Black, 2020-07-06 Mythology for centuries has served as humanity's window into understanding its distant past In our modern world storytelling creates its own myths and legends in media ranging from the world of television and cinema to literature and comic books that help us make sense of the world we live in today What is the Mytharc How did it arise How does it inform modern long form storytelling How does the classical hero's journey intersect with modern myths and narratives And where might the storytelling of tomorrow take readers and viewers as we imagine our future From *The X-Files* to H.P. process of canon formation from three unusual and complementary angles The first two chapters discuss historical attitudes to canons from antiquity onwards showing the religious aesthetic cultural and political interests which have shaped our modern critical canons Each of the four succeeding chapters examines an exemplary modern defendant interpreter or critic of canons Ernst Gombrich Northrop Frye Frank Kermode and Edward Said A final chapter considers the origins and rationale of the contemporary debate emphasizing the disciplinary and aesthetic problems we must confront if our cultural institutions are to meet the changing needs of the next century The Inklings, the Victorians, and the Moderns Christopher Butynskyi, 2020-01-28 In *The Inklings, the Victorians, and the Moderns* the author examines the dynamics of a small group of twentieth century traditionalists who reacted in opposition to the spirit of the intellectual movements of the modern age In particular he draws on the Inklings e g C S Lewis J R R Tolkien Christian humanists such as G K Chesterton and other proponents of the Great Books and classical liberal learning to outline a position that eschewed reactionary rejections of modern thought but sought to transcend its perceived limitations by asserting the continued value of myth religion liberal education and ancient texts They were more than instigators and wished to reconcile and translate conservative traditional ideas within a progressive modern scientific context The author magnifies the intellectual trends in modern Western thought in the twentieth century and provides the historical context for the resistance to the prominent and convincing tenets of modernity Given the myriad responses he focuses on a more conservative response to reductive definitions born out of well intentioned progressivism The author approaches the subject matter from an historical perspective but utilizes an interdisciplinary discourse to create a multi dimensional explanation of the intellectual atmosphere of the twentieth century
