Modern Diplomacy Of Capitalistic Powers:

Modern Diplomacy of Capitalist Powers Andrei A. Gromyko, 2016-04-20 Modern Diplomacy of Capitalist Powers details the problems in bourgeois diplomacy The book is comprised of 11 chapters that cover the international relation policy of a great power The text first discusses the characteristics and distinctive features of imperialist foreign policy in the 70s and early 80s The next chapters deal with the diplomacy of major world powers which include U S France Federal Republic of Germany Great Britain and Italy The next two chapters cover eastern powers namely China and Japan Chapter 9 tackles the diplomacy of capitalist countries and the disarmament problem The 10th chapter discusses the diplomacy of the western powers and European security while the last chapter details the diplomacy of the developed capitalist countries and the United Nations organization The book will be of great use to individuals who have a keen interest in international diplomacy particular the diplomatic pattern of the global superpowers

Theories of Power and Domination Angus Stewart, 2001-03-20 Power and domination are central concepts in social science yet up to now they have been undertheorized This wide ranging book guides students through the complexities and implications of both concepts It provides systematic accounts of current debates about the dynamics and rationale of state power in an era of globalization social citizenship and the significance of social movements The contributions of Parsons Giddens Foucault Mann Arendt Habermas and Castells are clearly set out and critically assessed

Corporate Power and Ownership in Contemporary Capitalism Susanne Soederberg, 2009-09-14 This book examines neoliberal corporate power within the context of the American political economy and its relationship to emerging market economies in order to understand the global dimensions of the corporate financial binary

The Ashgate Research Companion to Modern Theory, Modern Power, World Politics Nevzat Soguk, Scott G Nelson, 2016-04-28 Deliberately eschewing disciplinary and temporal boundaries this volume makes a major contribution to the de traditionalization of political thinking within the discourses of international relations Collecting the works of twenty five theorists this Ashgate Research Companion engages some of the most pressing aspects of political thinking in world politics today The authors explore theoretical constitutions critiques and affirmations of uniquely modern forms of power past and present Among the themes and dynamics examined are textual appropriation and representation materiality and capital formation geopolitical dimensions of ecological crises connections between representations of violence and securitization subjectivity and genderization counter globalization politics constructivism biopolitics post colonial politics and theory as well as the political prospects of emerging civic and cosmopolitan orders in a time of national religious and secular polarization Radically different in their approaches the authors critically assess the discourses of IR as interpretive frames that are indebted to the historical formation of concepts and to particular negotiations of power that inform the main methodological practices usually granted primacy in the field Students as well as seasoned scholars seeking to challenge accepted theoretical frameworks will find in these chapters fresh insights into contemporary world political

problems and new resources for their critical interrogation

AI Surveillance and its Impact on Global Power

Structure Arun Teja Polcumpally, 2025-09-26 This book explores AI's geopolitical impact particularly its influence on global power structures and the interplay between states and private companies. It explores whether Neo Realism or Neo Gramscian theory better explains the effects of AI surveillance. Two hypotheses are examined: first, China's export of AI surveillance will challenge the U.S.'s superpower status; second, private companies will surpass states in power through AI. The research supports the first hypothesis but finds limited evidence for the second. Using congruence analysis, it evaluates these theories with data from reports, indices, and policy papers. Findings show Neo Realism aligns with observations emphasizing state to remain as the primary agency in conducting international relations. In contrast, Neo Gramscian theory underlines interactions between world order and social factors and hits at the emergence of private companies as new agencies in explicitly conducting international relations. However, there is limited evidence to support structural shifts within the state that provides greater influence to AI or platform companies. The book critiques both theories, highlighting their limitations in addressing AI's general purpose nature, emergent agencies, and socio-political transformations. Policy recommendations include robust domestic AI legislation, international collaboration, and a governance body representing states, industry, and the public to ensure balanced AI geopolitics and governance.

