capitalism to state socialism She demonstrates that during this shift architects and engineers consistently strove to meet the needs of Czechs and Slovaks despite challenging economic conditions a lack of material resources and manufacturing and technological limitations In the process architects were asked to put aside their individual creative aspirations and transform themselves into technicians and industrial producers Manufacturing a Socialist Modernity is the first comprehensive history of architectural practice and the emergence of prefabricated housing in the Eastern Bloc Through discussions of individual architects and projects as well as building typologies professional associations and institutional organization it opens a rare window into the cultural and economic life of Eastern Europe during the early postwar period
