Mombasa And The Kenya Coast:

Kenya Coast Handbook Jan Hoorweg, D. Foeken, 2000 Kenya Coast Handbook is dedicated to the Kenya Coast and its hinterland. The region, a popular tourist destination, is considered by many to be relatively undeveloped despite the presence of Mombasa, the country's second largest town and a key East African seaport. This book explores developmental possibilities in the region, taking into account physical resources and environment, ethnicity, politics, tourism, education, and nutrition. Its twenty-five chapters detail the region's history, economy, human resources, and prospects for development. The book, which contains a large bibliography and statistical information section, is a standard work for anyone with a professional interest in the East African coastal region in general and the Kenya coast in particular. [The Legacy of Slavery in Coastal Kenya](#) Herman Ogoti Kiriamu, 2022-10-26 To either achieve or resist domination, some postcolonial and post-slavery societies appropriate and contest the current memories on slavery. This occurs more often where the sites of slavery are tourist attractions that positively empower the communities through economic benefits, resulting in an emergence of new memories of the past and a constant construction and reconstruction of identity. In [The Legacy of Slavery in Coastal Kenya: Memory, Identity, and Heritage](#) Herman Ogoti Kiriamu examines how two communities in coastal Kenya, one whose identity is contested by the community members and another one who are seeking recognition, have tried to remember their past and the role that tourism has played in the process of remembering and/or forgetting. Kiriamu argues that heritage, memory, and identity are fluid, and individuals can claim several identities depending on their socio-political and economic contexts. [Kenya's Coast](#) Simon Mollison, 1971 **Mombasa and the Kenya Coast** John H. A. Jewell, 1988 [Smallholder Dairy Technology in Coastal Kenya](#) Charles F. Nicholson, 1999-01-01 This study examined the factors influencing adoption of three related dairy technologies in coastal Kenya and assessed the impacts of dairy adoption on household income, employment, generation, and nutrition status of pre-school children. The technologies studied were adoption of grade and crossbred dairy animals, planting of the fodder Napier grass, and use of the infection and treatment method of immunisation against East Coast fever. A series of household surveys was conducted from mid 1997 to mid 1998. The descriptive results from surveys of 202 households in Coast Province indicate that adoption of a grade or crossbred dairy animal may result in substantial increases in household income, can generate paid secondary employment, and may improve the nutritional status of pre-school age children. In the Household Econometric analyses, which controlled for numerous confounding factors, provided less consistent support for the impact of adoption on household income and paid employment. It appears that neither the adoption nor productivity of dairying are constrained by poor availability of technology options. For dairy development activities on the coast, two areas merit attention: mechanisms for easing access to grade and crossbred dairy cattle, either through credit schemes or through self-help smallholder co-operatives, and reducing the disease risks associated with grade and crossbred dairy animals. An Economic History of the Kenya Coast Thomas J. Herlehy,1985 **The Giriama and Colonial Resistance in Kenya, 1800-1920** Cynthia Brantley,2024-06-04 The Giriama of Kenya s coastal hinterland persistently resisted colonialism and they were unreceptive both to Christianity and to Islam In 1912 the British colonial authorities earmarked the Giriama as a key source of labor for the plantations Europeans were trying to develop along the coast The Giriama prosperous producers and traders could not become wage laborers and maintain their successful economy and the British demands upon this scattered people therefore were spontaneously rejected Increased pressure increased Giriama recalcitrance Finally military action brought defeat to the Giriama whose only weapons were bows and arrows and whose decentralization prevented coordinated resistance They lost their best lands paid a heavy fine and had to contribute a thousand laborers to the Carrier Corps But the British costs were also heavy The coastal plantations failed few Giriama ever became wage laborers and the entire area became depressed economically Cynthia Brantley explores the precolonial Giriama s political and economic system and their dynamic trade relationship with the coast of Kenya in an effort to explain why the Giriama were so determined in their resistance to British pressure She shows that even when the political and social structures of a people seem weak it is unlikely that the population will submit to changes that undermine the economy Moreover their very lack of a centralized political or religious organization made the imposition of foreign administration extremely difficult The British won the war but their victory was hollow This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1981 [How to Draw Kenya's Sights and Symbols](#) Melody S. Illusions of Location Theory: Consequences for Blue Economy in Africa Francis Onditi, Douglas Yates, 2021-01-05

Illusions of Location Theory Consequences for Blue Economy in Africa questions the relevance of location theory in explaining the coastal hinterland continuum and the implications for the utilization of blue economy ecosystem in such a contested space in Africa It pays more attention to territorial contestations maritime disputes vulnerabilities of landlocked states and expansionist policies as displayed through spatial organizational regimes These areas of investigation have previously been largely studied from the narrow perspective of location unduly focusing on comparative advantages of distance while neglecting the influence of forces such as technology ideology and the power of mental mapping in spatial decision making This volume puts forward the argument that the harmonious relationship between states and efficient exploitation of the blue economy ecosystem in ways that promote peace between states lies not only in the structural transformation of markets but also in bridging the spatial and social divide between the coastal and hinterland societies Thus this work proffers possibilities for a holistic regime for managing Africa s coastal hinterland continuum through innovative strategies such as SMART blue economies and the infusion of the geopolitical dimension into the management of maritime and territorial diplomacy The combination of theoretical and empirical analysis buttressed by in depth case studies of what works in the management of blue economy ecosystem and what does not work make this volume ideal for researchers students and practitioners interested in African regional studies African political economy political geography strategic military studies governance of seas and oceans and maritime science diplomacy