Rotary International and the Selling of American

Capitalism Brendan Goff, 2021-07-06 A new history of Rotary International shows how the organization reinforced capitalist values and cultural practices at home and tried to remake the world in the idealized image of Main Street America. Rotary International was born in Chicago in 1905. By the time World War II was over, the organization had made good on its promise to girdle the globe. Rotary International and the Selling of American Capitalism explores the meteoric rise of a local service club that brought missionary zeal to the spread of American style economics and civic ideals. Brendan Goff traces Rotary's ideological roots to the business progressivism and cultural internationalism of the United States in the early twentieth century. The key idea was that community service was intrinsic to a capitalist way of life. The tone of service above self was often religious, but as Rotary looked abroad, it embraced Woodrow Wilson's secular message of collective security and international cooperation. Civic internationalism was the businessman's version of the Christian imperial civilizing mission performed outside the state apparatus. The target of this mission was both domestic and global. The Rotarian, the organization's publication, encouraged Americans to see the world as friendly to Main Street values, and Rotary worked with U.S. corporations to export those values. Case studies of Rotary activities in Tokyo and Havana show the group paving the way for encroachments of U.S. power, economic, political, and cultural during the interwar years. Rotary's evangelism on behalf of market-friendly philanthropy and volunteerism reflected a genuine belief in peacemaking through the world's parliament of businessmen. But as Goff makes clear, Rotary also reinforced American power and interests, demonstrating the tension at the core of U.S.-led internationalism.

Geocultural Power Tim Winter, 2019-09-30 Launched in 2013, China's Belt and Road

Initiative is forging connections in infrastructure trade energy finance tourism and culture across Eurasia and Africa This extraordinarily ambitious strategy places China at the center of a geography of overland and maritime connectivity stretching across more than sixty countries and incorporating almost two thirds of the world s population But what does it mean to revive the Silk Roads for the twenty first century Geocultural Power explores this question by considering how China is couching its strategy for building trade foreign relations and energy and political security in an evocative topography of history Until now Belt and Road has been discussed as a geopolitical and geoeconomic project This book introduces geocultural power to the analysis of international affairs Tim Winter highlights how many countries including Iran Sri Lanka Kenya Malaysia Indonesia Pakistan and others are revisiting their histories to find points of diplomatic and cultural connection Through the revived Silk Roads China becomes the new author of Eurasian history and the architect of the bridge between East and West In a diplomatic dance of forgetting episodes of violence invasion and bloodshed are left behind for a language of history and heritage that crosses borders in ways that further the trade ambitions of an increasingly networked China driven economy

Globalization and Capitalist Geopolitics Daniel Woodley,2017-11-27 Globalization and Capitalist Geopolitics is concerned with the nature of corporate power against the backdrop of the decline of the West and the struggle by non western states to challenge and overcome domination of the rest of the world by the West This book argues that although the US continues to preside over a quasi imperial system of power based on global military preponderance and financial statecraft and remains reluctant to recognize the realities global economic convergence the age of imperial state hegemony is giving way to a new international order characterized by capitalist sovereignty and competition between regional and transnational concentrations of economic power This title seeks to interrogate the structure of world order by examining leading approaches to globalization and political economy in international relations and international political economy Breaking with the classical school Woodley argues that geopolitics should be understood as a transnational strategic practice employed by powerful state actors which mirrors predatory corporate rivalry for control over global resources and markets reproducing the structural conditions for corporate power through the transnational state form of capital In a period of increasing geopolitical insecurity and economic instability this title provides an authoritative yet accessible commentary on debates on capitalism and globalization in the wake of the financial crisis It is valuable resource for students and scholars seeking to develop a deeper understanding of the historical determinants of the changing dynamics of neoliberal capitalism and their implications for world order

The Great Power Competition Volume 6 Adib Farhadi,Mark Grzegorzewski,Anthony J. Masys,2025-01-13 China s Belt and Road Initiative BRI represents a monumental shift in the global power landscape Through ambitious infrastructure projects and strategic economic investments China has emerged as a formidable challenger to U S dominance in the modern Great Power Competition GPC leveraging a unique blend of soft

power and non interference policy This distinctive strategy has allowed China to rapidly gain footholds in resource rich regions such as Central Asia South Asia CASA and the Middle East compelling the U S to rethink its foreign policy approach in response Given China s adept leveraging of soft power in these geostrategic regions the critical question arises how can the U S meet the nuanced challenges of the modern GPC The Great Power Competition Volume 6 The Rise of China delves into China s calculated rise exploring how the BRI has captivated nations spanning pivotal regions entrenching Chinese influence across critical sectors This edited volume brings together distinguished global experts and thought leaders to provide comprehensive analyses of China s expanding influence across economic political technological and security domains The collection of essays offers critical insights and recommendations for navigating the modern day great power competition in an era defined by China s ascent The book highlights China s BRI brand diplomacy and its strategic use of soft power and non interference policy to reshape the geopolitical landscape The authors final analyses underscore that in the modern era of the GPC strategic competition and soft power are deeply intertwined
