the text below needs editing and we must be careful not to say things about Dan Brown's book that could get Springer in legal trouble Dan Brown's novel The Da Vinci Code was first published in 2003 its sales have reached 40 million worldwide The book mixes a small spice of fact into a large dollop of fiction to create an entertaining novel of intrigue adventure romance danger and conspiracy which have been imaginatively worked together to cook up the successful bestseller Most interest in the book's origins has centred on the sensational religious aspects Dan Brown has written All of the art architecture secret rituals secret societies all of that is historical fact This gives an air of authenticity to the book Brown has however made up the religious doctrines or based them on questionable accounts by others The locations of the actions of The Da Vinci Code are not however made up The present book is the scientific story behind the scene of several of the book's actions that take place on the axis of France that passes through Paris The Paris Meridian is the name of this location It is the line running north south through the astronomical observatory in Paris One of the original intentions behind the founding of the Paris Observatory was to determine and measure this line The French government financed the Paris Academy of Sciences to do so in the seventeenth to nineteenth centuries It employed both astronomers people who study and measure the stars and geodesists people who study and measure the Earth This book is about what they did and why It is a true story behind Dan Brown's fiction This is the first English language presentation of this historical material It is attractively written and it features the story of the community of scientists who created the Paris Meridian They knew each other well some were members of the same families in one case of four generations Like scientists everywhere they collaborated and formed alliances they also split into warring factions and squabbled They travelled to foreign countries somehow transcending the national and political disputes as scientists do now their eyes fixed on ideas of accuracy truth and objective enduring values save where the reception given to their own work is concerned when some became blind to high ideals and descended into petty politics To establish the Paris Meridian the scientists endured hardship survived danger and gloried in amazing adventures during a time of turmoil in Europe the French Revolution and the Napoleonic War between France and Spain Some were accused of witchcraft Some of their associates lost their heads on the guillotine Some died of disease Some won honour and fame One became the Head of State in France albeit for no more than a few weeks Some found dangerous love in foreign countries One scientist killed in self defence when attacked by a jealous lover another was himself killed by a jealous lover a third brought back a woman to France and then jilted her whereupon she joined a convent The scientists worked on practical problems of interest to the government and to the people They also worked on one of the

important intellectual problems of the time a problem of great interest to their fellow scientists all over the world nothing less than the theory of universal gravitation They succeeded in their intellectual work while touching politics and the affairs of state Their endeavours have left their marks on the landscape in art and in literature The National Union Catalogs, 1963- ,1964 Verification and Extension of La Caille's Arc of Meridian at the Cape of Good Hope; by Thomas Maclear Thomas Maclear,1866 *Verification and Extension of La Caille's Arc of Meridian at the Cape of Good Hope* Thomas Maclear,1866 *International Oil and Gas Development* ,1996 *Report Upon United States Geographical Surveys West of the One Hundredth Meridian* Geographical Surveys West of the 100th Meridian (U.S.),1875 **Report Upon United States Geographical Surveys West of the One Hundredth Meridian, in Charge of First Lieut. Congress,1997 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873 **Resume** Petroleum Information Corporation,1994 **Nation, Society and the State** Dr. Abraham Weizfeld,2012-03-09 This work treats the European political philosophy that has engendered the Nation State concept considered to be the logical evolution of human history as a linear periodization into the Modern State This Modern State concept is treated as the end of history in liberal democratic theory in spite of it remaining a European phenomenon Where it has been imposed beyond the European political culture it has provoked a plague of civil wars and occupations such as in Palestine In Europe itself it has also resulted in such features as the Spanish Inquisition the latter day Spanish civil war and the fascist dictatorship that followed as well as the Nazi regime and its Holocaust in alliance with the various fascist allies seeking their own Nation State Various attempts have followed in Europe itself to overcome the Nation State itself by means of the European Union which sought to unite the Nation States with a federated effort to bring some stability to the economy and life of the region in light of the disastrous wars of the twentieth century The contradictions of the Nation State and Federalism become ever more apparent as the EU now descends into economic chaos This sub title invites a comparison and a contrast between the Jewish political culture and the Zionist movement One may consider political culture as encompassing Civil Society history religious theology and law comprising a collective consciousness this historical heritage forms a national identity which is currently oriented into nationalism by the State The endurance of national identity apart from the State and with the extinction of the State is projected as the basis of an independent Civil Society **Annual Review for the Year Relating to Oil and Gas** Montana. Literature ,2019-12-16 Self reflection is fundamental for human thinking on many levels Philosophy has described the mind s capacity to observe itself as a core element of human existence Political and social sciences have shown how modern democracies depend on society s ability to critically reflect on their own values and practices And literature of all ages has proven self reflexivity to be a crucial trait of cultural production This volume provides the first diachronic panorama of genres forms and functions of literary self reflection and their connections with social political and philosophical discourses from the 17th century to the present Far beyond the usual focus on postmodernist opacity these contributions present a rich tradition of critical transparency Literary texts that show us what is behind and beyond them

The Continental Shelf and the Exclusive Economic Zone / Le plateau continental et la zone économique exclusive Donat Pharand,Umberto Leanza,2022-02-22 This volume focuses on both the general aspects of two of the most typical institutions introduced by the new Law of the Sea and the specific aspects related to the geographic and economic circumstances of Italy and Canada It is divided into two parts The first part deals with the delimitation of maritime boundaries especially with respect to the continental shelf and the exclusive economic zone The problem is approached from both a theoretical and a practical point of view in particular in analyzing not only the more well known controversies in delimitation solved by international agreements or by international courts but also still unsettled disputes in which Italy and Canada are involved The second part deals with the legal regime of the continental shelf and the exclusive zone and the activities in particular exploration and exploitation carried out in them The same approach as in Part One is used in juxtaposing Italian and Canadian views on relative regulation Indeed the volume brings together the diverse legal experience of the two countries Italy and Canada resulting from the different geographic political and economic conditions found in each It is enough to think that Italy is surrounded on three sides by a closed or semiclosed sea the Mediterranean while Canada borders on the Atlantic Pacific and Arctic Oceans The volume was financed by the Italian National Research Council CNR and edited by Donat Pharand Professor Emeritus of International Law at the University of Ottawa and Umberto Leanza Full Professor of International Law at the University of Rome Tor Vergata
