Endless Horizons: Spaces of Modernity and Beyond Pasquale De Marco, 2025-03-23 In *Endless Horizons Spaces of Modernity and Beyond* we embark on a captivating journey through the intricate tapestry of modern spaces exploring their profound impact on our lives and societies From the bustling metropolises that serve as hubs of innovation and commerce to the sprawling suburbs that offer respite from the urban frenzy this book delves into the complexities of the modern world and the spaces we inhabit With thought provoking insights and a keen eye for detail the author unravels the intricate relationship between space and power uncovering the ways in which architecture and urban design can be wielded as instruments of control and domination Yet amidst the concrete canyons and glass facades we also discover pockets of resistance and subversion where marginalized voices find expression and alternative visions of urban life take root Venturing beyond the city limits we traverse suburban landscapes examining the social and cultural dynamics that shape suburban life We explore issues of identity belonging and the search for community in an increasingly fragmented world The environmental consequences of suburban expansion are also brought to light as the relentless encroachment of development threatens natural ecosystems and biodiversity The book then takes us to the frontiers of modernity where the physical and digital realms converge We explore the rise of virtual spaces from the boundless expanse of the internet to the immersive worlds of virtual reality These digital landscapes offer unprecedented opportunities for connection and exploration but they also raise questions about identity privacy and the nature of reality itself The ethical and philosophical implications of our increasing reliance on technology are examined considering the ways in which it is reshaping our relationships with ourselves with each other and with the world around us Throughout this exploration of modern spaces we encounter a diverse cast of characters whose lives and experiences illuminate the complexities of our contemporary world From the migrant worker toiling in the shadows of the city to the tech entrepreneur navigating the cutthroat world of Silicon Valley their stories provide a poignant backdrop against which we examine the social economic and political forces that shape our societies Ultimately *Endless Horizons Spaces of Modernity and Beyond* invites us to reflect on the meaning of modernity and its implications for the future of human existence As we grapple with

the challenges and opportunities presented by the modern world this book inspires us to create spaces that are not only functional and efficient but also inclusive sustainable and conducive to human flourishing If you like this book write a review

Healing Powers and Modernity Linda H. Connor,Geoffrey Samuel,2001-02-28 What is the current state of

traditional healing practices in contemporary Asian societies How are their practitioners faring in the encounter with Western science and its biomedical approach How are traditional healing practices being transformed by the politics of health within the modern nation state and by the processes of commodification typical of modern economies How do patients in Asian societies see the various healing options now open to them The authors all of whom are anthropologists observe the clashes and complementarities between traditional therapies and biomedicine which in its many manifestations is the dominant form of medicine supported by national governments and is emblematic of the modernity to which they aspire Some of the medical traditions such as the sophisticated herbal humoral systems of Tibetan medicine and Indian Ayurveda are becoming well known in the West both through scholarly study and through their increasing popularity with Western patients interested in their healing potential This book adds a new dimension to their study being focused unlike most previous writing on practice rather than textual tradition

Modernity and the Construction of Sacred Space Aaron French, Katharina Waldner, 2024-07-01 This volume focuses on the connection between modern design and architectural practices and the construction of sacred spaces Not only language and ritual but space place and architecture play a significant role in constructing special or religious spaces However this concept of a constructed sacred space remains undertheorized in religious studies and the history of art and architecture in general This volume therefore revisits the question of a modern sacred space from an interdisciplinary perspective focusing on religion space and architecture during the emergence of the modern period and up until contemporary times Revisiting the ways in which modern architects and artists have endeavored to create sacred spaces and buildings for the modern world will address the underlying questions of how religious ideas especially those related to esotericism and to alternative religiosities have transformed the way sacred spaces are conceptualized today **Sacred Modernity** Lorenzo

After the Shock City Tom Hulme, 2019 A comparative and trans national study of urban culture in Britain and the United States from the late nineteenth to the twentieth century Using the industrial cities of Manchester and Chicago as case studies this book traces the idea of citizenship across different areas of local life in the first half of the twentieth century from philosophy and festivals to historical re enactment and public housing Coalitions of voluntary associations municipal government and local elites lambasted modern urban culture as the cause of social disintegration But rather than simply decanting the population to new and smaller settlements they tried to re imagine a reformed city as a place that could foster loyal and healthy communities Celebrating civic progress in the period since the shock city of the nineteenth century they sought to create a sense of local pride that could bracket growing class and racial tensions The diverse individuals groups and communities of the city reacted in different ways to this message Some were happy to gather under the identity of one civic banner Others held back by discriminatory structures of society chose to shape their own idea of citizenship one that looked far beyond the city for a sense of belonging and rights Historians have tended to emphasise the rise of national identity state centralisation and popular patriotism at the expense of distinctive local identities municipal autonomy and expressions of civic pride This book aims to redress the imbalance demonstrating how local ideas of belonging could still exert a powerful hold on the making of modern citizenship TOM HULME is a lecturer in the School of History Anthropology Philosophy and Politics Queen's University Belfast
