Women and Magic in Medieval Romance Jane Elizabeth Bonsall,2025-04-08 Explores the conventions and contradictions inherent in archetypes of magical femininity from loathly ladies to monstrous mothers in a range of popular late medieval English romances The female characters in Middle English romances with particular power and agency are often portrayed as supernatural possessing either magical abilities or identities This book argues that a genre focused reading of these supernatural women reveals romance s strategies for working through and articulating anxieties about the changing world of the late medieval period as well as exposing their contemporary audiences unexpectedly flexible attitudes toward feminine authority and moral ambiguity It explores five distinct types of magical femininity the Tristan tradition s marvelously gifted healers the Muslim princess in Bevis of Hampton the endlessly wealthy fairy imagined by Sir Launfal and Partonope of Blois the monster mother Melusine and Morgan le Fay the prototypical witch By tracking the way each type first establishes then complicates generic patterns this study highlights the tension between romance s persistent fascination with feminine power and its simultaneous reiteration of the social and generic bounds on women s agency and authority Interrogating generic expectations from an intersectional feminist perspective it makes a case for a recuperative re reading of romance one that asks us to revise our assumptions about the potentialities of women s power in the medieval imaginary

Children's Catalog H.W. Wilson Company,1986 *The Lever of Riches* Joel Mokyr,1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity *The Lever of Riches* with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential **In the Looking Glass** Rebecca K. Gardenour Walter,2015-07-22 The witch the vampire and the werewolf endure in modern horror These old monsters have their origins in Aristotle as studied in the universities of medieval Europe where Christian scholars reconciled works of natural philosophy and medicine with theological precepts They codified divine perfection as warm light male and associated with the ethereal world beyond the moon while evil imperfection was cold dark female and bound to the corrupt world below the moon All who did not conform to divine goodness including un holy women and Jews were considered evil and ascribed a melancholic blood hungry and demonic physiology This construct was the basis for anti woman and anti Jewish discourse that has persisted through modern Western culture Nowhere is this more evident than in horror films where the witch the vampire and the werewolf represent our fear of the inverted other **In Pursuit of Change** Paul Waylon Fortener (a.k.a.
