Relative Tense and Aspectual Values in Tibetan Languages Bettina Zeisler, 2011-06-24 This study presents a comparative approach to a universal theory of TENSE ASPECT and MOOD combining the methods of comparative and historical linguistics fieldwork text linguistics and philology

The parts of the book discuss and describe i the concepts of TENSE ASPECT and MOOD ii the Tibetan system of RELATIVE TENSE and aspectual values with main sections on Old and Classical Tibetan Lhasa Tibetan and East Tibetan Amdo and Kham and iii West Tibetan Ladakhi Purik Balti Part iv presents the comparative view Discussing the similarities and differences of temporal and aspectual concepts the study rejects the general claim that ASPECT is a linguistic universal A new linguistic concept FRAMING is introduced in order to account for the aspect like conceptualisations found in e g English The concept of RELATIVE TENSE or taxis may likewise not be universal Among the Tibetan varieties West Tibetan is unique in having fully grammaticalized the concept of ABSOLUTE TENSE West Tibetan is compared diachronically with Old and Classical Tibetan documented since the mid 8th century and synchronically with several contemporary Tibetan varieties The grammaticalized forms of each variety are described on the basis of their employment in discourse The underlying general function of the Tibetan verbal system is thus shown to be that of RELATIVE TENSE Secondary aspectual functions are described for restricted contexts A special focus on the pragmatic or metaphorical use of present tense constructions in Tibetan leads to a typology of narrative conventions The last part also offers some suggestions for the reconstruction of the Proto Tibetan verb system

Modern oral Amdo Tibetan, 2000 **A Linguistic Philosophy of Language** Paul Richard Rastall, 2000 This work draws out the philosophical implications of European functionalist linguistics It contains an account of human linguistic capacities through considering the role of languages in overall semiotic behaviour and the nature of our models of language and languages It is particularly concerned with the nature of linguistically conveyed messages and their role in consciousness and with the methods for their understanding The implications are related to an emergent anthropocentric philosophy and to metaphysics epistemology in the wider sense the philosophy of science and ethics There is a special consideration of the limitations on human understanding which are due to the nature of our linguistic communication and our methods of analysis

Studia Orientalia, 2007 *A Cognitive Approach to the Semantics of the German Passive* Carlee Arnett, 2004 Hopper Thompson s 1980 seminal article on transitivity brought forth renewed interest in the passive and other correlates of transitivity Langacker 1982 and others working with the Cognitive Grammar CG framework argue that the passive voice is an independent construction and that it is not a reorganization of the active voice Language specific problems for the German passive include the use of the dative case to mark certain passive participants passives formed from verbs and preposition combinations and impersonal passives This study provides a semantic analysis of all the types of passive constructions found in German and shows that these construction types are related A corpus of written data is used and the focus is on radial categories of meaning in Modern German

The Interrelations of Syntax, Narrative Structure, and Prosody in a Berber Language Clive W. McClelland, 2000 This study is a systematic investigation of the links among prosody clause structure and discourse pragmatics in four oral narratives of Tarifit a VSO Berber language spoken in northeastern Morocco It is a new method of empirical analysis of language utilizing a unique

combination of sound analysis statistics grammar and story structure Using the speech analysis program Signalize levels of amplitude fundamental frequency length and speed were analyzed In addition factors relating to clause structure and discourse pragmatics were quantified The results of this investigation support some but not all claims of previous researchers and reveal numerous additional interrelations not previously noted These results suggest that prosody in relation to discourse pragmatics and clause structure may be a rich field of future linguistic endeavor They also contribute to greater knowledge of a little known language in North Africa
