Ulcer and Non-Ulcer Dyspepsias M. Lancaster-Smith, 2012-12-06 Backing up the pioneering medical researchers and experimenters are the phalanxes and cohorts of practising clinicians in district general hospitals and in general practice who may have to implement and apply any breakthroughs and advances in practical and realistic terms. This they cannot and should not be expected to do without careful consideration and analysis. It is essential therefore to have regular reviews of the growing points of medicine which are constructively critical as well as being enthusiastic and which can present the issues and implications clearly and fairly to clinicians. The Practical Clinical Medicine series is designed to provide such regular reviews on selected subjects. Each volume is under the charge of an invited editor who selects his team of 4-6 experts. Each contribution is an authoritative, detailed and referenced examination of his topic, clearly presented in an understandable manner and is practical, relevant and applicable to everyday clinical practice. The series is intended as a means of communication between researchers and practising clinicians. It is dedicated to generalists who provide primary health care in general practice and to generalists providing secondary medical care in district vii viii Series Editors Foreword general hospitals. Both are involved in applying good general practical clinical medicine for their patients but can only succeed in a climate of constant review and examination.

Abbruzzese,2004 In 74 chapters Gastrointestinal Oncology brings together a diverse group of specialists to provide the most authoritative up to date and encyclopedic volume currently available on the subject The first part of this text introduces a

series of concepts and topics that are important to gastrointestinal malignancies in general. These topics include epidemiologic principles, prevention, screening, familial GI cancers, developmental and molecular biology, pathobiology, general therapeutic principles, emerging therapies, and palliative care. The second part of the book covers each of the specific cancers affecting the human gastrointestinal tract. These chapters are introduced by state-of-the-art discussions outlining our current understanding of the pathobiology and molecular biology relevant to each cancer. Subsequent sections describe the multidisciplinary management of specific clinical situations. By organizing the treatment-related chapters around clinical scenarios, the reader will readily find the information necessary to effectively manage the complex clinical situations encountered by patients with gastrointestinal malignancies. Specialist Training in Gastroenterology and Liver Disease Richard G. Long, Brian B. Scott, 2005. Written for doctors starting their career in gastroenterology, this text presents a succinct account of the subject, concentrating on diagnostic techniques, treatment, and management. Throughout, use is made of colour photographs, drawings, lists, and tables. The aim is to provide a bridge between introductory undergraduate texts and the very large and expensive major reference works. Evidence-based treatment options are given, are integrated, and referenced. A detailed list of further reading is also provided.

Gastrointestinal Bleeding Joseph J. Y. Sung, Ernst Kuipers, Alan Barkun, 2012-02-06. There have been many advances in the management of this condition since the first edition of *Gastrointestinal Bleeding*. This new edition, thoroughly revised and restructured, includes the latest updates on all areas of the field of GI bleeding, systematically covering all the areas of the GI tract from upper GI to lower GI through to small bowel bleeding. It fully covers the different types of bleeding that can occur from peptic ulcer through to variceal bleeding and looks at new developments and pioneering techniques in the field, including endoscopy and balloon enteroscopy. A methodology section describes the latest design of clinical trials in GI bleeding, and this edition now highlights the new guidelines on UGIB (Upper gastrointestinal bleeding). This new edition of *Gastrointestinal Bleeding* is an invaluable purchase for all gastroenterologists, both in training and fully qualified.
