Rogers, Jr, 2024-10-14 Violence and trauma are growing global problems From the impacts of geopolitical forces to structural violence to the local effects of interpersonal violence trauma is ubiquitous in our society Existing trauma systems everywhere are expanding to meet the needs of injured patients Unfortunately in some places adequate resources are not in place to provide modern trauma care Until very recently this absence of resources existed on the South Side of Chicago For three decades the South Side of Chicago was a relative trauma desert In 2018 the University of Chicago Medicine opened a modern adult trauma center in an area that previously suffered from a relative lack of access to adult trauma care This book will provide the reader with an understanding of the journey the University of Chicago went through to develop a modern trauma center where there previously was nothing It will chart a journey through the history on the South Side of Chicago and will provide an understanding of the proper needs assessment that goes into planning a new trauma center It will describe the implementation of the multi disciplinary teams needed to provide modern trauma care It will then describe the effects of this trauma center and its future directions As many places are struggling with caring for increasing levels of violence there likely will be a need for others to go through a similar developmental process Sharing the experience of the University of Chicago Medicine going from a non trauma hospital to the busiest trauma center in Chicago we hope that this book will provide some guidance to others and accompany you on one s journey **Modern Neurosurgery 1** Mario Brock, 2013-04-17 More than 800 papers were presented by neurosurgeons from 66 countries during the 7th International Congress of Neurological Surgery held in Munich on 12 18 July 1981 With the present scope and problems of neurosurgery as its theme the congress achieved its aims in making possible the exchange and dissemination of new knowledge and ideas and in facilitating personal contact between neurosurgeons from aU parts of the world Of such importance are the regional differences within our branch of science that we should spare no effort in acquainting ourselves with those neurosurgical problems which lie beyond the boundaries of our local horizons From the vast number of papers the editor has selected those whose high scientific standard merits greater exposure than that given by the conference itself I should like to thank the editor for his work and Springer Verlag for their involvement in our disci pline It is to be hoped that this book will find a worldwide audience in accordance with the intentions of the World Federation of Neurosurgical Societies Prof Dr K A Bushe President of the Congress v Editor s Preface This is the first volume of a new series which aims to provide an overview of the state of the art of neurosurgery every four years It will contain papers covering various fields of our specialty selected from among those presented at each International Congress of Neurological Surgery The Modern Treatment of Nervous and Mental Diseases William Alanson White, Smith Ely Jelliffe, 1913 This volume devoted to the treatment of nervous and mental

diseases is designed to meet the needs which the rapid advances in knowledge of neurology and psychiatry have created The nervous system is here regarded as a whole and as inclusive of the mind and it is maintained that disturbances of any and all of its functions mental as well as physical are proper subjects for therapeutics The present work lays emphasis upon the psychical side of life as being worth quite as much consideration as the physical It sets forth doctrines of nervous and mental hygiene reconstructive factors in social organization as applied to human ills and endeavors to present a broad front to the pessimistic nihilism in therapeutics that has been too long current in these fields because the doctor's eyes have been too closely focused on the individual examples and results of human accidents Neurology and psychiatry offer the widest possible opportunities for preventive medicine as well as for therapeutic optimism The program here presented is essentially therapeutic Planned as it has been on a broad scale the more practical issues confronting the clinician have nevertheless been fully met The editors have sacrificed philosophical views for more definite guideposts wherever in the present state of our knowledge such a course seemed wiser PsycINFO Database Record c 2005 APA all rights reserved History of the Treatment of Spinal Injuries John Russell Silver, 2012-12-06 Injury of the spinal cord has been known since antiquity There is no cure for the injury and until modern times patients died rapidly from a combination of pressure sores and urinary tract infection Treatment consists of preventing complications until the spine has stabilised and the patient can be rehabilitated to an independent life History of the Treatment of Spinal Injuries explores how this treatment developed in the Ancient World the Middle Ages in Europe Great Britain and latterly in the United States It describes how these principles of treatment were recognised and explores the relationship and rivalry of the powerful personalities of the doctors who developed this treatment against the social background at different times *The Modern treatment of nervous and mental diseases v.2*, 1913 **Kaplan & Sadock's Concise Textbook of Clinical Psychiatry** Robert Boland, Marcia Verduin, 2021-12-22 Succinct authoritative and affordable Kaplan Sadock's Concise Textbook of Psychiatry 5th Edition provides must know information in clinical psychiatry from the names you trust From cover to cover it contains the most relevant clinical material from the bestselling Kaplan and Sadock's Synopsis of Psychiatry 12th Edition including the foundational chapters on assessment the disorder specific chapters and all of the treatment specific chapters among other essential topics such as emergency psychiatry ethics and palliative end of life care New editors Robert Boland and Marcia L Verduin along with consulting editor Pedro Ruiz have updated all content with a focus on reformatting and summarizing for faster access to key information
