Protest, Politics and Work in Rural England, 1700-1850 Carl Griffin,2013-11-28 Rural workers in eighteenth and early nineteenth century England were not passive victims in the face of rapid social change Carl J Griffin shows that they deployed an extensive range of resistances to defend their livelihoods and communities Locating protest in the wider contexts of work poverty and landscape change this new text offers the first critical overview of this growing area of study

The Liberal Party in Rural England 1885-1910 Patricia Lynch,2003-01-23 This book explores the relationship between the British Liberal party and the rural working class voters enfranchised by the Third Reform Act of 1884 In contrast to many works that present urban voters as the primary agents of political change in nineteenth and twentieth century England this study argues that an examination of the dynamics of popular rural politics is essential to a thorough understanding of political developments in the early years of mass enfranchisement Prior to 1914 capturing a substantial portion of the rural vote was essential to any political party seeking to establish a strong Parliamentary majority and the Liberal party coming from a traditionally strong urban base had to work particularly hard to meet the expectations of the new rural electorate The book shows that popular political culture in the English countryside was dominated by two important and sometimes conflicting traditions on the one hand a history of radical social protest emphasizing attacks on the privileges of landowning

elites and on the other a widespread concern for the harmony of the local community coupled with a suspicion of unnecessary divisiveness. The attempt to appeal simultaneously to both of these facets of rural political culture helps to explain not only why the Liberals continued to launch rhetorical attacks on the landed aristocracy and to promote schemes of land reform long after one might have expected them to have switched to a more modern emphasis on class politics but also why the New Liberal emphasis on the politics of community carried such broad electoral appeal at the beginning of the twentieth century. The book suggests finally that in focusing primarily on urban democratization historians of this period may have exaggerated the role of class allegiances in shaping popular political opinion and underestimated the continuities between Old and New Liberalism.

The Death of Rural England Alun Howkins, 2003 This engaging history of rural England and Wales during the twentieth century looks at the role of the countryside as both a place of work and of leisure and looks at the many crises it has suffered during that time.

Writing the Rural Professor Paul J Cloke, Professor Marcus A Doel, Dr David Matless, PhD, Professor Nigel Thrift, Dr Martin Phillips, 1994-07-28 This book arises out of an ESRC project devoted to an examination of the economic social and cultural impacts of the service class on rural areas. The research was an attempt to document these impacts through close empirical work in a set of three rural communities but something happened on the way. The authors found that the rural became a real sticking point. Respondents used it in different ways as a bludgeon as a badge as a barometer to signify many different things: security, identity, community, domesticity, gender, sexuality, ethnicity, nearly always by drawing on many different sources: the media, the landscape, friends and kin, animals. It became abundantly clear that the rural, whatever chameleon form it took, was a prime and deeply felt determinant of the actions of many respondents. Yet it was also clear that to the authors they possessed no theoretical framework that could allow them to negotiate the rural, to deconstruct its diverse nature as a category. Rather, each of the extended essays in the book is an attempt by each author to draw out one aspect of the rural by drawing on different traditions in social and cultural theory.

Land Commodification and Rural Transformation in China Renhao Yang, 2025-10-09 This book explores the market oriented experiment of rural collective operational construction land in China, revealing how land commodification shapes rural transformation through complex interactions between state and collective actors. It provides a nuanced understanding of land commodification processes and their impacts on rural development. Through empirical case studies and an actor centered analytical approach, the book unpacks state led policy experimentation and village collectives' diverse responses in rural China. This book is intended for scholars, researchers and postgraduate students in human geography, rural studies, development studies, political economy and China studies, as well as policymakers and practitioners involved in land governance and rural development.
