Revolution and Counter-revolution in Africa Georges Nzongola-Ntalaja, 1987 The people of the Congo have suffered from a particularly brutal colonial rule American interference after independence decades of robbery at the hands of the dictator Mobutu and periodic warfare which continues even now in the East of the country But as this insightful political history makes clear the Congolese people have not taken these multiple oppressions lying down and have fought over many years to establish democratic institutions at home and free themselves from foreign exploitation indeed these are two aspects of a single project

The Congo Leo Zeilig, David Renton, David Seddon, 2013-04-04 Since well before Henry Morgan Stanley's fabled encounter with David Livingstone on the shore on Lake Tanganyika in the late 19th century and his subsequent collaboration with King Leopold of Belgium in looting the country of its mineral wealth the Congo's history has been one of collaboration by a minority with and struggle by the majority against Western intervention Before the colonial period there were military struggles against annexation During Belgian rule charismatic religious figures emerged promising an end to white domination copper miners struck for higher wages and rural workers struggled for survival During the second half of the 20th century the Congo's efforts at disentanglement from Belgian rule the murder of the nationalist leader Patrice Lumumba and the long dictatorship of General Mobutu culminated in one of the bloodiest wars the world has ever seen At the start of a new millennium this book argues that the West has plundered Africa to its own advantage and that unrestrained global capitalism threatens to remake the entire world bringing violence and destruction in the name of profit In this radical history the authors show not only how the Congo represents and symbolises the continent's long history of subordination but also how the determined struggle of its people has continued against the odds to provide the Congo and the rest of Africa with real hope for the future

The African Union Ten Years After Mammo Muchie, Phindil Lukhele-Olorunju, 2013-10-21 This book looks at the first ten years of the African Union This is the second in a series of books that will be produced each year from annual conferences held on the multi faceted issue of African liberation The key themes of the book explore ways of improving the effectiveness of the African Union fostering unity amongst African countries through entrenchment of pan Africanism and building ownership of the African Union by the African people and their communities In addition the thoughts of key figures of pan Africanism and black emancipation such as Sylvester Williams and Frantz Fanon are re positioned to even greater contemporary relevance Through its promotion of Ethiopianism pan Africanism and the African renaissance we trust that this book will add new interest and a fresh perspective to how Africans move forward together into a post colonial era where policies and actions are determined by the united agency of liberated Africans the world over

addition to copious citations to the research literature there are brief bibliographies listing major works for further reading at the conclusion of each article This up to date and well executed work provides a sound introduction to all aspects of political study SUNY College at Purchase *The Dynamics of Economic and Political Relations Between Africa and Foreign Powers* Tukumbi Lumumba-Kasongo, 1999-01-30 International relations at large and Africa's in particular are shaped by the actors historical location by what they offer economically and culturally and by who they are socially In international relations nations tend to deal with objective conditions as they are or as they are perceived However Lumumba Kasongo demonstrates through case studies of Liberia and Zaire Congo that what the objective conditions are may not necessarily be what they ought to be in the national development process The international struggle for power between the West and the East and their supportive brutal and oppressive states in the South especially in Africa created the extremely weak conditions that redefined international relations as the tools of domination rather than the tools of understanding and cooperation As Lumumba Kasongo clarifies Africa did not gain economically or developmentally from this struggle An important work for scholars and researchers of contemporary Africa and international relations in general **African Literature as Political Philosophy** Mary Stella Chika Okolo, 2013-07-04 The politics of development in Africa have always been central concerns of the continent's literature Yet ideas about the best way to achieve this development and even what development itself should look like have been hotly contested African Literature as Political Philosophy looks in particular at Achebe's *Anthills of the Savannah* and *Petals of Blood* by Ngugi wa Thiong'o but situates these within the broader context of developments in African literature over the past half century discussing writers from Ayi Kwei Armah to Wole Soyinka M S C Okolo provides a thorough analysis of the authors differing approaches and how these emerge from the literature She shows the roots of Achebe's reformism and Ngugi's insistence on revolution and how these positions take shape in their work Okolo argues that these authors have been profoundly affected by the political situation of Africa but have also helped to create a new African political philosophy Reformism and Revisionism in Africa's Political Economy in the 1990s T. Shaw, 1993-02-09 This timely text reevaluates the contemporary political economy of Africa in the light of continuing economic and ecological crises changing perceptions and prescriptions and transformations in global economic and strategic relations It treats hitherto overlooked issues such as gender and informal sectors and examines proliferating conditionalities such as democratic structures and military expenditures It suggests that established perspectives need to be superseded by revisionist approaches and it anticipates disappointment with current structural adjustment programmes advocating instead a return to various forms of self reliance Reconstructing the Authoritarian State in Africa George Kieh, Jr., Pita Agbese, 2013-10-01 This work seeks to examine the nature and dynamics of authoritarianism in Africa and to suggest ways in which the states covered in the book can be democratically reconstituted In 1990 a wave of euphoria greeted the third wave of democratization that swept across the African Continent The repression wearied subalterns were hopeful that the third wave

would have set into motion the process of democratically reconstituting the authoritarian state on the continent More than two decades thereafter although some progress has been made by and large the authoritarian state remains the dominant construct in the region Even in some of the countries in which democratic transitions have taken place the process of democratic consolidation remains an elusive quest as these states are sandwiched between authoritarianism and democracy Against this background the purpose of this book is to examine the travails of the authoritarian state in Africa including the Herculean task to democratically reconstruct it In order to do this six of Africa's perennial authoritarian states Cameroon the Democratic Republic of the Congo Egypt Liberia Rwanda and Uganda are used as the case studies The book has two major objectives First the various chapters probe the nature and dynamics of authoritarianism in Africa Second the chapters suggest ways in which the various authoritarian states covered in the book can be democratically reconstituted

