Modern World:

The Origins of the Modern World Robert B. Marks, Robert Marks, 2007 The Origins of the Modern World offers a refreshing alternative to Eurocentric histories by exploring the roles that Asia Africa and the New World played in creating the world we know today Starting in 1400 it brings the saga of the modern world to the present considering how and why the United States emerged as a world power in the 20th century and why Asia is experiencing resurgence now The Origins of the Modern World Robert B. Marks, 2006-07-27 This clearly written and engrossing book presents a global narrative of the origins of the modern world from 1400 to the present Unlike most studies which assume that the rise of the West is the story of the coming of the modern world this history drawing upon new scholarship on Asia Africa and the New World constructs a story in which those parts of the world play major roles Robert B Marks defines the modern world as one marked by industry the nation state interstate warfare a large and growing gap between the wealthiest and poorest parts of the world and an escape from the biological old regime He explains its origins by emphasizing contingencies such as the conquest of the New World the broad comparability of the most advanced regions in China India and Europe the reasons why England was able to escape from common ecological constraints facing all of those regions by the 18th century and a conjuncture of human and natural forces that solidified a gap between the industrialized and non industrialized parts of the world Now in a new edition that brings the saga of the modern world to the present the book considers how and why the United States emerged as a world power in the twentieth century and became the sole superpower by the twenty first century Once again arguing that the rise of the United States to global hegemon was contingent not inevitable Marks also points to the resurgence of Asia and the vastly changed relationship of humans to the environment that may in the long run overshadow any political and economic milestones of the past hundred years *Modern World History* Dan Allosso, Tom Williford, 2021 **Priesthood in the Modern World** Karen Sue Smith, 1999 Coming to terms with more than cultural shifts and grim statistics this collection of essays looks at the challenge of priestly ministry that is collaborative and communal *History of the Modern World* Hutton Webster, 1925 **Science and the Modern World** Alfred North Whitehead, 1967 Alfred North Whitehead's Science and the Modern World originally published in 1925 redefines the concept of modern science Taking readers through the history of modern science Whitehead shows how cultural history has affected science over the ages in relation to such major intellectual themes as romanticism relativity quantum theory religion and movements for social progress *The Origins of the Modern World* Robert B. Marks, 2024-01-02 This clearly written and engrossing book presents a global narrative of the origins of the modern world from 1400 to the present Unlike most studies which assume that the rise of the West is the story of the coming of the modern world this history drawing upon new scholarship on Asia Africa and the New World and upon the maturing field of environmental history constructs a story in which those parts of the world play major roles including their impacts on the environment Robert B Marks defines the modern world as one marked by industry the nation state

interstate warfare a large and growing gap between the wealthiest and poorest parts of the world increasing inequality within the wealthiest industrialized countries and an escape from the environmental constraints of the biological old regime He explains its origins by emphasizing contingencies such as the conquest of the New World the broad comparability of the most advanced regions in China India and Europe the reasons why England was able to escape from common ecological constraints facing all of those regions by the end of the eighteenth century a conjuncture of human and natural forces that solidified a gap between the industrialized and non industrialized parts of the world the mounting environmental crisis that defines the modern world and the ways in which the forces of globalization stress the economic and political underpinnings of the modern world Now in a new edition that brings the saga of the modern world to the present in an environmental context the book considers how and why the United States emerged as a world power in the twentieth century and became the sole superpower by the twenty first century and why the changed relationship of humans to the environment likely will be the hallmark of the modern era the Anthropocene Once again arguing that the US rise to global hegemon was contingent not inevitable Marks also points to the resurgence of Asia and the vastly changed relationship of humans to the environment that may in the long run overshadow any political and economic milestones of the past hundred years *Remaking the Modern World 1900 - 2015* C. A. Bayly, 2018-07-16 The sequel and companion volume to C A Bayly's ground breaking *The Birth of the Modern World 1780 1914* this wide ranging and sophisticated study explores global history since the First World War offering a coherent comparative overview of developments in politics economics and society at large Written by one of the leading historians of his generation an early intellectual leader in the study of World History Weaves a clear narrative history that explores the themes of politics economics social cultural and intellectual life throughout the long twentieth century Identifies the themes of state capital and communication as key drivers of change on a global scale in the last century and explores the impact of those ideas Interrogates whether warfare was really the pre eminent driving force of twentieth century history and what other ideas shaped the course of history in this period Explores the causes behind the resurgence of local conflict rather than global scale conflict in the years since the turn of the millennium Delves into the narrative of inequality a story that has shaped and been shaped by the events of the last hundred years Part of The Blackwell History of the World Series The goal of this ambitious series is to provide an accessible source of knowledge about the entire human past for every curious person in every part of the world It will comprise some two dozen volumes of which some provide synoptic views of the history of particular regions while others consider the world as a whole during a particular period of time The volumes are narrative in form giving balanced attention to social and cultural history in the broadest sense as well as to institutional development and political change Each provides a systematic account of a very large subject but they are also both imaginative and interpretative The Series is intended to be accessible to the widest possible readership and the accessibility of its volumes is matched by the style of presentation and production **The Crisis of the**

