Modernizing China:

Modernizing China A. Doak Barnett, 2019-03-05 Since the death of Mao China has entered a new period in its development Turning away from the all encompassing emphasis on revolutionary struggle and ideological transformation that characterized the last years of the Maoist era China's leaders under Deng Xiaoping have initiated dramatic new reform and development policies In original essays the contributors all senior specialists on contemporary China analyze the reasons for the new policies the nature and impact of the changes now occurring and the prospects for a continuation of these policies in the future Specifically they examine the Chinese polity as a consultative authoritarian system the farreaching changes in China's agriculture important shifts in foreign economic relations the gradual modernization policy pursued by its military leaders the relaxation of controls on cultural life and the possibility that current social policies may well increase equality rather than inequality in Chinese society The authors conclude that it is too early to judge the eventual long term outcome of current reforms which they believe grew out of the political crises and chronic economic problems that afflicted China in the late 1960s and early 1970s Although they see some opposition and built in limits to reform on balance they foresee strong support for continued reform and believe it will be difficult for future leaders to reverse course

Longworth, 2005-01-01 The book fills an important gap in understanding the process of economic transformation by providing a comprehensive and in depth micro level analysis of industrial transition The book is highly recommended for those who are working on or studying the Chinese economic transformation focusing especially on industry and its transition Ligang Song Economic Record As the authors admit the wool industry may seem a rather obscure choice p 23 Yet this is a book of interest to a much wider relationship than agro business specialists It provides a meticulous case study of one industry which illuminates a number of broader issues currently under discussion in the China studies field As the Chinese economy becomes more variegated economists and political scientists trying to understand the Chinese economic reform experience will increasingly have to rely on such studies They bring out the intricacies of this process and help us to move from across the board generalizations on property rights reform to more nuanced analyses of economic transition Bj rn Alpermann The

Modernizing China W. Raphael Lam, Mr. Markus Rodlauer, Mr. Alfred Schipke, 2017-01-14 China is at a critical juncture in its economic transformation as it tries to rebalance what is generally seen as an exhausted growth model A unifying theme across the reforms that will deliver this transformation is that it can no longer be achieved by raising the amount of physical investment and government direction of resource allocation Instead China is building a new set of policy frameworks that will allow markets to function more effectively not unfettered markets but markets that work efficiently in line with broad social and other policy goals and in a sustainable way Hence China is now building a new soft infrastructure that is the institutional plumbing that underpins and guides the functioning of markets as the key organizing principle toward

achieving sustained economic and social progress Against this background this volume provides policymakers academics and the public with valuable information about policies and institutions in China today It also looks at the road ahead and key principles that can help China in navigating it The book focuses on issues crucial in the country's transformation such as tax policy and administration social security state owned enterprise reform medium term expenditure frameworks the role of local government finances capital account liberalization and renminbi internationalization As China moves toward a more price based allocation of resources strengthening monetary policy frameworks and financial sector regulation will be particularly important in channeling resources to the most productive sectors and minimizing the risks of financial sector stress Also upgrading statistical frameworks will be critical for macroeconomic policymaking and investors
