Andrew Thacker,2019-01-22 This innovative text examines the development of modernist writing in four European cities London Paris Berlin and Vienna *Reading Modernism with Machines* Shawna Ross,James O'Sullivan,2016-11-30 This book uses the discipline specific computational methods of the digital humanities to explore a constellation of rigorous case studies of modernist literature From data mining and visualization to mapping and tool building and beyond the digital humanities offer new ways for scholars to questions of literature and culture With the publication of a variety of volumes that define and debate the digital humanities we now have the opportunity to focus attention on specific periods and movements in literary history Each of the case studies in this book emphasizes literary interpretation and engages with histories of textuality and new media rather than dwelling on technical minutiae *Reading Modernism with Machines* thereby intervenes critically in ongoing debates within modernist studies while also exploring exciting new directions for the digital humanities ultimately reflecting on the conjunctions and disjunctions between the technological cultures of the modernist era and our own digital present **The Dead City** Paul Dobraszczyk,2017-06-30 The Dead City unearths meanings from such depictions of ruination and decay looking at representations of both thriving cities and ones which are struggling abandoned or simply in transition It reveals that ruination presents a complex opportunity to envision new futures for a city whether that is by rewriting its past or throwing off old assumptions and proposing radical change Seen in a certain light for example urban ruin and decay are a challenge to capitalist narratives of unbounded progress They can equally imply that power structures thought to be deeply ingrained are temporary contingent and even fragile Examining ruins in Chernobyl Detroit London Manchester and Varosha this book demonstrates that how we discuss and depict urban decline is intimately connected to the histories economic forces power structures and communities of a given city as well as to conflicting visions for its future

Legacies of Modernism P. McBride,R. McCormick,M. Zagar,2007-01-22 Between 1890 and 1950 modernist art and culture set out to challenge century old notions of the individual and the community culture and politics morality and freedom placing into question the very foundations of Western civilization The essays in this volume present a novel assessment of various manifestations of modernism in Germany and Scandinavia by posing the question of its critical and political impact beyond traditional polarities such as right vs left illiberalism vs Enlightenment apolitical vs engaged In drawing on a wide range of disciplinary perspectives including literary studies art history film and visual studies urban

studies musicology political theory and the history of science and technology the essays in this volume reexamine modernism's bold inquiry into areas such as the relation of art to technology and mass politics the limits of liberal democracy the reconceptualization of urban spaces and the realignment of traditional art forms following the rise of new media such as film The volume's contributors share a belief in the timeliness of modernism's critical impulse for a contemporary age confronted with ethical and political dilemmas that the modernists first articulated and to which they attempted to respond

Literature, Modernism and Myth Michael Bell, 1997-01-28 The use of myth in Modernist literature is a misleadingly familiar theme Joyce's appropriation of Homer's *Odyssey* and Eliot's of Frazer's *Golden Bough* are like Lawrence's primitivism or Yeats's nationalist folklore attempts to discover an underlying metaphysic in an increasingly fragmented world In *Literature Modernism and Myth* Michael Bell also examines the relationship of myth and modernism to postmodernism Myth Bell shows is inherently flexible it was used to justify Pound's totalizing vision of society which eventually descended into fascism and the liberal ironic vision of human existence Joyce and Mann expressed Those theorists who present myth as another form of mystification a search for false origins ignore its use by modernists to emphasise the ultimate contingency of all values This anti-foundational element Bell claims enables myth to act as a corrective to the claims of ideological critique Bell shows how postmodern concerns with political and social responsibility and the role literature plays in formulating this have in fact been inherited from modernism