Modern World René Guénon, 2001 It is no longer news that the Western world is in a crisis a crisis that has spread far beyond its point of origin and become global in nature In 1927 Ren Gu non responded to this crisis with the closest thing he ever wrote to a manifesto and call to action The Crisis of the Modern World was his most direct and complete application of traditional metaphysical principles particularly that of the age of darkness preceding the end of the present world to social criticism surpassed only by The Reign of Quantity and the Signs of the Times his magnum opus In the present work Gu non ruthlessly exposes the Western deviation its loss of tradition its exaltation of action over knowledge its rampant individualism and general social chaos His response to these conditions was not activist however but purely intellectual envisioning the coming together of Western intellectual leaders capable under favorable circumstances of returning the West to its traditional roots most likely via the Catholic Church or under less favorable ones of at least preserving the seeds of Tradition for the time to come

A Concise History of the Modern World William Woodruff, 1993-07-20 In an ever shrinking world the need for a global perspective in dealing with the modern world has become acute This book attempts to provide such a perspective by investigating the major changes in geopolitics and world economy during the past 500 years However compact it enables us to understand the present unravelling of Communism and the growing challenge from Asia to Western Superiority It is shown that in so many ways the problems of the contemporary world spring from the unprecedented era of western domination which the non western world is now trying to unlive

Religion and the Rise of History Leonard S. Smith, 2009-04-01 As a historical inquiry and synthesis this intellectual history is the first study to apply the ideal type or model building methodology of Otto Hintze 1861 1940 to Western historical thought or to what R G Collingwood called The Idea of History for it contains succinct and useful models for seeing and teaching classical Christian and modern professional historiography Religion and the Rise of History is also the first work to suggest that in addition to his well known paradoxical simul and or at the same time way of thinking and viewing life Martin Luther also held to a way that was deeply incarnational dynamic and or in with and under This dual vision and a Lutheran ethos strongly influenced Leibniz Hamann and Herder and was therefore a matter of considerable significance for the rise of a distinctly modern form of historical consciousness commonly called historicism in Protestant Germany Smith s essay suggests a new time period for the formative age of modern German thought culture and education The Cultural Revolution in Germany This age began in the early 1760s and culminated in 1810 with the founding of the University of Berlin the first fully modern and modernizing university This

university first became the recognized center for the study of history however through the work of Leopold von Ranke 1795
 1886 Here the story shows how a young Ranke derived his individualizing way of thinking and viewing life mainly from
 Luther how his life work is the best example in Western literature of the rise of history from a calling to a profession and how
 the three way discussion between Troeltsch Meinecke and Hintze concerning the nature of modern historical thought was of
 central importance for the reorientation of Western social historical thought in the twentieth century Global Handbook of
 Inequality Surinder S. Jodhka, Boike Rehbein, 2024-11-19 This handbook provides the most up to date and comprehensive
 review of the literature on inequality It provides comprehensive overviews of the main theoretical traditions concepts
 dimensions methodologies and contemporary debates around inequality as well as outlines of the situation of inequality in
 the world regions Each entry covers the most relevant literature on the respective topic and gives an introduction to the key
 discussions This authoritative reference work includes contributions from established and upcoming scholars based all over
 the world and is truly global in perspective It serves as a first introduction to the study of a particular field or issue related to

