Modeling Archaeological Site Burial In Southern Michigan A Geoarchaeologic AI Synthesis:

Modeling Archaeological Site Burial in Southern Michigan G. William Monaghan, William A. Lovis, 2005 Modeling Archaeological Site Burial in Southern Michigan is the first volume in the Environmental Research Series The product of more than two decades of research it examines relationships between regional and local scale fluvial system evolution and the processes that result in the deep burial of archaeological sites primarily in floodplain and coastal contexts This multidisciplinary study incorporates findings from earth and social sciences discussing regional scale processes of environmental change that are necessary to understand relationships between human economic needs social adaptation and changing paleoenvironment Monaghan and Lovis have compiled and synthesized available data on deeply buried archaeological sites in southern Lower Michigan the result is the most comprehensive single compendium of such data available for any region of the Great Lakes Since the processes and contexts present in southern Lower Michigan are comparable to those in the larger region research modes presented here also have applicability across northeastern North America This is one of the most important pieces of research to be produced on Michigan archeology *The Oxford Handbook of the Archaeology of Diet* Julia Lee-Thorp, M. Anne Katzenberg, 2024-06-24 Humans are unique among animals for the wide diversity of foods and food preparation techniques that are intertwined with regional cultural distinctions around the world The Oxford Handbook of the Archaeology of Diet explores evidence for human diet from our earliest ancestors through the dispersal of our species across the globe As populations expanded people encountered new plants and animals and learned how to exploit them for food and other resources Today globalization aside the results manifest in a wide array of traditional cuisines based on locally available indigenous and domesticated plants and animals How did this complexity emerge When did early hominins actively incorporate animal foods into their diets and later exploit marine and freshwater resources What were the effects of reliance on domesticated grains such as maize and rice on past populations and the health of individuals How did a domesticated plant like maize move from its place of origin to the northernmost regions where it can be grown Importantly how do we discover this information and what can be deduced about human health biology and cultural practices in the past and present Such questions are explored in thirty three chapters written by leading researchers in the study of human dietary adaptations The approaches encompass everything from information gleaned from comparisons with our nearest primate relatives tools used in procuring and preparing foods skeletal remains chemical or genetic indicators of diet and genetic variation and modern or historical ethnographic observations Examples are drawn from across the globe and information on the research methods used is embedded within each chapter The Handbook provides a comprehensive reference work for advanced undergraduate and graduate students and for professionals seeking authoritative essays on specific topics about diet in the human past *Agrarian Landscapes in Transition* Charles Redman, David R. Foster, 2008-07-18 Agrarian transformations represent the most pervasive alteration of the Earth's

terrestrial environment over the past 10 000 years Using North American examples the book traces compares and contrasts the introduction spread and abandonment of agriculture at six U S long term ecological research LTER sites Indeed lessons from these examples apply more broadly to inform socio ecological studies land use options conservation strategies restoration initiatives and urban planning Ancient Pottery, Cuisine, and Society at the Northern Great Lakes Susan M. Kooiman,2021-11-15 This innovative archaeological study of diet and cooking technology sheds light on ancient cuisine Ancient cuisine is one of the hot topics in today s archaeology This book explores changing settlement and subsistence in the Northern Great Lakes from the perspective of food processing technology and cooking Susan Kooiman examines precontact Indigenous pottery from the Cloudman site on Drummond Island on the far eastern end of Michigan s Upper Peninsula to investigate both how pottery technology pottery use diet and cooking habits change over time and how these changes relate to hypothesized transitions in subsistence settlement and social patterns among Indigenous pottery making groups in this area Kooiman demonstrates that ceramic technology and cooking techniques evolved to facilitate new subsistence and processing needs Her interpretations of past cuisine and culinary identities are further supported and enhanced through comparisons with ethnographic and ethnohistoric accounts of local Indigenous cooking and diet The complementary nature of these diverse methods demonstrates a complex interplay of technology environment and social relationships and underscores the potential applications of such an analytic suite to long standing questions in the Northern Great Lakes and other archaeological contexts worldwide This clearly written book will interest students and scholars of archaeology and anthropology as well as armchair archaeologists who want to learn more about Indigenous Native American studies food studies and cuisine pottery cooking and food history Killarney Bay David S. Brose,Patrick Julig,John M. O'Shea,2021-11-16 The archaeological site at Killarney Bay on the northeast side of Georgian Bay in Ontario Canada has attracted and mystified archaeologists for decades The quantities of copper artifacts exotic cherts and long distance trade goods all highlight the importance of the site during its time of occupation Yet researchers have struggled to date the site or assign it to a particular cultural tradition since the artifacts and mortuary components do not precisely match those of other sites and assemblages in the Upper Great Lakes The history of archaeological investigation at Killarney Bay stretches across parts of three centuries and involves field schools from universities in two countries Laurentian University in Canada and the University of Michigan in the United States This volume pulls together the results from all prior research at the site and represents the first comprehensive report ever published on the excavations and finds at Killarney Bay Heavily illustrated Indiana's 200 Linda C. St. Clair,2016-05-20 Part of the Indiana Historical Society s commemoration of the nineteenth state s bicentennial Indiana s 200 The People Who Shaped the Hoosier State recognizes the people who made enduring contributions to Indiana in its 200 year history Written by historians scholars biographers and independent researchers the biographical essays in this book will enhance the public s knowledge and appreciation of those who made a
