Modern Architecture in Europe Dennis J. De Witt, Elizabeth R. De Witt, 1987 Modern Architecture in Europe Dennis J. De Witt, Elizabeth R. De Witt, 1987 Organic Design in Twentieth-Century Nordic Architecture Erik Champion, 2019-02-18 Organic Design in Twentieth Century Nordic Architecture presents a communicable and useful definition of organic architecture that reaches beyond constraints The book focuses on the works and writings of architects in Nordic countries such as Sigurd Lewerentz J rn Utzon Sverre Fehn and the Aaltos Aino Elissa and Alvar among others It is structured around the ideas of organic design principles that influenced them and allowed their work to evolve from one building to another Erik Champion argues organic architecture can be viewed as a concerted attempt to thematically unify the built environment through the allegorical expression of ongoing interaction between designer architectural brief and building as process With over 140 black and white images this book is an intriguing read for architecture students and professionals alike Encyclopedia of Twentieth Century Architecture R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclope dia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century s vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries George & Edward Blum Andrew D. Dolkart, Susan Tunick, 1993 This publication reveals for the first time the singular contribution that the architects George Edward Blum made to the design of the New York apartment building The Blums buildings designed between 1910 1930 are superbly embellished with complex brick patterning are highlighted by unusual detail in terra cotta art tile This book investigates the influence of Parisian design on the Blums work places their apartment houses within the larger context of residential development in New York City It also explores the varied designs innovative handling of decorative materials found in these in buildings **A History of Architecture and Trade** Patrick Haughey, 2018-01-19 A History of Architecture and Trade draws together essays from an international roster of distinguished and emerging scholars to critically examine the important role architecture and urbanism played in the past five hundred years of global trading moving away from a conventional Western narrative The book uses an alternative holistic lens through which to view the development of architecture and trade covering diverse topics such as the coercive urbanism of the Dutch East India Company how slavery and capitalism shaped architecture and urbanization and the importance of Islamic trading in the history of global trade Each chapter examines a key site in history using architecture landscape and urban scale as evidence to show how trade has shaped them It will appeal to scholars and researchers interested in areas such as world history economic and trade history and architectural history **The**

Publishers Weekly ,1917 **Construction Index** ,1992 Atlas of World Art John Onians,2004 Combines a survey of world art with maps showing the associations and dissemination of culture across the globe **Arthur H. Vinal / Edmund March Wheelwright and the Chestnut Hill Pumping Station** Dennis J. De Witt,2016 This book arose from a need to understand one of late nineteenth century Boston s most prominent buildings the Chestnut Hill High Service Pumping Station now the Metropolitan Waterworks Museum It considers how such a municipally designed high style Richardsonian Romanesque yet also industrial building came into existence Arthur H Vinal and Edmund March Wheelwright its two architects working a decade apart in 1884 88 and 1898 99 respectively left a seamlessly unified building They were never partners nor colleagues But almost sequentially in 1884 88 and 1891 95 respectively each was given charge of the same large municipal architectural office Each also began his professional career again almost in sequence with same important firm Peabody Sterns after which each left Boston for a few years before returning Wheelwright and Vinal came from different backgrounds and arguably had differing sensibilities Vinal s generally preferred style as City Architect was Richardsonian Romanesque a mode Wheelwright never employed except when extending Vinal s Chestnut Hill Pumping Station Remarkably the written record suggests these two architects had no other connections despite having both practiced throughout their careers in the guild like world of Boston s late nineteenth to early twentieth century architectural profession They only had in common the Chestnut Hill High Service Pumping Station and the distinction of having been for approximately four highly productive years each Boston s City Architect There has been no previous study of either architect s work In Vinal s case except for his time as City Architect his career and life left a scant written record Almost none of his work was published It is primarily known to us through municipal records advertisements for constructor bids and occasional references in newspaper articles Other than his term as City Architect which produced the major portion of the Chestnut Hill Pumping Station and a remarkable number of municipal buildings in a short time his career was little different from those of many other successful now largely forgotten architects who contributed to the fabric of an expanding metropolitan Boston during its so called Golden Age from the Civil War through the First World War Most of what he produced was conservative well constructed row housing plus some multi story buildings containing the then still novel French flats In contrast Wheelwright s work was published He was active and well respected at the highest levels of the profession locally and nationally Far more is known of his life and practice Even in the relatively conservative milieu of metropolitan Boston his work could not generally be called dramatic although there were exceptions Rather than simply representing an aesthetic exercise his architecture was also informed by his predisposition to political and social reform Perhaps as a result while not unknown he has not received the attention he deserves The present study for the most part tells its stories visually It is heavily illustrated In addition to Vinal and Wheelwright a third actor is touched upon that is the City Architect s Office with its patronage and professional practice and its evolution over the two decades having been initially created as a good government reform in

1874 and finally abolished with Wheelwright's support for similar reasons in 1895. Without it, neither architect could have designed and built the prodigious number of buildings credited to them during their tenures. Lastly, this volume includes an attempt to produce catalogs raisonnés of Vinal's and Wheelwright's known bodies of work, which in each case, research for this study has significantly expanded.
