Australian shores each species listing indicates broad distributions both inside and outside Australian waters Where possible a short summary of known ecological data is given and there are references to key works that help identify the fauna at all taxonomic levels Features Provides the quality detailed information on taxonomy and nomenclature that researchers have come to expect from the award winning Zoological Catalogue of Australia series Outlines distribution of species both inside and outside of Australian waters and hence is widely applicable to nations bordering the Indian and Pacific oceans Covers some 55 families just under 450 genera and over 1200 valid species
