MODELING AND ANALYSIS **Assessment of Improvement Options** EDITED BY REINER K. HUBER

Anders Boserup, R.R. Neild

Modeling and Analysis of Conventional Defense in Europe Reiner K. Huber, 2012-12-06 This book presents a collection of contributions to a workshop on Long teY fr Development of NATO's Conventional Forrward Defense to which the GERMAN STRATEGY FORUM DSF had invited some 50 systems analysts and defense experts of the United States the United Kingdom the Federal Republic of Germany and the SHAPE Technical Centre Held in Bonn from 2 to 4 December 1984 this workshop was to provide a forum for the dis cussion at a non political expert level and in the light of available analysis results of proposals for the improvement of NATO's conventional defense capabilities In addition it aimed at arriving at some recommenda tions as to which of these proposals deserve to be studied further and what methodological deficiencies must be alleviated and information gaps closed for an adequate assessment The idea to organize this workshop has been discussed ever since 1980 with several defense systems analysts in the US and the UK who shared the opinion that with a view to the immense global build up of the Soviet threat on one hand and the stringency of defense resources in most NATO countries on the other there is no reason that could permit us to dismiss any proposal promising improvement without careful study

Alternative Conventional Defense Postures In The European Theater Hans G. Brauch, Robert F. Jr. Kennedy, 2018-10-24 First published in 1993 This volume edited jointly by the American strategic expert Robert Kennedy and the German peace researcher Hans Giinter Brauch takes up conceptual ideas developed by Horst Afheldt and Carl Friedrich von Weizsacker as well as others on both sides of the Atlantic since the 1960s Our aim has been to contribute to the development of concepts that would reduce the danger of a third world war by the creation of more stable structures in the context of a defensively oriented conventional defense posture In this volume a variety of alternative approaches to European conventional defense driven for the most part by similar strategic considerations are presented by German and American experts to a larger international audience Alternative Conventional Defense Postures in the European Theater: Force posture alternatives for Europe after the Cold War Hans Günter Brauch, Robert Kennedy, 1990 Implications of Modern Decision Science for Military Decision-Support Systems Paul K. Davis, Jonathan Kulick, Michael Egner, 2005-09-14 A selective review of modern decision science and implications for decision support systems. The study suggests ways to synthesize lessons from research on heuristics and biases with those from naturalistic research It also discusses modern tools such as increasingly realistic simulations multiresolution modeling and exploratory analysis which can assist decisionmakers in choosing strategies that are flexible adaptive and robust **Inadvertent Escalation** Barry R. Posen, 2014-01-13 In this sobering book Barry R Posen demonstrates how the interplay between conventional military operations and nuclear forces could in conflicts among states armed with both conventional and nuclear weaponry inadvertently produce pressures for nuclear escalation Knowledge of these hidden pressures he believes may help some future decision maker avoid catastrophe Building a formidable argument that moves with cumulative force he details the way in which escalation could occur not by

mindless accident or by deliberate preference for nuclear escalation but rather as a natural accompaniment of land naval or air warfare at the conventional level Posen bases his analysis on an empirical study of the east west military competition in Europe during the 1980s using a conceptual framework drawn from international relations theory organization theory and strategic theory The lessons of his book however go well beyond the east west competition Since his observations are relevant to all military competitions between states armed with both conventional and nuclear weaponry his book speaks to some of the problems that attend the proliferation of nuclear weapons in longstanding regional conflicts Optimism that small and medium nuclear powers can easily achieve stable nuclear balances is he believes unwarranted The National **Security of Small States in a Changing World** Efraim Inbar, Gabriel Sheffer, 2013-09-13 The first part of this book is primarily devoted to analysing the impact of the system of international relations on the fortunes of small states The second part discusses the question what changes in the national strategy of small states are necessary in view of the new international system The authors of this volume come from various parts of the world and espouse differing outlooks Nevertheless they were able to coalesce around a similar theme in an effort to contribute to the international understanding of the special challenges that confront the world's small states Resolving the Security Dilemma in Europe Bjørn Møller, 1991 For the first time since the beginning of the Cold War more than 40 years ago the political determinants of military security in Europe are changing much more quickly than the technological ones Non offensive defence is now a more acceptable strategy than it was before and this book points towards realistic solutions to the problems of excessive dependence on nuclear weapons and or self defeating offensive force structures. The ideas examined are especially important for British and American audiences since the Anglo Saxon countries are the ones most wedded to NATO orthodoxy and therefore the slowest to react to the current wave of change **Emerging Technologies and Military Doctrine** Dr. Frank Barnaby, Marlies Ter Borg, 1986-06-18 The Foundations of Defensive Defence Anders Boserup, R.R. Neild, 2016-01-07 In this collection of papers the theory of defensive strategy and the ways of implementing it are explored by scholars and military professionals from East and West These papers are a result of workshops organised by the Pugwash conferences on science and world affairs Enabling Technologies for Simulation Science VIII Dawn A. Trevisani, Alex F. Sisti, 2004 Proceedings of SPIE present the original research papers presented at SPIE conferences and other high quality conferences in the broad ranging fields of optics and photonics These books provide prompt access to the latest innovations in research and technology in their respective fields Proceedings of SPIE are among the most cited references in patent literature
