Modern Classical Optics:

Modern Classical Optics Geoffrey Brooker, 2003-07-24 The book gives accounts of non quantum optical phenomena and of instruments and technology based on them at a level suitable for the last two years of an honours degree in physics and for graduates starting out Topics covered include the conventional diffraction coherence thin films holography but also the less conventional tendue Gaussian beams laser cavities cd reader confocal microscope which belong in today s university courses for example to support laser physics Even the conventional material has frequently been given a fresh presentation by giving a tidier than usual route through a calculation or finding insightful connections with other parts of physics or simply avoiding common errors Problems offer opportunities for checking the reader s basic understanding or for taking a careful route through reasoning or for checking orders of magnitude But most problems contain exploratory and critical material investigating possible alternative approaches asking searching questions about fundamentals or solving apparent paradoxes

Modern Classical Optics Geoffrey Brooker, 2008 **Modern Classical Optics** G. Brooker, 2023 *Modern Classical Optics* presents the subject of classical optics from a modern perspective The material it contains is closely tied to experimental physics and includes well chose sets of worked problems *Modern Classical Physics* Kip S.
