Regionalism Contested Henrik Halkier, 2016-12-05 As we move further into the 21st century the prominence of regions can no longer be taken for granted A certain skepticism has developed with regard to the feasibility of marginal regions achieving self sustained growth and states have maintained their role as regulators of economic and social activities Thus the notion of the region and its significance is currently much debated and contested Illustrated with a wide range of European case studies this volume brings together the main strands of these contestations as economic political and social actors attempt to institutionalise their vision of their region as the dominant form of territorial governance It questions both the external delimitation and the internal constitution of regions and critically analyses the societal processes circumscribing ways in which regions are created maintained and undermined The volume provides a wide range of analytical perspectives to enable an understanding of the current mosaic of regionalism in Europe

From Iron Rice Bowl to Informalization Sarosh Kuruvilla, Ching Kwan Lee, Mary E. Gallagher, 2011-08-15 In the thirty years since the opening of China's economy China's economic growth has been nothing short of phenomenal At the same time however its employment relations system has undergone a gradual but fundamental transformation from stable and permanent employment with good benefits often called the iron rice bowl to a system characterized by highly precarious employment with no benefits for about 40 percent of the population Similar transitions have occurred in other countries such as Korea although perhaps not at such a rapid pace as in China This shift echoes the move from breadwinning careers to contingent employment in the postindustrial United States In From Iron Rice Bowl to Informalization an interdisciplinary group of authors examines the nature causes and consequences of informal employment in China at a time of major changes in Chinese society This book provides a guide to the evolving dynamics among workers unions NGOs employers and the state as they deal with the new landscape of insecure employment

Region, Regional Identity and Regionalism in Southeastern Europe Klaus Roth, 2008 Southeastern Europe is often portrayed as an area plagued by endemic nationalisms a view that seems to be confirmed by the break up of Yugoslavia However a closer look shows that the nation is not the only territorial unit of identification Regions play an important role as well especially those that look back on traditions that differ from those of the national state Thus the end of socialism also brought forward regional movements which articulated opposition to the dominance of the centralized state These developments are furthered by the integration into the European Union whose policy of a Europe of the Regions demands strong regional centres for the administration of structural funds and for the empowerment of the regions The contributions to this volume address the dynamics of regions regionalism and regional identities in present Southeast Europe but also look into the history of individual regions They provide ample material for understanding the complex nature of territorial identification in this rapidly changing part of Europe
