Monotheism and Tolerance Robert Erlewine, 2010-01-11 Why are religious tolerance and pluralism so difficult to achieve Why is the often violent fundamentalist backlash against them so potent Robert Erlewine looks to a new religion of reason for answers to these questions Drawing on Enlightenment writers Moses Mendelssohn Immanuel Kant and Hermann Cohen who placed Christianity and Judaism in tension with tolerance and pluralism Erlewine finds a way to break the impasse soften hostilities and establish equal relationships with the Other Erlewine's recovery of a religion of reason stands in contrast both to secularist critics of religion who reject religion for the sake of reason and to contemporary religious conservatives who eschew reason for the sake of religion Monotheism and Tolerance suggests a way to deal with the intractable problem of religiously motivated and justified violence

participatory democracy have not been quite successful Using various methodologies and paradigms this book interrogates the complexity of the causes of these conflicts and examines their impact and implications for socio economic development of the region The non consensual actions related to these conflicts and imperatives of power struggles supported by the agents of savage capitalism have paralysed efforts toward progress The book therefore recommends new policy frameworks within regionalist lenses and neo realist politics to bring about sustainable peace in the region **Mediating Peace** Sebastian

Bottoni,2019-04-09 Much has been written on specific religious legal systems yet substantial comparative studies that strive to compare systems identifying their analogies and differences have been relatively few This absence undermines the capacity to understand religions and becomes particularly serious when the faithful of these religions live together in the same geographical space as happens today with increasing frequency Both interreligious dialogue and dialogue between States and religions presuppose a set of data and information that only comparative research can provide This book seeks to address this gap in the literature by presenting a comparative analysis of Christian Jewish Islamic and Hindu laws and traditions Divided into five parts the first part of the book offers the historical background for the legal analysis that is developed in the subsequent parts Part II deals with the sources of law in the four religions under discussion Part III addresses the dynamics of belonging and status and Part IV looks at issues relating to the conclusion of marriage and its dissolution The fifth and final part discusses how each religion views the legal other Each part concludes with exploring what we can learn from a comparative examination of the topic that is dealt with in that part Written by leading experts in the field this book presents a clear and comprehensive picture of key religious legal systems along with a substantial bibliography It provides a state of the art overview of scholarship in this area accompanied by a critical evaluation As such it will be an invaluable resource for all those concerned with religious legal systems multiculturalism and comparative law **Exploring**

Religious Diversity and Covenantal Pluralism in Asia Dennis R. Hoover,2022-12-26 This book examines the growing

diversity of religions and worldviews across South Central Asia and the factors affecting prospects for covenantal pluralism in these regions Going beyond banal appeals for mere tolerance the theory of covenantal pluralism calls for a constitutional order of religious freedom and equal treatment combined with a culture of practical religious literacy and everyday virtues of engagement across lines of religious difference According to the Pew Religious Diversity Index half of the world's most religiously diverse countries are in Asia The presence of deep religious worldview difference is often seen as a potential threat to socio political cohesion or even as a source of violent conflict Yet in Asia as elsewhere the degree of this diversity is not consistently associated with socio political problems Indeed while religious difference is implicated in some social challenges there are also many instances of respectful multi faith engagement practical collaboration and peaceful debate Volume II offers a pioneering exploration of the prospects for this robust and non relativistic type of pluralism in South Central Asia Volume I examined East Southeast Asia The chapters in these volumes originally appeared as research articles in a series on covenantal pluralism published by The Review of Faith International Affairs

The SAGE Handbook of the Sociology of Religion James A Beckford, Jay Demerath, 2007-10-29 In their introduction to this Handbook the editors affirm Many sociologists have come to realise that it makes no sense now to omit religion from the repertoire of social scientific explanations of social life I wholeheartedly agree I also suggest that this wide ranging set of essays should become a starting point for such enquiries Each chapter is clear comprehensive and well structured making the Handbook a real asset for all those engaged in the field Grace Davie University of Exeter Serious social scientists who care about making sense of the world can no longer ignore the fact that religious beliefs and practices are an important part of this world This Handbook is a valuable resource for specialists and amateurs alike The editors have done an exceptionally fine job of incorporating topics that illuminate the range and diversity of religion and its continuing significance throughout the world Robert Wuthnow Princeton University At a time when religions are increasingly affecting and affected by life beyond the narrowly sacred sphere religion everywhere seems to be caught up in change and conflict In the midst of this contention and confusion the sociology of religion provides a rich source of understanding and explanation This Handbook presents an unprecedentedly comprehensive assessment of the field both where it has been and where it is headed Like its many distinguished contributors its topics and their coverage are truly global in their reach The Handbook's 35 chapters are organized into eight sections basic theories and debates methods of studying religion social forms and experiences of religion issues of power and control in religious organizations religion and politics individual religious behaviour in social context religion self identity and the life course and case studies
