Models Of Industrial Structure:

Models of Industrial Structure Lars Engwall, 1973 Structural Econometric Modeling in Industrial Organization and Quantitative Marketing Ali Hortaçsu, Joonhwi Joo, 2023-10-24 Structural econometric modeling specifies the structure of an economic model and estimates the model's parameters from real world data. Structural econometric modeling enables better economic theory based predictions and policy counterfactuals. This book offers a primer on recent developments in these modeling techniques which are used widely in empirical industrial organization, quantitative marketing and related fields. It covers such topics as discrete choice modeling, demand modes estimation of the firm entry models with strategic interactions, consumer search and theory empirics of auctions. The book makes highly technical material accessible to graduate students describing key insights succinctly but without sacrificing rigor. Optimization of Regional Industrial Structures and Applications Yaoguo Dang, Sifeng Liu, Yuhong Wang, 2010-11-23 Based on research projects supported by the National Natural Science Foundation of China and Nanjing University of Aeronautics and Astronautics, *Optimization of Regional Industrial Structures and Applications* provides an authoritative introduction to and survey of the cutting edge research and applications in industrial structure optimization. *Industrial Structure and Regional Employment Dynamics* Wolfgang Dauth, 2012-10-25 Gibt es einen Zusammenhang zwischen der regionalen Branchenstruktur und der Beschäftigungsentwicklung? Wolfgang Dauth ist dieser Frage in drei eigenständigen Studien auf den Grund gegangen. Sie beleuchten jeweils unterschiedliche thematische Teilaspekte und werden in den drei zentralen Kapiteln dieses Bandes behandelt. Kapitel 2: Agglomeration and regional employment dynamics belegt die Existenz von Agglomerationsvorteilen für den regionalen Arbeitsmarkt. In agglomerierten lokalen Branchen ist das Beschäftigungswachstum nachhaltiger als in nicht agglomerierten. In Kapitel 3: The mysteries of trade wird analysiert, inwiefern die Wechselwirkungen zwischen unterschiedlichen aber verwandten Branchen die Existenz von Agglomerationsvorteilen erklären. Gemeinsame Arbeitsmärkte so das zentrale Ergebnis spielen dabei eine Schlüsselrolle. In Kapitel 4: The rise of the East and the Far East untersucht Dauth, wie sich der internationale Handel auf Regionen mit unterschiedlicher Branchenstruktur auswirkt. Er weist nach, dass Deutschland durch den wirtschaftlichen Aufstieg Chinas und Osteuropas unter dem Strich massive Beschäftigungsgewinne verzeichnen konnte. Publikationssprache: Englisch. Modeling Structural Change in the U.S. Textile Industry Shu Yang, Barry K. Goodwin, 2019-01-15 This book reviews the experience of the textile and apparel sectors over the post war period. An econometric study of the cost structure of the industry is undertaken to obtain inferences regarding the existence of structural change and the exact nature of any changes that occurred. A variety of approaches to modeling production technologies in both the textile and apparel sectors are considered. Our results confirm the existence of significant structural breaks which altered the nature of production technologies and economic relationships in these sectors. Our results indicate that a significant amount of labor which became relatively more expensive as the economy developed after the Second World

War was replaced by capital in these sectors Our results indicate that new technologies made it easier to substitute capital for labor We also give attention to the important role played by textile and apparel imports over this period Textile trade has traditionally been heavily regulated most recently by the Multi Fiber Arrangement of the GATT Policy changes allowed greater access to developed country markets This stimulated production in developing countries and thus enhanced the role of imports from developing countries We argue that this stimulated the structural changes which led to among other things the release of labor from these sectors and the concomitant plant closings These factors also stimulated capital deepening Finally we also consider the issue of substitutability among alternative forms of fibers in the textile sector Our analysis quantifies demand relationships among natural and synthetic fibers Our analysis reveals that structural changes often encouraged the use of synthetic fibers