The Hong Kong Modernism of Leung Ping-kwan C. T. Au, 2019-11-29 This book resolves around the fundamental question What is Hong Kong modernism To address this issue C T Au identifies three significant characteristics a renewal of traditions an obsession with ordinary things and an expression of concerns about social and political issues shared among Western modernisms Chinese modernism in the 1940s and such Hong Kong modernists as Ma Lang Liu Yichang and Leung Ping kwan Yasi Ye Si This research concentrates on an examination of the major modernist tenets embodied in Leung's literary works Leung Ping kwan is one of the most prominent and widely read Hong Kong modernist writers however there exist only a few scholarly works which focus on the direct relationship between Leung's works and modernisms The author argues that Leung paid special attention to issues regarding tradition daily life and colonial culture in order to understand his past his identity and the unique features of Hong Kong modernism which celebrate multiple perspectives and inclusiveness This study not only helps differentiate Hong Kong modernism from other modernisms positioning the former as a variant of the latter but also provides a response to the problems evoked by Hong Kong's colonial milieu

will be the first resource of its kind to pull together such a comprehensive overview of the field Routledge Research Companion to Landscape Architecture Ellen Braae, Henriette Steiner, 2018-11-09 The Routledge Research Companion to Landscape Architecture considers landscape architecture's increasingly important cultural, aesthetic and ecological role. The volume reflects topical concerns in theoretical, historical, philosophical and practice-related research in landscape architecture research that reflects our relationship with what has traditionally been called nature. It does so at a time when questions about the use of global resources and understanding the links between human and non-human worlds are more crucial than ever. The twenty-five chapters of this edited collection bring together significant positions in current landscape architecture research under five broad themes: History, Sites and Heritage, City and Nature, Ethics and Sustainability, Knowledge and Practice, supplemented with a discussion of landscape architecture education. Prominent as well as up and coming contributors from landscape architecture and adjacent fields including Tom Avermaete, Peter Carl, Gareth Doherty, Ottmar Ette, Matthew Gandy, Christophe Girot, Anne Whiston Spirn, Ian H. Thompson and Jane Wolff seek to widen and frame critical discussion in this growing area. A significant contribution to landscape architecture research, this book will be beneficial not only to students and academics in landscape architecture but also to scholars in related fields such as history, architecture and social studies Eco-Modernism Jeremy Diaper, 2022-11-17 In drawing together contributions from leading and emerging scholars from across the UK and America, Eco-Modernism offers a diverse range of environmental and ecological interpretations of modernist texts and illustrates that ecocriticism can offer fresh and provocative ways of understanding literary modernism **City, Climate, and Architecture** Sascha Roesler, 2025-01-27 Second and revised edition. The publication rethinks climate control, a key concern of the discipline of architecture through the lens of city climate phenomena over the course of the 20th century. Based on a history of climate control on urban scales, it promotes the integration of indoors and outdoors in order to reduce environmental and thermal loads in cities. Just as heating and cooling practices inside the buildings are affecting the urban climate, outdoors urban heat islands are influencing the energy requirements and thermal conditions inside the buildings. While the first part of the book focuses on the interwar period in Europe, the publication's second part considers examples from all over the globe, tracing the growing significance of ecological thinking for the design of urban environments. Main outcome of a six years research project on architecture and urban climate funded by the Swiss National Science Foundation. New and revised edition. KLIMA POLIS, a series highlighting design-driven approaches to urban climates across the globe **Urban Futures** Tim Hall, Malcolm Miles, 2004-11-23 Urban Futures brings together commentaries from a wide range of contemporary disciplines and fields relevant to urban culture, form and society. The book concerns cities in the broadest sense, not just as buildings and spaces but also as processes and events or sites of occupation in which meanings are constructed in many ways. The contributors draw on their specialist areas of research to inform current debate but they also speculate as to how cities will be shaped in the 21st century. Specific areas

of research include homeless people's organisations and restoration ecology in brownfield sites in the USA post industrial urban landscapes post industrial economics tourism and cultural planning The book allows each writer to state their own conclusions but together they suggest that tomorrow's cities will while remaining locations of difference and contestation be rapidly evolving systems in which dwellers assume increasing responsibilities and power