Empire, Global Coloniality and African Subjectivity Sabelo J. Ndlovu-Gatsheni, 2013-06-01 Global imperial designs which have been in place since conquest by western powers did not suddenly evaporate after decolonization Global coloniality as a leitmotif of the empire became the order of the day with its invisible technologies of subjugation continuing to reproduce Africa's subaltern position a position characterized by perceived deficits ranging from a lack of civilization a lack of writing and a lack of history to a lack of development a lack of human rights and a lack of democracy The author's sharply critical perspective reveals how this epistemology of alterity has kept Africa ensnared within colonial matrices of power serving to justify external interventions in African affairs including the interference with liberation struggles and disregard for African positions Evaluating the quality of African responses and available options the author opens up a new horizon that includes cognitive justice and new humanism

International Third World Studies Journal & Review, 1991

Thinking International Relations Differently Arlene Tickner, David L. Blaney, 2013-03-01 A host of voices has risen to challenge Western core dominance of the field of International Relations IR and yet intellectual production about world politics continues to be highly skewed This book is the second volume in a trilogy of titles that tries to put the international back into IR by showing how knowledge is actually produced around the world The book examines how concepts that are central to the analysis of international relations are conceived in diverse parts of the world both within the disciplinary boundaries of IR and beyond them Adopting a thematic structure scholars from around the world issues that include security the state authority and sovereignty globalization secularism and religion and the international an idea that is central to discourses about world politics but which in given geocultural locations does not necessarily look the same By mapping global variation in the concepts used by scholars to think about international relations the work brings to light important differences in non Western approaches and the potential implications of such differences for the IR discipline and the study of world politics in general This is essential reading for anyone who is concerned about the history development and future of International Relations

Political Science in Africa, 2023-12-28 Bringing together African and international scholars this book gives an

account of the present state of the discipline of political science in Africa generating insights into its present and future trajectories and assessing the freedom with which it is practiced Tackling subjects including the decolonization of the discipline political scientists as public intellectuals and the teaching of political science this diverse range of perspectives paints a detailed picture of the impact and relevance of the political science discipline on the continent during the struggles for democratization and the influence it continues to exert today *African Political Thought* G. Martin, 2012-12-23 Focusing on individual political thinkers and beginning with indigenous African political thought the book successively examines African nationalism African socialism populism and Marxism Africanism and pan Africanism concluding with contemporary perspectives on democracy development and the African state *Coloniality of Power in Postcolonial Africa* Sabelo J. Ndlovu-Gatsheni, 2013 In this book the author examines the current state of postcolonial Africa with a focus on the liberation predicament and the crisis of epistemological cultural economic and political dependence created by colonialism and coloniality Moving Health Sovereignty in Africa Andrew F. Cooper, Hany Besada, 2016-04-15 Today's era of intense globalization has unleashed dynamic movements of people pathogens and pests that overwhelm the static territorial jurisdictions on which the governance provided by sovereign states and their formal intergovernmental institutions is based This world of movement calls for new ideas and institutions to govern people's health above all in Africa where the movements and health challenges are the most acute This book insightfully explores these challenges in ways that put the perspectives of Africans themselves at centre stage It begins with the long central and still compelling African health challenge of combating the pandemic of HIV AIDS It then examines the global governance responses by the major multilateral organizations of the World Bank and the World Trade Organization and the newer informal flexible democratically oriented ones of the Group of Eight It also addresses the compounding health challenge created by climate change to assess both its intensifying impact on Africa and how all international institutions have largely failed to link climate and health in their governance response It concludes with several recommendations about the innovative ideas and institutions that offer a way to closing the great global governance gaps and thus improving Africans health and that of citizens beyond *Bibliographie Mensuelle* United Nations Library (Geneva, Switzerland), 1989 Explaining Global Poverty Branwen Gruffydd Jones, 2007-01-24 The twenty first century is characterized by extremes of poverty and wealth of scarcity and abundance The vast inequalities of wealth distribution between the developed west and the impoverished developing world is a complex problem This book recognises that Africa in particular has manifested this global disgrace and symbolizes the nature of poverty to the western world In order to truly emancipate the poverty stricken around the world we must necessarily understand the reasons for its existence In a departure from traditional critical realist theory Gruffydd Jones argues the benefits of reassessing the relevance of objective inquiry and emphasizes its primacy over normative theory in the battle to truly understand the reasons for the African crisis This approach brings us a book of real relevance for inequality in

the modern world and gives us an important platform from which to move forwards in the fight against poverty
