Duffy,2019-05 Modern Automotive Technology for Maintenance and Light Repair is an easy to understand up to date textbook detailing the construction and operation of automobiles and light trucks It has been designed to help prepare aspiring technicians for exciting and productive careers in automobile technology It also provides the information needed to prepare for the ASE Maintenance and Light Repair certification test No longer can the untrained person effectively service and repair modern vehicles As technology has evolved even the most basic automotive systems have become increasingly complex Multiple on board computers are now used to monitor and control the engine transmission suspension brakes emission controls and other vital vehicle systems As the demand has grown for technicians

who can service and repair these increasingly sophisticated automotive systems so has the need for a learning solution that prepares students for entry level employment in this exciting field Modern Automotive Technology for Maintenance and Light Repair will give you the tools needed to begin your career in the challenging and ever changing world of automotive technology **Test Pack for Modern Automotive Mechanics** James E. Duffy, Florence A. Cloghessy, 1987-06-01

Modern Automotive Technology James E. Duffy, 2009 Details the construction operation diagnosis service and repair of late model automobiles and light trucks This comprehensive textbook uses a building block approach that starts with the fundamental principles of system operation and progresses gradually to complex diagnostic and service procedures Short sentences concise definitions and thousands of color illustrations help students learn quickly and easily This newly revised text provides thorough coverage of the latest developments in the automotive field including hybrid drive systems computer network communication and tire pressure monitoring systems Organized around the eight ASE automobile test areas Modern Automotive Technology is a valuable resource for students preparing for a career in automotive technology as well as experienced technicians who are preparing for the ASE certification tests Automotive Computer Network Repair Mandy Concepcion, Automotive Computer Network Repair Diagnostic Strategies of Modern Automotive Systems By Mandy Concepcion In this book we will cover the intricacies of automotive inter module communication systems or networks The scope of this section will also go beyond the normal needs of an automotive technician Hence this will probably be the most difficult part of this series to comprehend Be patient and open minded Always give yourself time to absorb the knowledge and do not be discouraged Special emphasis will be placed on the CAN system Controller Area Network since it is now the standard CAN is one of the 9 OBD 2 protocols A protocol is an agreement on communications interchange It is in essence a computer communication language and specifies signaling wiring size of cables used who controls the network and voltage levels Various protocols were used in the past some proprietary and some generic such as ISO 9141 and SAE 1850 VPW but the standard is now the CAN protocol Virtually all vehicle networks now talk to each other through the CAN protocol It is now common place to see the seat belt SRS Airbag transmission ABS Brakes engine and radio modules or computer talking to each other through the network Ever wondered why your radio volume goes up when you accelerate the vehicle That's the engine computer or module telling the radio to raise the volume due to a higher RPM and hence higher ambient noise It is also common to see a non shifting transmission due to a faulty network and the issue not being related to the transmission at all Hopefully this book will shed some light on the operation and knowledge needed to tackle automotive networks in today's vehicles Enjoy Table of Contents 1 INTRODUCTION Automotive inter module communication systems or networks Asian Domestic and European Vehicles Fully Networked vehicles 2 THE NEED FOR IN VEHICLE NETWORKING Use of electrical and electronic components Networked automotive sensors Sharing of sensor information Weight savings and the simpler wiring harnesses Networking and modular systems 3 THE NEED FOR PROTOCOLS CAN or Controller Area Network