Climate Change and Industry Structure in China Chu Wei,2022-07-30 As carbon dioxide is the most important source of greenhouse gases today its emission quantity has become a primary focus of governments scholars and the general public From the perspective of the structure of Chinese industry this book aims to answer two questions First what is the driving force of China's CO₂ emissions and how does this relate to the structure of industry Second what is the potential for abatement and the cost of CO₂ across sectors and regions and the impact for industry The author calculates the CO₂ inventory data at province and sectoral level based on the approach of the Intergovernmental Panel on Climate Change IPCC and then quantifies the CO₂ abatement potential and marginal abatement cost using this production framework Econometric models are used to examine the likely impact on industry of abatement potential and cost The book hence provides a rich source of information for general readers to better understand the characteristics patterns and drivers of China's CO₂ emissions It also provides solid evidence for policy makers to help mitigate CO₂ emissions through industrial restructuring strategy

Industrial Structural Geology F.L. Richards,N.J. Richardson,S.J. Rippington,R.W. Wilson,C.E. Bond ,2015-10-22 The practical application of structural geology in industry is varied and diverse it is relevant at all scales from plate wide screening of new exploration areas down to fluid flow behaviour along individual fractures From an industry perspective good structural practice is essential since it feeds into the quantification and recovery of reserves and ultimately underpins commercial investment choices Many of the fundamental structural principles and techniques used by industry can be traced back to the academic community and this volume aims to provide insights into how structural theory translates into industry practice Papers in this publication describe case studies and workflows that demonstrate applied structural geology covering a spread of topics including trap definition fault seal fold and thrust belts fractured reservoirs fluid flow and geomechanics Against a background of evolving ideas new data types and advancing computational tools the volume highlights the need for structural geologists to constantly re evaluate the role they play in solving industrial challenges

Workers' Earnings and Corporate Economic Structure Randy Hodson,2014-05-10 *Workers Earnings and Corporate Economic Structure* investigates the role of economic structure in determining employees

earnings and how workplace organization contributes to social inequality The study focuses on the characteristics of the organization of capital rather than on different management styles or systems Earnings as a key labor force outcome are examined at both the industry and company levels of economic organization Comprised of nine chapters this volume begins with an overview of economic explanations for the diversity of wage labor in advanced capitalist countries and whether the labor market in the United States is structured by the organizational characteristics of capital The discussion then turns to the dual economy model of industrial structure an alternative resource approach to the study of organizational structure and labor segmentation and enterprise and industry level sectoral models of economic structure Subsequent chapters explore the relationship between the sectoral models and poverty class position and racial and gender groups the ability of the sectoral models to explain workers earnings and select continuous variable models of the impact of economic structure on workers earnings earnings determination within economic sectors and the impact of economic structure across class occupational and status groups The final chapter offers concluding thoughts and reflections and integrates the insights derived from the study of industrial structure with themes from the broader field of social stratification This book will be of interest to economists sociologists and workers and industry officials

Socio-Economic Models in Geography (Routledge Revivals) Richard Chorley, Peter Haggett, 2013-10-14 First published in 1968 this book explores the theme of geographical generalization or model building It is composed of seven of the chapters from the original *Models in Geography* published in 1967 The first chapter broadly outlines this theme and examines the nature and function of generalized statements ranging from conceptual models to scale models in a geographical context The following six chapters deal with socio economic building in geography They focus on demographic and sociological models as well as looking at special aspects of models in human geography in reference to economic development urban geography and settlement location industrial location and agricultural activity This book represents a robustly anti idiographic statement of modern work in one of the major branches of geography

The Industrial Structure of American Cities Gunnar Alexandersson, 2015-04-10 This book analyzes the distribution of the urban population in an industrialized country The USA was chosen as the object of the study because it had at the time of writing in 1956 the largest population for which homogeneous and comparable statistics were available The first step in the quantitative analysis of population distribution according to the method suggested here is the breaking up of the total population into its components the industries in which people earn their living Extensive maps support the text as it discusses the problem of industrial location which has attracted much attention from geographers and economists
