly available materials including classified documents and interviews it challenges the peasant power school which has somehow allowed local governments to evaporate in its descriptions of post Mao decollectivization
