**Modes of Irrationality** H.M. Garelick,2011-12-09 My purpose in this study is to explore various forms of irrationality and to name some true irrationals in order to find the bounds of reason The irrational if there is such sets a priori limits to philosophical investigation for reason must stop before unreason s province I begin by defining a primary meaning of rational Forming then by opposition the genus irrational I analyze the various species of the irrational traditionally offered as true irrationals I then judge which irrationals do inhere in in nature or in spirit PART I THE IRRATIONALITY OF THE WORLD CHAPTER REASON To understand a primary and consistent meaning of the rational it is necessary to see how the term has been used In the Theaetetus Socrates interested in what it means to have knowledge sets about finding a rational answer and by his analysis illustrates a primary meaning of reason In answer to Socrates question What is knowledge Theaetetus responds with instances of knowledge Then I think the things one can learn from Theodorus are knowledge geometry and all the sciences you mentioned just now and then there are the crafts of the cobbler and other workmen Each and all of these are knowledge and nothing else Yet a mere enumeration of particulars does not satisfy Socrates Modes of Irrationality

*The Poetics of Perspective* James Elkins,2018-10-18 Perspective has been a divided subject orphaned among various disciplines from philosophy to gardening In the first book to bring together recent thinking on perspective from such fields as art history literary theory aesthetics psychology and the history of mathematics James Elkins leads us to a new understanding of how we talk about pictures Elkins provides an abundantly illustrated history of the theory and practice of perspective Looking at key texts from the Renaissance to the present he traces a fundamental historical change that took place in the way in which perspective was conceptualized first a technique for constructing pictures it slowly became a metaphor for subjectivity That gradual transformation he observes has led to the rifts that today separate those who understand perspective as a historical or formal property of pictures from those who see it as a linguistic cognitive or epistemological metaphor Elkins considers how the principal concepts of perspective have been rewritten in work by Erwin Panofsky Hubert Damisch Martin Jay Paul Ricoeur Jacques Lacan Maurice Merleau Ponty and E H Gombrich *The Poetics of Perspective* illustrates that perspective is an unusual kind of subject it exists as a coherent idea but no one discipline offers an adequate exposition of it Rather than presenting perspective as a resonant metaphor for subjectivity a painter s tool without meaning a disused historical practice or a model for vision and representation Elkins proposes a comprehensive revaluation The perspective he describes is at once a series of specific pictorial decisions and a powerful figure for our knowledge of the world
