*Zeolite Characterization and Catalysis* Arthur W. Chester, E.G. Derouane, 2009-10-03 The idea for putting together a tutorial on zeolites came originally from my co editor Eric Derouane about 5 years ago I first met Eric in the mid 1980s when he spent 2 years working for Mobil R D at our then Corporate lab at Princeton NJ He was on the senior technical staff with projects in the synthesis and characterization of new materials At that time I managed a group at our Paulsboro lab that was responsible for catalyst characterization in support of our catalyst and process development efforts and also had a substantial group working on new material synthesis Hence our interests overlapped considerably and we met regularly After Eric moved back to Namur initially we maintained contact and in the 1990s we met a number of times in Europe on projects of joint interest It was after I retired from ExxonMobil in 2002 that we began to discuss the tutorial concept seriously Eric had semi retired and lived on the Algarve the southern coast of Portugal In January 2003 my wife and I spent 3 weeks outside of Lagos and I worked parts

of most days with Eric on the proposed content of the book We decided on a comprehensive approach that ultimately amounted to some 20 chapters covering all of zeolite chemistry and catalysis and gave it the title Zeolite Chemistry and Catalysis An integrated Approach and Tutorial      **Zeolites and Ordered Mesoporous Materials: Progress and Prospects** Jiri Cejka, 2005-08-09 Zeolites are the most frequently used industrial catalysts Their applications range from oil refining petrochemistry and the synthesis of special chemicals to environmental catalysis Rapid progress in basic research and the development of new processes has resulted in the first Federation of European Zeolite Associations FEZA School on Zeolites Zeolites and Ordered Mesoporous Materials Progress and Prospects reflects the programme of the first School on Zeolites held in Prague on August 20 21 2005 Readers gain insight into the synthesis of the ever expanding spectrum of zeolites zeotypes and ordered mesoporous materials including the use of zeolites and mesoporous materials as catalysts in organic conversions These range from the fascinating ship in bottle systems via cascade reactions to bulk applications in oil refining and petrochemistry Contributions from world experts enhance the book with select chapters on trends in the molecular sieves field zeolite structures ion exchange properties of zeolites advanced applications with unique technologies and opportunities and a chapter on natural zeolites Contains contributions from world experts in the field Includes an account of the frontier topic of high throughput techniques Reviews the application of quantum chemical methods to zeolite science to show the necessity of combining experimental and theoretical approaches
