Modern Australia In Documents 1901 1939 Volume L:

Sir William Rooke Creswell and the Foundation of the Australian Navy Sheila Dwyer, 2014-03-26 The six Australian colonies united on 1st January 1901 to become the Commonwealth of Australia One of the reasons given for this federation was that the Commonwealth could provide a common defence William Rooke Creswell argued that as an island continent Australia could not defend itself without a navy He saw no point in having a 70 000 strong army if only one enemy battleship could destroy port cities and disrupt maritime trade and sea communications Creswell was not alone in his campaign to establish a navy for Australia but he was the one constant advocate throughout the years from his first proposals on a navy for Australia in 1886 to when the first ships of the Australian Fleet sailed into Sydney Harbour in October 1913

National Identity and Social Cohesion in a Time of Geopolitical and Economic Tension: Australia - European Union - Slovenia Robert Walters, 2020-02-26 This book aims to enrich the thinking and discussion in relation to the importance that citizenship immigration rights and private laws play in the modern world This is in a time when social cohesion and national identity is being challenged It will explore the impact these laws have had on Australia European Union EU and Slovenia Identity and social cohesion are contested concepts and can invoke different responses The challenges states and the EU are likely to face in retaining and even strengthening their respective identities and social cohesion from continued geopolitical shocks security economic volatility and environmental degradation is likely to be formidable These alone pose some of the most complex political and policy issues facing the world The EU can be held up as a polity that has developed an identity and level of cohesion while allowing member states to retain their national identities It has to date also been successful in managing the rise of nationalism However that has come under threat in recent times Thus the very foundations of liberal democracy could be diluted from the impact of these challenges Moreover the basic foundations of rights have in part already been diluted from the rise of terrorism which is acceptable however the geopolitical differences pose a significant challenge in and of themselves Uncertain Dimensions Raymond F. Betts, 1985 Uncertain Dimensions was first published in 1985 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions World War I battered the Western imperial systems and destroyed one that of Germany but it did not sound the death knell of an empire The scramble for overseas territory has reached a virtual conclusion shortly before the war afterwards the main business of empire was to ensure a pax colonia the often contradictory goals of a stable government and The Ethics and Politics of Asylum Matthew J. Gibney, 2004-07-08 Over the last two decades asylum has become a highly charged political issue across developed countries This book draws upon political and ethical theory and an examination of the experiences of the United States Germany the United Kingdom and Australia to consider how to respond to the challenges of asylum In addition to explaining why asylum has emerged as such a key political issue it provides a compelling account of how states

could move towards implenting morally defensible responses to refugees **Subject Catalog, 1980** Library of Congress,1980 **Fears and Fantasies** Kate Murphy,2010 Fears and Fantasies Modernity Gender and the Rural Urban Divide explores the ways in which fantasies about returning to or revitalising rural life helped to define Western modernity in the early twentieth century Scholarship addressing responses to modernity has focused on urban space and fears about the effects of city life few studies have considered the rural to be as critical as the urban in understanding modernity This book argues that the rural is just as significant a reference point as the urban in discourses about modernity Using a rich Australian case study to illuminate broader international themes it focuses on the role of gender in ideas about the rural urban divide showing how the country was held up against the unnatural city as a space in which men were more masculine and women more feminine Fears and Fantasies is an innovative and important contribution to scholarship in the fields of history and gender studies Imagined Country John Rennie Short,2005-11-15 Explores the relationship between society and the physical world through representation the artistic re creation of the physical world which reflects interpretation

Smithers,2013-02-01 This book combines transnational history with the comparative analysis of racial formation and reproductive sexuality in the settler colonial spaces of the United States and British Australia Specifically the book places whiteness and the changing definition of what it meant to be white in nineteenth century America and Australia at the center of our historical understanding of racial and sexual identities In both the United States and Australia whiteness was defined in opposition to the imagined cultural and biological inferiority of the Indian Negro and Aboriginal savage Moreover Euro Americans and Euro Australians shared a common belief that whiteness was synonymous with the extension of settler colonial civilization Despite this two very different understandings of whiteness emerged in the nineteenth century The book therefore asks why these different racial understandings of whiteness and the quest to create culturally and racially homogeneous settler civilizations developed in the United States and Australia
