Excerpt from Modern Economic Thought The American Contribution The movement to reconstruct economics was well established in the United States long before 1929 By 1914 Thorstein Veblen had unfolded the major features of his evolutionary or cultural version of economics In the years before the outbreak of World War I Veblen's disciples who then included Wesley C Mitchell Robert F Hoxie Walton H Hamilton and other less well known economists were enthusiastic in their defense of the new economics which came to be known as institutional economics 2 Academic interest in the new version of economics became so widespread by 1918 that one of the round table conferences of the annual meeting of the American Economic Association of that year was devoted to the topic of institutional economic theory 3 By 1921 Veblen's institutional economics appears to have reached the high level mark of its popularity In the years of prosperity which followed the depression of 1920-21 the movement to reconstruct economics continued to add new members to its list of advocates but it did not slavishly follow the lines drawn in earlier years by Thorstein Veblen Younger exponents of economic heterodoxy such as John M Clark and Rexford G Tugwell brought new emphases to the work of revamping economic thought These new members of the group of economists who were interested in modernizing economic science were prone to be somewhat less speculative and more concerned with immediate economic and social issues than was Veblen They were more willing to envision economic reform within the limits of the existing private enterprise system Furthermore they began to find various parts of the Veblenian interpretation somewhat outmoded This is not to say however that these younger revisionists of the postwar period had developed a basic approach to economic studies which was different from Veblen's approach On the contrary their work was in its essentials within the Veblenian tradition Like the pioneering leader of the movement to revamp economics About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

The Evolution of Modern Economic Theory Carl Cone, Lionel Robbins, 2017-09-22 The long paper which gives the title to this collection and which has never before been published as paperback was initially an attempt to promote international academic understanding The Economics Department at the London School of Economics had arranged a colloquy between two groups of Russian and British economists and where the author asked to contribute a general survey of the present state of economic theory as taught in Western centers For reasons which are explained in the opening section the author decided to adopt an historical approach and the notes on which the present paper is based were the result The remainders of the papers have as their common denominator a continuing interest in the history of economic thought Beginning with a lengthy critique of Schumpeter's magisterial History of

Economic Analysis they range from an appraisal of Bentham's continuing relevance to a review of Robertson's Lectures on Economic Principles with some special attention to John Stuart Mill both as a human being and as an economist. They have been written at various times in the last thirty five years and minute scrutiny if such were thought to be worthwhile which of course it is not might detect some variations of emphasis particularly perhaps in the implicit valuations of Marshall and his contribution in the papers on Wicksteed and Schumpeter's History respectively. But in spite of a certain shift of perspective here the author thought it worthwhile to attempt substantial redrafting. Apart from the correction of obvious inelegances or actual errors the excision of some duplicating quotations and in a few cases the addition of supplementary material and references the papers are reproduced as originally written. In each instance the author has given footnote acknowledgements of the place of original publication.

Postmodern Moments in Modern Economics David F. Ruccio, Jack Amariglio, 2016-06-28 Of all the areas of contemporary thought economics seems the most resistant to the destabilizing effects of postmodernism. Yet David Ruccio and Jack Amariglio argue that one can detect within the diverse schools of thought that comprise the discipline of economics moments that defy the modernist ideas to which many economists and methodologists remain wedded. This is the first book to document the existence and to explore the implications of the postmodern moments in modern economics. Ruccio and Amariglio begin with a powerful argument for the general relevance of postmodernism to contemporary economic thought. They then conduct a series of case studies in six key areas of economics. From the idea of the multiple self and notions of uncertainty and information through market anomalies and competing concepts of value to analytical distinctions based on gender and academic standing economics is revealed as defying the modernist frame of a singular science. The authors conclude by showing how economic theory would change if the postmodern elements were allowed to flourish. A work of daring analysis sure to be vigorously debated Postmodern Moments in Modern Economics is both accessible and relevant to all readers concerned about the modernist straightjacket that has been imposed on the way economics is thought about and practiced in the world today.
