offers a novel perspective on the part played by ideology in international relations over the past two centuries His treatment is not restricted to the familiar totalitarian ideologies of communism and nazism but also includes conservatism liberalism and nationalism The focus and emphasis given to ideology in an historical survey of such broad scope make this book unusual and even controversial The Globalization of World Politics John Baylis, Steve Smith, Patricia Owens, 2017 This title

provides an introduction to international relations IR supporting over 300 000 students taking their first steps in IR and beyond **Long Cycles in World Politics** George Modelski, 1987-06-18 War and Change in World Politics Robert

Gilpin, 1981 Professor Gilpin uses history sociology and economic theory to identify the forces causing change in the world order *World Politics on Screen* Mark A. Sachleben, 2014-03-04 Increasingly resistant to lessons on international politics

society often turns to television and film to engage the subject Numerous movies made in the twentieth and twenty first centuries reflect political themes that were of concern within the popular cultures of their times For example Norman Jewison's *The Russians Are Coming The Russians Are Coming* 1966 portrays the culture of suspicion between the United States and the Soviet Union during the Cold War while several of Alfred Hitchcock's movies as well as the John Wayne film *Big Jim McLain* 1952 and John Milius's *Red Dawn* 1984 helped to raise and sustain skepticism about the Soviet Union *World Politics on Screen Understanding International Relations through Popular Culture* uses films and television shows like these as well as contemporary including *24 The Simpsons South Park* and *The Daily Show* to guide readers to a deeper understanding of enduring issues in international politics In this unique and insightful volume author Mark Sachleben demonstrates that popular culture reflects societal beliefs about the world and that the messages captured on television and film transcend time and place Using films such as *Secret Ballot* 2001 *Under the Bombs* 2007 and *Wall E* 2008 he addresses topics such as international relations and diplomacy the study of war nuclear weapons poverty immigration and emigration human rights and genocide An engaging read for students and for anyone with a general interest in politics and popular culture *World Politics on Screen* succeeds in its argument by illuminating unexplored assumptions about international policy

*Study On International Politics In Contemporary China* Yuyan Zhang, 2020-07-14 China's guiding principle for foreign relations and its focus on states and regions has shifted a lot from the first 30 years of the founding of the People's Republic of China PRC in 1949 to 1978 and beyond after reform and opening up However PRC's diplomatic practice has been continuous whether it was participation in the Korean War breaking up with the former Soviet Union after a honeymoon period China's self defense war over Sino Indian border participation in the Vietnam War breakthrough in the Sino US relation or PRC's self defense war over the Sino Vietnamese border These historical events brought the need for theoretical study in International Politics IP The development of China's IP research was slow and filled with complications but it signified a breakthrough from scratch This book has filled gap by depicting a complete scroll of China's IP research in over 60 years since 1949 This book has followed two principles one is according to the classification of the IP discipline and the

other is to recommend adaptations according to China's actual conditions

**The Clash of Ideas in World Politics** John M. Owen IV, 2010-07-19 Some blame the violence and unrest in the Muslim world on Islam itself arguing that the religion and its history is inherently bloody Others blame the United States arguing that American attempts to spread democracy by force have destabilized the region and that these efforts are somehow radical or unique Challenging these views The Clash of Ideas in World Politics reveals how the Muslim world is in the throes of an ideological struggle that extends far beyond the Middle East and how struggles like it have been a recurring feature of international relations since the dawn of the modern European state John Owen examines more than two hundred cases of forcible regime promotion over the past five centuries offering the first systematic study of this common state

practice He looks at conflicts between Catholicism and Protestantism between 1520 and the 1680s republicanism and monarchy between 1770 and 1850 and communism fascism and liberal democracy from 1917 until the late 1980s He shows how regime promotion can follow regime unrest in the eventual target state or a war involving a great power and how this can provoke elites across states to polarize according to ideology Owen traces how conflicts arise and ultimately fade as one ideology wins favor with more elites in more countries and he demonstrates how the struggle between secularism and Islamism in Muslim countries today reflects broader transnational trends in world history
