Business Rule-Oriented Conceptual Modeling Holger Herbst, 2012-12-06 This book is based on a PhD dissertation which was accepted by the faculty of Law and Economics at the University of Bern Switzerland The ideas presented were partially developed in a research project founded by the Swiss National Science

Foundation in 1993 and 1994 This research project was concerned with evaluating the application of database triggers and active databases for the implementation of business rules We recognized among other things the lack of a methodology for modeling such business rules on the conceptual level Therefore this became the focus of the follow up research which resulted in this book All this work would not have been possible without the help of several people First of all I would like to give special thanks to my thesis supervisor Prof Dr Gerhard Knolmayer He not only initiated the research project and found an industry partner but also provided very valuable ideas and critically reviewed and discussed the resulting publications Furthermore I would like to express my thanks to the second thesis supervisor Prof Dr Sham Navathe from Georgia Institute of Technology who influenced my work with results from a former research project and who agreed to evaluate the resulting PhD Dissertation

Automotive Production Systems and Standardisation Constanze Clarke, 2006-03-30 In January 2000 Mercedes Benz started to implement the Mercedes Benz Production System MPS throughout its world wide passenger car plants This event is exemplary of a trend within the automotive industry the creation and introduction of company specific standardised production systems It gradually emerged with the introduction of the Chrysler Operating System COS in the mid 1990s and represents a distinct step in the process towards implementing the universal principles of lean thinking as propagated by the MIT study For the academic field of industrial sociology and labour policy the emergence of this trend seems to mark a new stage in the evolution of the debate about production systems in the automotive industry Jrgens 2002 2 particularly as it seems to undermine the stand of the critics of the one best way model Boyer and Freyssenet 1995 The introduction of company level standardised production systems marks the starting point of the present study At the core of it is a case study about the Mercedes Benz Production System MPS

New Trends in Banking Management Constantin Zopounidis, 2012-12-06 During the last decades the globalization the intensified competition and the rapid changes in the socio economic and technological environment had a major impact on the global economic financial and business environments Within this environment it is clear that banking institutions worldwide face new challenges and increasing risks as well as increasing business potentials The recent experience shows that achieving a sustainable development of the banking system is not only of interest to the banking institutions themselves but it is also directly related to the development of the whole business and economic environment both at regional and international level The variety of new banking products that is constantly being developed to accommodate the increased customer needs firms organizations individuals etc provides a clear indication of the changes that the banking industry has undergone during the

last two decades The establishment of new products of innovative processes and instruments for their requires the implementation efficient management The implementation of such processes and instruments is closely related to a variety of disciplines advanced quantitative analysis for risk management information technology quality management etc The implementation of these approaches in banking management is in accordance with the finding that empirical procedures are no longer adequate to address the increasing complexity of the banking industry

Why Managers and Companies Take Risks Les Coleman, 2007-05-23 This book uses risk in its dictionary meaning as the probability of an undesirable outcome and has two research questions when managers make decisions what leads them to choose a risky alternative and what determines whether the decision proves correct Answers to these questions form a model of decision making that explains the process and results of managers risk taking in the real world There is an extensive literature on risk and decision making because the topic has been of interest in many disciplines since at least the 18 century Thus insights on the research questions are available from studies of animals humans and organisations and have been drawn by scholars in biology psychology finance and management Even so there is a large gap as most studies are conducted away from corporate settings and use subjects with limited decision experience The few studies set in real world conditions tend to concentrate on just a single aspect of decision makers attributes setting and behaviour and on either decision choices or outcomes The empirical work in this book is designed to fill part of this gap

Psychoanalysis and Management Michael Hofmann, Monika List, 2013-11-11 Managers are confronted with many difficult demands which are still unknown to them Gaining a better knowledge for unconscious ways of human behavior and their motivations is very important This book introduces research work to European readers by selected contributions from leading psychoanalytically oriented management theorists and clinicians The authors deal with different topics such as leadership corporate culture family business organizational stress career dynamics and so on All of them try to win an understanding and insight into conscious unconscious rational and irrational behavior The purpose of this book is fulfilled if this knowledge can be practiced in order to achieve improvements for the cooperation between people in general

Empirical Research on the German Capital Market Wolfgang Bühler, Herbert Hax, Reinhart Schmidt, 2012-12-06 This collection of fifteen original articles results from a cooperative intensive program of research on the German capital market The program objectives included the development of expertise in modern empirical methods in financial economics and the derivation of results that might be specific to the German capital market The four parts of the book are dedicated to problems of market structure and organization information and capital market risk and return futures and options Altogether the book gives an overview of empirical research on capital markets in Germany and helps to understand their nature It also shows the application of modern techniques in financial research