 aspects as well as the economic and quantitative aspects This is a must read reference volume for students researchers and
 professionals interested in this topic across the spectrum of the social sciences *Irish Poetry: Politics, History, Negotiation*
 S. Matthews, 1997-04-12 The award of the 1995 Nobel Prize for Literature to Seamus Heaney recognized not only the
 aesthetic achievement of his work but also its political urgency Here Steven Matthews presents a genealogy of Irish poetry
 which centres upon Heaney's recent preoccupation with the relations between poetry politics and history Writing from the
 perspective of Irish critical responses to the poetry he discusses a wide range of work from John Hewitt through Heaney
 himself to Paul Muldoon All of these poets have been inspired directly or indirectly by the situation in the North of Ireland
 Placing the poems in their historical context the author also analyses how these poets have reacted to the influence of W B
 Yeats This important book offers a new approach to Irish poetry linking it for the first time to the crucial political and
 historical events which lie at its centre **Crisis and Change Today** Peter Knapp, Alan Spector, 2011-01-16 Crisis and
 Change Today provides a solid introduction to Marxist social theory The work's unique voice is expressed in its Socratic
 dialogic approach structured around forty questions that students have about society and social change Topics range from
 theories of history economics unemployment racial oppression the state fascism the collapse of the Soviet bloc and points of
 convergence and difference between the dialectical approach and other approaches to social science The content and tone of
 the work invites students to evaluate various traditional and current explanations of social institutions and social processes
 and encourages them to weigh the debates and investigate further The first edition was very well received Distinguished
 Scholarship Award of the Section on Marxist Sociology of the ASA and the second edition has been thoroughly revised and
 updated to be relevant for students today Though the first edition was written during the wake of the fall of the Berlin Wall

and the collapse of the Soviet Union the growing gap between the rich and the poor and the economic crisis have generated more interest in using Marxist analysis both as a tool to analyze and understand capitalism and the weaknesses of past Marxist praxis *Transatlantic Trade and Global Cultural Transfers Since 1492* Martina Kaller, Frank Jacob, 2019-07-31 Access to new plants and consumer goods such as sugar tobacco and chocolate from the beginning of the sixteenth century onwards would massively change the way people lived especially in how and what they consumed While global markets were consequently formed and provided access to these new commodities that increasingly became important in the Old World especially with regard to the establishment early modern consumer societies This book brings together specialists from a range of historical fields to analyse the establishment of these commodity chains from the Americas to Europe as well as their cultural implications *Eduard Gans and the Hegelian Philosophy of Law* M.H. Hoffheimer, 1995-04-30 This volume provides the first sustained treatment of the legal theory of Eduard Gans 1789 1839 and the first translation of Gans s *Systems of Roman Civil Law in Outline* 1827 Hegel s close personal friend and recognized leader of the Hegelian movement Gans posthumously edited Hegel s *Philosophy of Law and Philosophy of History* As Professor of Law in Berlin Gans championed legal codification in opposition to Savigny and the Historical School of Jurisprudence Hoffheimer argues that Gans s legal writings especially his systematic exposition of Roman Law combined a brilliant application of Romanist legal scholarship with a creative original vision of Hegelian methodology The teacher of Karl Marx and Felix Mendelssohn Gans promoted a liberal interpretation of Hegel and influenced an important generation of German thinkers *Social Theory for Old and New Modernities* Franco Ferrarotti, 2008-07-01 Franco Ferrarotti s essays are of special interest to social scientists working in social theory and cultural sociology His insights are far reaching and applicable to those studying the areas of religion immigration violence and social movements *Key Ideas in Sociology* Martin Slattery, 2003 *Key Ideas in Sociology* provides a tour d horizon of the great sociological thinkers of the last two centuries their lives their main ideas and their influence on further thinking and practice in sociology Fifty key thinkers in sociology are represented both to give a sense of history to the development of the discipline and to exemplify the range of issues that have been covered Each essay concludes with an annotated Suggested Readings list and a General Bibliography is also provided *The Booklist* , 1927
