Modern Language Of Architecture:

Quatremere de Quincy Sylvia Lavin,1992 Sylvia Lavin uncovers the origins of one of the fundamental concepts of modern architectural theory the idea that architecture is a form of language **The Modern Language of Architecture** Bruno Zevi,1978 *The Classical Language of Architecture* John Summeron,1966-12-15 The author s purpose is to set out as simply and vividly as possible the exact grammatical workings of an architectural language Classical architecture is a visual language and like any other language has its own grammatical rules Classical buildings as widely spaced in time as a Roman temple an Italian Renaissance palace and a Regency house all show an awareness of these rules even if they vary them break them or poetically contradict them Sir Christopher Wren described them as the Latin of architecture and the analogy is almost exact There is the difference however that whereas the learning of Latin is a slow and difficult business the language of classical architecture is relatively simple It is still to a great extent the mode of expression of our urban surroundings since classical architecture was the common language of the western world till comparatively recent times Anybody to whom architecture makes a strong appeal has probably already discovered something of its grammar for himself In this book the author s purpose is to set out as simply and vividly as possible the exact grammatical workings of this architectural language He is less concerned with its development in Greece and Rome than with its expansion and use in the centuries since the Renaissance He explains the vigorous discipline of the orders and the scope of rustication the dramatic deviations of the Baroque and in the last chapter the relationship between the classical tradition and the modern architecture of today The book is intended for anybody who cares for architecture but more specifically for students beginning a course in the history of architecture to whom a guide to the classical rules will be an essential companion **The Historiography of Modern Architecture** Panayotis Tournikiotis,2001-02-27 The history of modern architecture as constructed by historians and key texts Writing according to Panayotis Tournikiotis has always exerted a powerful influence on architecture Indeed the study of modern architecture cannot be separated from a fascination with the texts that have tried to explain the idea of a new architecture in a new society During the last forty years the question of the relationship of architecture to its history of buildings to books has been one of the most important themes in debates about the course of modern architecture Tournikiotis argues that the history of modern architecture tends to be written from the present projecting back onto the past our current concerns so that the beginning of the story really functions as a representation of its end In this book the buildings are the quotations while the texts are the structure Tournikiotis focuses on a group of books by major historians of the twentieth century Nikolaus Pevsner Emil Kaufmann Sigfried Giedion Bruno Zevi Leonardo Benevolo Henry Russell Hitchcock Reyner Banham Peter Collins and Manfredo Tafuri In examining these writers thoughts he draws on concepts from critical theory relating architecture to broader historical models *Contemporary Perspectives on Architectural Organicism* Gary Huafan He,Skender Luarasi,2023-06-07 This project is born out of similar questions and discussions on the topic of

organicism emergent from two critical strands regarding the discourse of organic self generation one dealing with the problem of stopping in the design processes in history and the other with the organic legacy of style in the nineteenth century as a preeminent form of aesthetic ideology The epistemologies of self generation outlined by enlightenment and critical philosophy provided the model for the discursive formations of modern urban planning and architecture The form of the organism was thought to calibrate modernism s infinite extension The architectural organicism of today does not take on the language of the biological sciences as they did in the nineteenth and twentieth centuries but rather the image of complex systems be they computational informational geo ecological or even ontological aesthetic networks What is retained from the modernity of yesterday is the ideology of endless self generation Revisiting such a topic feels relevant now in a time when the idea of endless generation is rendered more suspect than ever amid an ever increasing speed and complexity of artificial intelligence AI networks The essays collected in this book offer a variety of critiques of the modernist idea of endless growth in the fields of architecture literature philosophy and the history of science They range in scope from theoretical and speculative to analytic and critical and from studies of the history of modernity to reflections of our contemporary world Far from advocating a return to the romantic forms of nineteenth century naturphilosophie this project focuses on probing organicism for new forms of critique and emergent subjectivities in a contemporary post pandemic constellation of neo naturalism in design climate change complex systems and information networks This book will be of interest to a broad range of researchers and professionals in architecture and art history historians of science visual artists and scholars in the humanities more generally

Writing Architecture in Modern Italy Daria Ricci, 2020-10-01 Writing Architecture in Modern Italy tells the history of an intellectual group connected to the small but influential Italian Einaudi publishing house between the 1930s and the 1950s It concentrates on a diverse group of individuals including Bruno Zevi an architectural historian and politician Giulio Carlo Argan an art historian Italo Calvino a fiction writer Giulio Einaudi a publisher and Elio Vittorini and Cesare Pavese both writers and translators Linking architectural history and historiography within a broader history of ideas this book proposes four different methods of writing history defining historiographical genres modes and tones of writing that can be applied to history writing to analyze political and social moments in time It identifies four writing genres myths chronicles history and fiction which became accepted as forms of multiple postmodern historical stories after 1957 An important contribution to the architectural debate Writing Architecture in Modern Italy will appeal to those interested in the history of architecture history of ideas and architectural education
