American Technology Policy J. D. Kenneth Boutin, 2012-12-31 Since the end of the Cold War U S policymakers have faced the challenge of addressing the technological requirements of both economic competitiveness and national security Promoting the technological objectives of competitiveness and security poses a daunting task as these objectives can differ significantly in terms of autonomy the private sector s role and the time frame involved The difficulties inherent in meeting these competing needs for technological investment and resources are exacerbated by growing technological globalization American Technology Policy analyzes the ongoing efforts of politicians legislators policymakers and industry leaders to balance their often conflicting technological requirements J D Kenneth Boutin examines recent trends and developments in American technology policy as it strives to support high technology firms without undermining national security He then considers issues of autonomy relations between the federal government and industry and the time frame involved in formulating and implementing policy initiatives all in the context of globalization Though satisfying the ambitious American technological agenda is difficult it is impossible for authorities to avoid making the effort given the high stakes involved Boutin s analysis is intended to inform those who are charged with prioritizing and balancing the technological needs of national defense and economic growth Although the post Cold War technology policy of the United States has been characterized by efforts to achieve a balance between these two competing priorities the dominant focus remains on national security Boutin explains the ways in which American authorities seek to limit the extent of compromise necessary by working with local and foreign actors and by encouraging structural changes in the environment for technological development application and diffusion

Unpacking the International Technology Transfer Debate Padmashree Sampath, Pedro Roffe, 2013 This paper captures the political economy of technology transfer negotiations since the 1960s to address two key questions The first question is whether the debates cater to country level technological needs in developing countries To find answers to this the paper critically reviews the progress made in understanding the role of technology and innovation capacity for economic development over the past decades and whether these find a place in the negotiations and deliberations as we have them today The second question that the paper seeks to address is more forward looking with a view to make a constructive contribution towards resolving some of the most longstanding issues in technology transfer How and through what ways can international discussions on technology transfer be made to reflect the lessons learned up until now on how countries build technological capabilities and the challenges posed by the changing global environment for knowledge and technology The analysis places a particular emphasis on the technology transfer intellectual property rights IPRs nexus which in many ways has been at the heart of the international discourse on technology transfer The authors conclude by identifying the main issues that remain outstanding in this discourse and propose some thoughts for the way forward

Technology Offsets in International Defence Procurement Kogila Balakrishnan, 2018-08-14 Technology offsets a nonconventional international trade financing tool is used by governments buyers to obtain industrial and technological

benefits from companies sellers as part of international procurement Offsets deals involve billions of dollars and this practice exists in around 80 countries around the world Though offsets is a popular practice in defence it is increasingly gaining popularity in civil sectors Offsets is often tainted by controversy and receives bad press What then makes offsets popular Governments claim that offsets delivers technology and knowledge transfer skills in high technology sectors and employment and offsets expands export opportunities through participation in OEM supply chains For companies offsets is mainly employed as a tool to obtain a competitive edge and win sales in international business In the past there have been mixed results of case studies on the impact of offsets successes and failures Considering the mismanagement of globalisation unfair trade agreements and current political and economic discontent there is a stronger need for governments and companies to use vehicles such as offsets to create a relationship of trust and commitment for sustainable development This book fills the gap in offsets and focuses on how to manage offsets more effectively by addressing issues of strategy policy and implementation technology management governance and risk Technology Offsets in International Defence Procurement is designed for those studying international procurement international trade international business technology management defence policy and industrial policy This book will also be of interest to practitioners and policy makers in both government and industry

National Security And Technology Transfer Gary K. Bertsch, 2019-02-22 The deterioration of detente in the wake of the ongoing Soviet arms build up has sharply focused the East West trade debate on the question of advanced technology transfer from the United States and its allies to the Soviet bloc The transfer and acquisition of high technology have become central ingredients in super power relations and are key elements of any national security policy President Reagan among others has questioned the wisdom of the policies of the 1960s and early 1970s when trade with the Soviet Union and Eastern Europe expanded rapidly At recent industrial nation summits conferees of Western countries agreed to high level review of their East West technology trade policies But in light of the apparent West European commitment to continue and expand trade with the East as exemplified by the Siberian gas pipeline project and the growing U S opposition to such technology transfer divisions between U S and Western trade policies toward the East are likely to become increasingly acute in the years ahead Professors Bertsch and McIntyre have selected comprehensive and representative articles to examine the question of technology transfer from a variety of perspectives political economic and military emphasizing both the U S and the Western allies points of view and offering insights into the complex issues raised by the strategic dimensions of East West trade
